To Speak To Nation Thursday Night On Conference—War

Estimate Atomic Bomb Casualties Are 150,000 Dead

Most Of City Of Hiroshima Completely Wiped Out By One Bomb

PHOTOS OF HAVOC TAKEN BY FLIERS

By KENNETH MCALISTER
U. S. Staff Correspondent

GUAM, Aug. 8.—One hundred and fifty thousand Japanese were estimated today to have been killed by the atomic bomb dropped Monday on Hiroshima.

This estimate was made by scores of veteran airmen who viewed new reconnaissance photographs taken today by Okinawa-based planes which flew over the awesome scene of desolation and destruction.

Radio Tokyo virtually confirmed the staggering loss of life, declaring "practically all living things, human and animal, were literally seared to death" in the southern Honshu city.

Gigantic Destruction

If the estimate of Lt. Col. Bob Herring, Breckenridge, Tex., and scores of his veteran airmen on Okinawa is right, then the lone atomic bomb aimed out in one blow more than the total number of Americans killed in the first World War, when 126,000 U. S. soldiers died in action.

The number of dead is equal to the population of cities like Albany, N. Y., Sacramento, Calif., or Flint, Mich.

The new reconnaissance photos failed to disclose a building or wall standing anywhere in the leveled city which looked as if a million comets had chipped and disintegrated everything.

News of the terrifying destruction caused by the atomic bomb created the greatest furor among troops on Okinawa. They foresaw the end of the war, believing that even the Japanese are unwilling to have their entire nation wiped out by the revolutionary bomb.

So widespread was the effect of the bombing that "those outdoors were burned to death, while those indoors were roasted."

PA NEWC Observes

According to an announcement of the Petroleum Administrator for War at Washington, the present quantities of high test automotive gas for civilians is to be doubled immediately.

There is no change in the total amount of gasoline available, but the authorities are changing the proportion of premium grade for civilian use. The increased output of premium grade is made possible by the end of the war in Europe. It is explained.

From the post office department at Washington today comes the announcement that use of the two Jima stamps and other issues with patriotic themes is barred from mail for prisoners of war held by the Japanese, to prevent possible confusion by the Japanese.

Vacation days for New Castle's army of school children are rushing on. Only four weeks from today, Wednesday, September 5, and school will be in session.

Work is in progress at the top of State street all on route 422 in widening the curve that has been a traffic bottleneck in that much traveled highway. Curbing is now being set, and when the improvement is completed traffic will be greatly facilitated at that point.

Daily Weather Report

United States weather statistics for the 24-hour period ending at 9 a. m. today follow:

Maximum temperature, 79.
Minimum temperature, 56.
Precipitation, .36 inches.
River stage, 5.4 feet.

Statistics for the same date a year ago follow:
Maximum temperature, 86.
Minimum temperature, 58.
No precipitation.

New Bomb Equals 2,000 B-29 Loads

An atomic bomb "containing more power than 20,000 tons of TNT" was dropped by our air force on the Jap naval base at Hiroshima, President Truman announced. Comparing this grim reality of war with the 10-ton load of a single B-29 Superfortress (above), quick figures found that one atomic bomb packs the destructive power of all the bombs that could be carried by 2,000 Superfortresses.

Peta's Defense Being Presented Fleeing Japs Are Pursued By Chinese

Witness Relates Some Of Activities Of Peta's Aid To Have Aided Allies

BULLETIN
PARIS, Aug. 8.—(INS)—Defense Attorney Jacques Peta announced today that defense testimony in the treason trial of Marshal Henri Philippe Peta would be completed by Friday night.

Prosecutor Andre Moret will conclude his case Saturday and the trial is expected to end by Tuesday.

PARIS, Aug. 8.—(INS)—Testimony that Marshal Henri Philippe Peta helped finance a secret French air force during the Nazi occupation was introduced today at the old soldier's treason trial.

Gen. Jean Bergeret, former Vichy air minister now under arrest, said as the trial entered its 15th day that the air force trained at a pretended sports camp and fed German food was designed to secure information for the British.

Allege Secret Agreement
Meanwhile, further testimony was expected concerning a secret agreement said to have existed between Great Britain and Vichy in 1940.

Bergeret testified that Peta decided to go to North Africa with him for the Allied landing in November, 1942, because the aged marshal refused to abandon French prisoners into German hands.

The defense witness further testified that Peta messaged Darlan approving his joining with the American and British forces which were starting the liberation of French territory.

Bergeret also told the court that (Continued on Page Two)

Manufacturers Are Given Go-Ahead On Lower Priced Shoes

WASHINGTON, Aug. 8.—(INS)—Manufacturers today had an unrestricted go-ahead on the production of low and medium priced shoes ranging from \$1.25 to \$6.25 per pair.

The WPB said that to encourage production of this inexpensive and moderately-priced footwear the industry now may make as many of these shoes as it wishes.

Previously, production was limited to specified percentages of individual firms' peace-time production. A ban which prohibited firms from making types of shoes they did not produce in peace years also was lifted.

Shoes affected by the relaxation run from non-leather babies' shoes costing \$1.25 to men's dress shoes retailing at \$6.25 and include girls' children, youths and boys, women and work shoes and house-shoppers.

FALLS TO DEATH

CHICAGO, Aug. 8.—(INS)—A man, tentatively identified as W. D. Flickinger, 42, of 14719 Clifton avenue, Lakewood, O., an employee of the Republic Steel Corp., jumped from the eighth floor of the Sherman hotel.

The identification was made from papers found in his room. No note was found and police could not determine whether his fall was accidental or intentional. The body was unclaimed.

Teheran Dispatch Says Allied Forces Will Be Withdrawn

LONDON, Aug. 8.—(INS)—A Reuters dispatch from Teheran reported today that the foreign ministry has announced the decision to withdraw all Anglo-Russian forces from Iran immediately.

According to the dispatch, the British embassy informed Iran of the decision which was arrived at during the Potsdam conference.

Tokyo Reports Atomic Bomb Causes Havoc

Fearful Losses And Damage At Hiroshima Are Now Reported By Japan

DESTRUCTIVE POWER IS INDESCRIPTIBLE

BULLETIN
SAN FRANCISCO, Aug. 8.—(INS)—Radio Tokyo declared today that the corpses in Hiroshima were "too numerous to be counted" and that "practically all living things, human and animal, were literally seared to death" by the atomic bomb dropped on the Japanese city.

The extent of the damage to the city was described as "unimaginable." The broadcast stated that the use of the atomic bomb was a violation of international law.

The destruction quoted in the broadcast aimed at Europe was attributed to authorized quarters in Tokyo, which were otherwise unimpaired.

Most of Town Destroyed
As a consequence of the use of the new bomb against the town of Hiroshima on August 6, most of the town has been completely destroyed and there are numerous dead and wounded among the population, Tokyo declared.

The destructive power of these bombs is indescribable, the broadcast continued, "and the trial still resulting from the attack is so impressive that it is being investigated."

(Continued on Page Two)

Jap Synthetic Oil Works Is Reported Sunk

BULLETIN
GUAM, Aug. 8.—(INS)—Twenty-four Air Force headquarters today listed Japan's Oil Refining Company as "destroyed and sunk."

Headquarters revealed that the great Jap synthetic oil works, built on reclaimed land during one of the earlier on Honshu, was 100 percent destroyed in a B-29 bombing raid on the night of August 6-7.

So great was the effect of the demolition bombs that much of the plant area was flooded and "reclaimed" by the ocean.

Hence the word sunk in the all force report.

GUAM, Aug. 8.—(INS)—Here is the text of the historic communiqué in which Gen. Karl Spatz, chief of the U. S. Army strategic air forces, officially describes the damage caused by the single atomic bomb dropped on Hiroshima Monday.

Reconnaissance photographs made over Hiroshima on the morning of 6 August show that four and one-tenth square miles or sixty percent of the city's built up area of six and nine-tenths square miles were completely destroyed by the atomic bombing mission. Five major industrial targets within this area were completely destroyed.

Additional damage was shown outside the completely destroyed area.

British Freighter Is Afire At Sea

BULLETIN
HALIFAX, N. S., Aug. 8.—(INS)—The British freighter Argos Hill was reported today on fire at sea about 200 miles off the Newfoundland coast.

In response to distress signals, three naval mine sweepers equipped with fire fighting apparatus were rushed to the assistance of the 4,413-ton vessel.

Superforts In Three Strikes At Jap Islands

More Than 500 B-29s Make Three Separate Raids On Japanese Targets

YAWATA GIVEN HEAVY BOMBING

GUAM, Aug. 8.—(INS)—More than 515 B-29s and escorting fighters lashed at Japan today in three separate strikes.

A force of more than 30 Superforts bombed an aircraft plant and an arsenal in the Tokyo area with incendiary bombs in four waves in 25 hours after more than 225 Superforts, escorted by 140 fighters, blasted the steel production center of Yawata on northern Kyushu this morning.

The Superforts dropped approximately 2,000 tons of demolition bombs on Yawata.

Mines Are Planted
The third strike at Japan was carried out by 30 Superforts which planted mines in four harbors from northern Korea to Honshu to further tighten the stranglehold shipping blockade on the Japanese homeland.

Targets of the B-29s which hit the Tokyo area last before dusk today with demolition bombs were the Nakano, Musashino-Tama, and the one-month Tokyo arsenal.

Control Plan For Austria

Four Nations Set Up Plan For Control Of Country Overrun By Nazis

UPPER AUSTRIA IS ASSIGNED TO U. S.

WASHINGTON, Aug. 8.—(INS)—United States, Britain, Russia and France today set up a control plan for Austria which is expected to pave the way for her acceptance as a member of the United Nations.

The "Big Four" set forth a plan for the first of the European nations overrun by Nazis. Somewhat similar to that for Germany, in providing for uniform control of the four allied occupation zones, the plan does not impose any punitive terms. It prepares for the gradual reestablishment of democracy in the country.

Occupation will be considered to include the boundaries which existed before Hitler took over the country in 1938. This area will be situated for occupation with the northernmost section including upper Austria, east of the Danube and all of Burgenland going to Russia.

U. S. In Upper Austria
The United States forces will occupy upper Austria west of the Danube and the province of Salzburg.

Assembly Plant For Atomic Bombs Is Kept Secret

RICHMOND, Wash., Aug. 8.—(INS)—The Pacific Northwest need not lose any sleep nights even though its sprawling atomic bomb project in southeast Washington is building terrible power capable of blowing out of an entire state off the map.

What is being turned out at the 355 million dollar Hanford project is harmless as milk until it is assembled elsewhere for shipment to what Maj. W. L. Sapper, project executive officer, calls "the ultimate consumer."

The Hanford product is the finished stuff, Maj. Sapper said, but one more step must be taken at an undisclosed place "to make it explosive."

DEATH RECORD

Wednesday, August 8, 1945

John Ponick, 1012 South Jefferson street.
Miss Elizabeth May Rupp, 68, New Bedford, Pa.
Mrs. Nora Stoner, 84, 131 1/2 Water street.
Mrs. Catherine Ryan Calahan, 90, 703 West Washington street.

After-Effects Of Atomic Bombing Last For Years

WASHINGTON, Aug. 8.—(INS)—The Allied high command today ordered fresh atomic bombing attacks on Japan.

The new devastating blows by the greatest weapon in history may come at any moment.

It is the consensus in Washington that the atomic bombings in themselves will serve as a new ultimatum to Japan to surrender unconditionally or be wiped off the face of the earth.

Piling together their knowledge

scientists reported that the area where the bomb had struck would be uninhabitable for from five to seventy-five years. This was ascribed to the fact that aside from the tremendous compression of the explosion itself, all matter within a wide radius was made radioactive. It was impregnated with radium which, while it does not cause cancer, dissolves human flesh and bone. Radium can, indeed, dissolve all metals excepting lead. Even in the protective covering, science has not

Most Of Airmen On Plane Unaware Of Bomb Mission

Only Three On B-29 Making Atomic Bomb Attack Knew Of Special Raid

CREW AMAZED AT TERRIFIC RESULTS

By JOHN R. HENRY
U. S. Staff Correspondent

GUAM, Aug. 8.—Most of the American airmen aboard the Superfortresses which shattered the Jap city of Hiroshima today were unaware of the atomic bomb load on their planes.

Only three men in the crew of 11 aboard the Superfortress "Eagle" knew the exact nature of the mission, and only one of these had ever before witnessed the devastating effects of the earth-shattering "top-secret" weapon.

The attack on Hiroshima was summarized by the returning airmen in this way:

The only way we could tell a city had been there was because we had seen it a moment before. Col. Paul W. Tibbets, Jr., of Miami, Fla., pointed out today that even his copilot, Capt. Robert A. Lewis, who flew the B-29, was not informed of the mission until the plane was in the air.

Colonel Tibbets, a veteran of the European air war, Capt. William Sterling Parsons of the Navy, a native of Chicago and resident of Los Angeles, and the rest of the crew were told of the mission only after the attack.

City Disappears
The attack on Hiroshima was summarized by the returning airmen in this way:

The only way we could tell a city had been there was because we had seen it a moment before. Col. Paul W. Tibbets, Jr., of Miami, Fla., pointed out today that even his copilot, Capt. Robert A. Lewis, who flew the B-29, was not informed of the mission until the plane was in the air.

Colonel Tibbets, a veteran of the European air war, Capt. William Sterling Parsons of the Navy, a native of Chicago and resident of Los Angeles, and the rest of the crew were told of the mission only after the attack.

Report Davies May Be Envoy To Great Britain

WASHINGTON, Aug. 8.—(INS)—Joseph E. Davies, former ambassador to Russia and Belgium, today was reported in congressional circles to be slated as American ambassador to Great Britain.

Davies, it was reported, would succeed Ambassador John Winant in the new future, with Winant becoming American representative to the United Nations economic council.

The Davies appointment was reported to be part of a shakeup to be made in the state department by Secretary of State Byrnes upon his return from the Potsdam conference with President Truman.

Byrnes, who directed that budget bureau experts make a study of the state department during his absence, is expected to recommend the appointment of a new under secretary of state to succeed Joseph Davies, who was installed in the post after Edward R. Stettinius became secretary.

Thinks President May Call Congress

WASHINGTON, Aug. 8.—(INS)—Sen. Bell (R) Minn., said today he would not be surprised if President Truman asked Congress to cut short its recess and reconvene before October 8.

"It's quite possible in view of the present circumstances that the president may decide to do that," he commented.

Sen. Connally (D) Tex., said he had heard of no plans for shortening the summer recess, but added "If the president has something he wants us to do, I'm not opposed to Congress meeting earlier."

Several members expressed the view that the development of the atomic bomb may influence the president to recall Congress on the theory that the war with Japan may end quicker than anticipated.

President Back At White House After Conference

Arrives Tuesday Night—Will Make Early Report To American People

NEW SURPRISES READY FOR JAPS

(BULLETIN)

WASHINGTON, Aug. 8.—(INS)—President Truman will give the American people his own eye-witness first-hand account of the historic decisions made at the Berlin conference, and perhaps unfold a new chapter in the war against Japan, at 10 o'clock EDT tomorrow night.

The Chief Executive, grimly determined that Japan will be forced into unconditional surrender within the shortest possible time, made plans to go on the air for a report to the nation at the quickest possible moment following his return to Washington.

Truman will speak for a half hour. His report to the nation will be carried on all major networks in this country and to the entire world in many languages through an elaborate world-wide short-wave hook-up.

By ROBERT G. NIXON
U. S. Staff Correspondent

WASHINGTON, Aug. 8.—President Truman today determined to force the unconditional surrender of Japan in the shortest possible time.

New surprises as devastating to Nipponese moral as the atomic bomb are in store for the besieged people of Japan unless they heed the ultimatum from the United States, Great Britain and China to surrender or be destroyed.

The nature of the expected developments cannot now be revealed. They will have effect as the course of the war against Japan unfolds.

Together with the atomic bomb, the new surprises are the most powerful weapons in the arsenal of the United States, Great Britain and China to bring about a final and complete destruction of Japanese militarism.

These new surprises are the most powerful weapons in the arsenal of the United States, Great Britain and China to bring about a final and complete destruction of Japanese militarism.

Halsey's Fleet Ready To Strike At Japan Again

WASHINGTON, Aug. 8.—(INS)—Admiral William F. Halsey's third fleet was today ready to strike new blows against Japan's vital coastal installations in combination with new atomic bombing attacks on the enemy homeland.

In making this announcement the admiral declared that the Japanese "must now take their choice: mass suicide or surrender."

The navy observing that it is too early to determine effects of the atomic bomb on Japanese morale asserted:

"We may have to destroy four or five cities before they actually begin to have such a bomb. But we will bring them the proof."

With the destruction from this type of bomb, and with the continued damage from Admiral Halsey's carrier planes and ships, the Japanese fighting strength and perhaps even their will to fight will rapidly weaken.

The navy served notice that Halsey's "first destroyers and the big guns of his heavy ships will soon let loose more and more destruction on vital coastal installations."

It was disclosed that Halsey had to move his third fleet to safety last week because of a threatening typhoon.

Planes Can Win, Ricktenbacker Says

NEW YORK, Aug. 8.—Captain Edward F. Ricktenbacker expressed the opinion that Japan could be defeated by air power alone.

The World War I ace and Eastern Airlines president said in a statement:

"I believe that in a very short time the Japanese people and industry will be so demoralized and battered by the daily ration of atomic demolition and incendiary bombs that they will cry quits."

"It is my firm belief that this is the first war which will not be exclusively by air power, notwithstanding all experts' feelings that we will have to land troops on the home islands themselves."

Notice

I will not be responsible nor pay for any debts contracted by anyone other than myself.

age will be done to Japan's ability to wage war.

Then another, and another, and another.

After that, in progressive steps, the Japanese homeland will be destroyed. Japan's sole way to halt their own progressive annihilation is to surrender unconditionally as stated in the Allied ultimatum from Berlin.

New Attacks Ordered

The main command, in fact, has already ordered the new attacks.

Meanwhile, at any moment, may come the new devastating blow at Japanese military power.

Mr. Truman will speak to the American nation by radio probably within the next forty-eight hours.

He came back to Washington from the Big Three meeting on a record trans-Atlantic run in order to deliver a message to every American home at the earliest possible moment.

The trip gave the president a chance to rest and recuperate his strength after his strenuous and continuous two and a half weeks conference with the heads of Russia and Great Britain.

The exact time for his report to the nation by radio had not been set on his arrival back at the White House last night, but it was expected that it would be made within the next two days.

County Firemen Have First Picnic

Members of the Lawrence County Firemen's Association, with their families, had their first annual picnic at New Wilmington municipal park Tuesday evening, with a large number present.

A five picnic dinner was enjoyed, and there was a good program of entertainment for the kiddies, with swimming in the New Wilmington pool. A short business session took place during the evening.

The September meeting will take place with the Shenandoah township department as hosts.

AIDED IN BUILDING

PITTSBURGH, Aug. 8.—(INS)—The Pottsville Metal Products Company in Carnegie played an integral part in the construction of two plants which now produce the devastating atomic bomb.

Milton Gallup, president of Pottsville Metal, disclosed today his company fabricated tons of steel material used in building the Hanford Engineering Works, Pasco, Wash., and the Clinton Engineering Works, Oak Ridge, Tenn.

U. S. First To Become United Nations Member

WASHINGTON, Aug. 8.—(INS)—The United States today formally became the world's first country to be a full-fledged member of the United Nations.

The action took place when President Truman and Secretary of State Byrnes signed the document of ratification as approved by the senate.

The charter as well as the statute of international court of justice were signed by both the president and Byrnes.

The signed charter was then deposited in the Archives building, completing the process through which the nation became a member of the United Nations organization.

AFTER EFFECTS OF ATOMIC BOMBING LAST FOR YEARS

(Continued from Page One)

yet learned the needed thickness of such insulation.

Need Years To Recover

Only years of rain and the hot rays of the sun can wipe from the dense fabric of the earth this powerful radioactive force. Even then, the radium washed into the rivers and seas may destroy animal and vegetable life until diluted beyond danger.

Some doubt existed even today that Tokyo investigators could walk through the recently bombed area without endangering their lives. Since even factory workers painting a thin solution of radium on watch dials have found their work fatal.

While area spread through in formed civilization over the war making potential of the atomic bomb and the possible immediate result on the war with Japan, others speculated on its effect on modern civilization.

Observers of international affairs foresaw the wide revision of foreign policy of many nations, accompanied by regroupings of national interest. The list of raw material which today influence thought on national interests, it was foreseen, might be swept aside with the war-time and peacetime developments of atomic.

MOST OF AIRMEN ON PLANE UNAWARE OF BOMB MISSION

(Continued from Page One)

Sante F. N. M. and Maj. Thomas W. Ferber, bombardier from Mocksville, N. C. were the only men aboard the "Enola Gay" who were fully informed of the nature of the mission.

The "Enola Gay" took off on its history-making mission one hour after midnight and set the city of Hiroshima virtually on fire at 8:15 a. m. Monday when the bomb was dropped.

Given "Clear Hint"

The hushed-up crew was given, as a last hint of the nature of their mission when they were fitted with dark glasses to protect them against the expected blinding flash.

Captain Parsons, the Navy bomb expert, was the last to appear on board the "superfort" when the bomb exploded.

We made a tight turn away from the target in order to get a maximum distance between us and the explosion," Parsons said.

"It was a little more than a minute after we dropped the bomb that we felt the impact of the explosion."

Parsons described the men aboard the "Enola Gay" as amazed and speechless in the wake of the bombing.

"One of them," he said, "simply stared and softly murmured a single 'My God.'"

Mountain of White Smoke

"What had been Hiroshima was a mountain of white smoke rushing into the sky. For a third and fourth time above the ground was a black plume which had been seen in the past but could not have been from fire alone."

Maj. Ferber, the bombardier, dropped the atomic bomb visually in perfect bombing weather.

Others who helped with the new chapter in warfare included Capt. Theodore J. J. Van Kirk, Northumberland, Pa., navigator, and Second Lieut. Morris Jenson, address unavailable, electronics officer.

Tibbitts, Ferber and Van Kirk formed the nucleus of the land-based crew. The three officers and their men were together in Europe and were specially chosen for the daring inaugural atomic bombing mission.

The peacock is a kind of pheasant. It originated in Asia and the East Indies. In India it is regarded as sacred by various castes.

ESTIMATE ATOMIC BOMB CASUALTIES ARE 150,000 DEAD

(Continued from Page One)

indors were killed by the indescribable pressure and heat," Tokyo declared.

City Becomes 'Cosmic Dust'

A single bomb, the most terrible weapon of destruction in mankind's history, transformed the heart of the city of 340,000 population into something that resembled cosmic dust.

In a momentous communique, Gen. Carl Spaatz, chief of the U. S. Army's Strategic Air Forces, declared that four and one-tenth square miles of Hiroshima were "completely destroyed."

This represented 60 per cent of the city's built up area of six and nine-tenths square miles.

The terrible blast that occurred when the atomic bomb was dropped at 9:15 Monday morning Japanese times wrought heavy additional damage outside the completely destroyed area.

The waves of concussion, which in the test of the revolutionary bomb in the New Mexico desert knocked two men six miles away off their feet, must have been death-dealing in Hiroshima.

So destructive was the atomic raid that Hiroshima, once a big Japanese army base, was an isolated city with all communications cut off, according to radio Tokyo.

Only One Bomb Dropped

No other bombs were dropped on Hiroshima—just the single atomic bomb.

As the destructive power of the mighty bomb began to dawn on the Japanese war lords, Premier Kantaro Suzuki summoned a special meeting of his cabinet.

The chief cabinet secretary, Hisatsune Sekomizu, "made a report" on the Hiroshima raid, radio Tokyo declared, but did not divulge the nature of his report.

There was no mistaking the fearful damage picture in the official reconnaissance photographs viewed today at Guam headquarters by war correspondents.

The four and one-tenth square miles that General Spaatz described as "completely destroyed" actually amounted to a flat, featureless plain that once was the center of Hiroshima.

Difficult To Believe

It was difficult to believe that a single bomb with the explosive force of 20,000 tons of TNT, had caused the havoc.

The size of the atomic bomb or the height from which it was dropped by the "superfortress," "Enola Gay," were not revealed.

There was comment at Guam on the radio Tokyo report that it was attached to a parachute and burst over the city with cataclysmic force.

Here and there in the trackless plain were tiny protuberances, like purple, intelligence officers, analyzing the photographs said that these protuberances were the remains of destroyed concrete structures.

Around the center of complete destruction were huge irregular mounds of rubble, a few inches high, scattered over the city with cataclysmic force.

Reconnaissance photographs taken by the "Enola Gay" of the area of the devastating explosion showed the center of Hiroshima destroyed in a vast field of dust.

Smoke 40,000 Feet High

From the center of this dark, swirling mass emerged a column of almost pure white smoke, billowing funnel-shaped into the sky.

Scarcely a minute passed a column of smoke mushrooming upward and outward, while another low broom of smoke puffed up from below. The smoke rose in a column to 10,000 feet and then billowed upwards to 40,000.

The atomic explosion jumped six rivers in its path. Four block-wide streams, running through Hiroshima, merged into two wider streams, each about the width of a main city block. These would have made natural breaks in incendiary bomb attacks which only a few days ago were considered the most dreadful weapon man's mind could devise.

The destruction in Hiroshima was measured off accurately by Col. Paul Tibbitts, Maj. Ferber, pilot of the atomic bomber.

"The only way we could tell a city had been there was because we had seen it only a moment before."

PETAINE'S DEFENSE BEING PRESENTED

(Continued from Page One)

Petaine opposed sending the German military aid in Syria which the Germans requested following the North African landings.

Opposed Nazi Demands

Petaine was described by Bergeret as constantly opposing German demands for the use of French fighter planes.

Beginning in 1941, Bergeret testified the Germans demanded that Petaine release the French air force for the defense of Paris and the channel ports against the Allies.

The witness said Petaine's firm refusal of these demands prevented outright French collaboration with the Germans. He added that the great French air force comprised 27 groups of which 25 were fully equipped. He said the force totaled 19,000 men.

Petaine, on trial for reasonable activities during his tenure, has contended that he would be cleared of the charges if the full story of the past were told by Britain.

TOO MANY DOGS

NEW YORK, Aug. 8.—Harriet Oswald's fancy for dogs landed her in a Brooklyn court yesterday, charged with violations of the Sanitary Code.

Magistrate Charles Solomon suspended a 60-day sentence providing she let the American Society for Prevention of Cruelty to Animals keep her dogs.

It wasn't that the court objected to dogs.

But 29 of them in a three-room city apartment was a bit too much, ruled the magistrate.

CORRECTION

In Tuesday's ad of New Sheridan Market, the line reading, "Birds Eye Processed Foods," should have read, "Birds Eye Frosted Foods."

Deaths of the Day

John Ponick

John Ponick, of 1012 South Jefferson street, died in the New Castle hospital, Tuesday at 6 p. m., from a heart attack.

He was employed at the P. & L. E. railroad. The body is at the Joseph B. Leyde mortuary, Highland at Winter.

Funeral arrangements will be announced later.

Mrs. Catherine Ryan Calahan

Mrs. Catherine Ryan Calahan, aged 90 years, of 703 West Washington street, died this morning at 11:15 o'clock following a three days illness.

She was the widow of Patrick J. Calahan, who died 24 years ago.

Mrs. Calahan was born in New Castle, daughter of Michael and Mary Ryan. She was a member of St. Mary's church.

Surviving are the following children: J. Frank Calahan of Parkersburg, W. Va., and Howard T. Calahan of this city; five grandchildren and four great-grandchildren; a brother, Philip of Brookfield, Mo. A son, James Lee, died in 1937.

The body is at the Zeimer funeral home, North Beaver street, where friends may call tonight 7 to 9 o'clock and Thursday 2 to 4 p. m.

Funeral arrangements are incomplete.

Elizabeth May Rupp

Miss Elizabeth May Rupp of New Bedford died at her residence Tuesday afternoon at 12:30 as the result of a heart attack.

Born in New Middletown, O., on June 28, 1877, she was the daughter of John and Savilla Miller Rupp. Miss Rupp had lived in New Bedford for the past 32 years and was a member of the Hopewell Presbyterian church and the Friendship Bible church.

Surviving are a brother, Perry, of New Bedford, and a sister, Mrs. Silas Sears, of Conville, O. Funeral services will be held in the Hopewell church Thursday at 2:30, with burial in Evergreen cemetery.

Dr. R. W. Vesich will officiate at the service.

The family will receive friends at the Kelly funeral home in Hubbard, O. Wednesday evening and the body will be in state in the Hopewell church from 7 o'clock Thursday afternoon until time for the funeral.

White Funeral

Funeral services for Robert Wallace White, New Castle, R. D. 6, were held from the R. L. Bond funeral home, North Jefferson street, Tuesday at 1 p. m., with Rev. J. M. Blackwood, pastor of Oak Grove U. P. church in charge.

Interment was in Mt. Herman cemetery.

Palibearers were Robert Myers, Dale Myers, Joseph Myers, Richard Harrison, Raymond Young and Raymond Kline.

Reider Funeral

Funeral services for Andrew Reider, 2007 Albert street, were held from R. L. Bond funeral home, North Jefferson street, Tuesday afternoon at 2 p. m., with Rev. J. M. Blackwood, pastor of Oak Grove U. P. church in charge.

Interment took place at Oak Park cemetery.

Palibearers were J. G. Clements, Claude M. McMichael, Norman E. Clark, Anna McKee, Robert R. Gorman and Edwin E. Massman.

Thomas Minutilla Funeral

High mass of requiem for Thomas Minutilla, aged 49 years, of R. D. 2, Albion, Pa., who died on July 21, was held in St. Vitus church in July 28. Interment was in St. Vitus cemetery.

Mr. Minutilla was born in Cleveland, Pa., September 12, 1890. He was a retired worker of the Pennsylvania railroad and was a member of St. Lawrence church, Albion.

Surviving are his wife, Mrs. Josephine Minutilla, and daughters, Fleming and Antonette. His mother, Antonette, and his father, Edward, are deceased.

Three brothers, Tony of New Castle, Anthony of Eschbach and Donald of New Jersey, and four sisters, Mrs. Felix Coyner, Mrs. Tony Pashalla, Mrs. Frank DeVita of Eschbach and Mrs. John Warren of Bessemer.

Mrs. Swaines Funeral

Funeral services for Mrs. Anne Swaines, Charter street, were held from the J. J. Nona funeral home, Rev. P. William M. Pearson in charge.

The body was sent this afternoon at 1 o'clock to Detroit for interment.

Hughes Funeral

Funeral services for Daniel Hughes, 31, of 1208 Clearview avenue, were held from the Joseph B. Leyde mortuary, Highland at Winter, at 2 p. m., with Rev. Griffith Thomas in charge.

David Rees, using a solo during the services, with Mrs. John Evans accompanying on the pipe organ.

Palibearers were Sam Matthews, William Powell, Thomas L. Jones, John H. Evans, Lew Morris and Isaac Isaac.

Interment was in Oak Park cemetery.

Mrs. Nora Stoner

Mrs. Nora Stoner, aged 84 years, of 131 W. 3rd street, died in the New Castle hospital Tuesday evening at 11:30 o'clock. She was the widow of William Stoner.

Mrs. Stoner was born in Perry township August 13, 1860, daughter of Joseph and Alena Wimer Hall.

She leaves a brother, E. G. Hall.

The body is at the Joseph B. Leyde mortuary, Highland at Winter, where the family will receive friends tonight and Thursday night.

Funeral services will be Friday at 2 p. m. from the funeral home.

No satisfactory results can be achieved by applying paint or enamel to a heating stove. The good old-fashioned stove polish still makes the best dressing for metal that must withstand intense heat.

IN MEMORIAM

In loving memory of our wife and mother, Pierina Morganti, who passed away two years ago today, August 8, 1943.

You are not forgotten, mother dear. Not will you ever be. As long as life and memory last we will always remember thee. Husband, Children and Grandchildren.

TOKYO REPORTS ATOMIC BOMB CAUSES HAVOC

(Continued from Page One)

between men and women killed by the fire. The corpses are too numerous to be counted.

An earlier broadcast, beamed to America, declared the new "atom bomb" caused "catastrophic ruin" in the city, crushing homes and buildings.

Burned Beyond Recognition

"All of the dead and injured were burned beyond recognition," said the broadcast recorded by the FCC.

Authorities still are unable to obtain a definite checkup on the extent of the casualties, and authorities are having their hands full in giving every available road possible under the circumstances, the broadcast continued.

The effect of the bomb would Tokyo still refrained from labeling an atomic bomb as an "unprecedented" disaster in the history of the world.

That "those unknown" killed by the atomic bomb were "burned beyond recognition" was the broadcast's latest statement.

In the destruction of property, the broadcast said, "the greatest damage" was done to the city's industrial and commercial life.

Prime Minister Suzuki said in a special address broadcasted by the radio that the atomic bomb was "a new type of weapon."

The broadcast said that the atomic bomb was "a new type of weapon" and that it was "a new type of weapon."

REPORT KOREAN PRINCE KILLED

NEW YORK, Aug. 8.—(INS)—The Japanese Domei agency reported today that Prince Yi, the brother of King Kook, whose reign began in 1944, was killed by the atomic bomb explosion at Hiroshima.

The 27-year-old prince was seen by Japanese army officers at the scene of the disaster, recorded by the FCC.

If you are troubled with any of the following conditions, they are found and they will soon disappear:

Headaches, dizziness, vertigo, tinnitus, deafness, ringing in the ears, nosebleeds, toothache, sore throat, hoarseness, asthma, bronchitis, emphysema, heart disease, high blood pressure, diabetes, rheumatism, gout, sciatica, neuritis, paralysis, epilepsy, hysteria, nervousness, insomnia, indigestion, constipation, hemorrhoids, piles, skin diseases, etc.

The remedy is also expected to be effective in the treatment of the following conditions:

Acid indigestion, flatulence, constipation, hemorrhoids, piles, skin diseases, etc.

Get This Greater Value In Funeral Service . . .

Many families are finding that they get greater value in a funeral by patronizing an organization equipped to select properly—and one that really gives personal service.

More people are coming to realize that it is the service that means most. And a large part of the value rests in the service they receive. We welcome comparison on this basis.

SUPERFORTS IN THREE STRIKES AT JAP ISLANDS

(Continued from Page One)

Both targets were bombed today in clear weather. The main body of the force hit the aircraft plant and a smaller group blasted the newly damaged arsenal area.

The arsenal area was bombed over in an incendiary attack on April 14.

Yavata First Target

Yavata was the first Jap homeland target, ever struck, by the superforts. The big steel report was first hit on June 14, 1944, by China-based Superforts which followed up with two subsequent attacks.

Further opposition to today's Tokyo raid was entirely lacking for lack was described as intense.

The atomic raid, which carried out by B-29s of the Third Army, 11th Air Force, was the first of the series of attacks on the Jap homeland.

Humans are back by the ancient Greeks to bring the Japanese men.

GILL BROWN CLASS EVENT FOR TEACHER

On Tuesday evening members of the Gill Brown class of Central Presbyterian church, their families and guests gathered at the home of Mr. and Mrs. George Hudson, Jr., Youngstown road, for a three-course dinner.

Guests of honor were Mr. Brown, teacher of the class since its organization; Mrs. Brown and their children Roberta, Wilfred and Harold, who will leave next week to take up residence in Pittsburgh.

Dinner was served at three tables on the lawn where places were set for 70.

Musical, basketball and volleyball were in play during the evening and continued after dark by means of floodlights.

Mr. Brown was presented with a handsome gold watch chain in appreciation of his faithful teaching. Mrs. Hudson's aides were Mrs. William Stoner and Mrs. John Gallagher.

Special guests were Mr. and Mrs. William Bowden and daughter Janet of Cleveland, O.; Mrs. Louis Jacob, Mrs. K. E. and Mrs. Frank K. and Mrs. Alfred Kogut. Mr. Charles Gallagher and Dale Mielke, all of New Castle.

EAGLES AUXILIARY PROGRAM OUTLINED

Ladies Auxiliary to the F. O. E. met Tuesday evening at the Eagles hall where plans for the fall program were outlined with Mrs. Olive Kev, president, presiding.

Announcement was made that Mrs. Hulda Rodgers has been appointed to serve on the social committee of which Mrs. Alvin Herberg is chairman. Projects for the auxiliary's charity and welfare work are in charge of this committee. The group will start its fall work in this connection during the week of August 20.

A donation was voted to Mr. Flanagan for a special fund for the "returning sons" of Boys' Town.

Social period for the evening was in charge of Mrs. Edward Eckert and committee, Mrs. William Schell, Mrs. Charles Brown and Mrs. Frank Peterson.

E. N. C. MISSION PLANS REUNION

Seventh annual reunion of the former East New Castle mission will be held Thursday evening at the home of Mr. and Mrs. Oscar Graff, East New Castle.

Supper will be served at 6 o'clock with Mrs. Graff as chairman of the table committee. Ted Watson is chairman of the sports committee and Scott Kay, president.

CASTLE HILLS CLUB LADIES DAY CONTEST

On Thursday at Castle Hills ladies day will take the form of a picnic at noon preceded by golf with tee-off time 9 a. m.

Mrs. Arvid Bengtson and Miss Eleanor Bolinger will be hostesses.

Thursday

London Bridge, Mrs. Joseph Davis, R. D. 2.

F. O. W. Mrs. Carrie Mortimer, 1214 East Washington street.

J. F. P. Mrs. Harold McCartney, West Greifeld avenue.

Happy Group, Mrs. Joseph Boronaro Northview avenue.

America, Mrs. Norman Cusack, Huey street.

E. L. V. Elks club, Reunited Ladies, Mrs. Ed Campbell, Boston avenue.

1945 Victory, Cascade park, Mill street.

G. N. Mrs. Christine Lombardo, Lutton street.

L. A. Mrs. Mary Vaughn, East street.

Semper Fidelis, Cascade park, Ki-Nu, Mrs. Rose Gilliland, West Washington street.

Son Born To Former Residents

Birth of a son, who has been named Terry Edwin, on July 26 at Westmoreland hospital, has been announced by Mr. and Mrs. George E. Maasie, of Greensburg, former residents of New Castle.

The baby is a grandson of Mr. and Mrs. J. R. Maasie of South River street, and a great-grandson of Mrs. Georgiana Maasie of East Grant street, and Mr. and Mrs. J. E. Patton of Chestnut street.

Engagement Told

Mr. and Mrs. Louis Zona of 118 Center street have announced the engagement of their daughter, Christina Zona, and Albert Rich, son of Mr. and Mrs. Nicholas Rich of East Brook road.

The engagement was announced at a gathering at the Zona residence on Miss Zona's birthday recently. No date has been set for the wedding.

Freinstein-Slater

Miss Lois Elizabeth Freinstein, daughter of Mr. and Mrs. Fred Freinstein of 12 West Lawrence street, and Brewster G. Slater of R. D. 3, were married at 6:30 Tuesday evening by Alderman Margaret M. Orres at her home, West Washington street.

The couple was attended by Mr. Irene Freinstein, sister of the bride, and Mr. Freinstein.

Whitney Reunion

Members of the Whitney family will have their 50th annual reunion at Centennial park, Salem, O., on Sunday, August 19. Mrs. Maude Whitney Hamilton of this city is a member of the historical committee. The program will be in the Quaker church there.

Simon Relief Corps

Members of the Louis E. Simon Relief Corps No. 11 met in the lodge room, Schenck road, Tuesday evening. A donation was made to the Brookville, Pa. home. Plans were made for a picnic at Cascade park Tuesday, August 21, at 6 p. m. at shelter 4.

The word "recreation" is thought to come from recreation, as the flower was much used in wreaths to celebrate marriage.

FAREWELL PARTY FOR WAVE ENLISTEE

Miss Betty L. Gray of 610 Taylor street, entertained at her home on Tuesday evening for her niece, Miss Dorothy Dods, of Beckford street, who leaves today for training with the Waves at Hunter College, New York City.

Games were a diversion during the evening and later refreshments were served at a table decorated in a patriotic color scheme of red, white and blue candles and flowers and small flags. Mrs. Lorrin Gray assisted the hostess.

Mrs. George Dods of Monaca and Mrs. James Gilmore and her daughter, Miss Sonia Gilmore of Youngstown were out-of-town guests.

Miss Dods has been entertained at several farewell events since announcement of her enlistment in the Waves.

PICNIC AT PARK FAREWELL EVENT

As a surprise farewell event for Mr. and Mrs. Berkeley Dillon, members of the Cambridge club entertained with a picnic dinner at Cascade park grove on a recent evening. Dinner was served at 7 o'clock to 35 members and several guests.

Mrs. Selby Moore and H. M. Stevens were in charge of arrangements.

Mr. and Mrs. Dillon and their son Berkeley, Jr., plan to leave August 15 to take up residence in Redlands, Calif.

The guests of honor were presented with a gift of luggage on behalf of the group by Selby Moore. He accompanied the presentation with a brief farewell speech.

Mrs. William Wade of Cambridge, O., and the Misses Ethel Koch and Loraine Donovan, of this city, were guests.

PANTHERETTE CLUB PLANS ACTIVITIES

Pantherette club members met Tuesday evening in the home of Mrs. A. J. Capozzi, Agnew street, with president, Mrs. Louise Gaspare in charge. A corn and Weiner roast was planned to be held soon.

Card playing was the pastime, each score prizes going to Mrs. Andy Marapeo, Mrs. Anthony Ambrose, Mrs. Joseph Puma, and Mrs. James Fuleo in charge.

A bottle shower was held with Mrs. A. J. Capozzi and Mrs. Ralph Morelli being honored. They were also co-hostesses on this occasion and served a dainty lunch later.

August 22 is the meeting at Cascade park, weather permitting. Hostesses will be Mrs. Robert Puma, Mrs. Joseph Panella and Mrs. Joseph Puma.

CONTI EZZO WEDDING THURSDAY

Miss Pauline Conti, daughter of Mr. and Mrs. William Conti of Washburn avenue and Cpl. Arthur Ezzo, son of John Ezzo, South Lafayette street, will be united in marriage Thursday morning at 9:30 o'clock in an "open church" wedding in St. Lucy's church.

Open house reception will be held in St. Margaret's hall North Liberty street, at 7:30 p. m.

DICARLO DEJOSEPH ENGAGEMENT NEWS

Mr. and Mrs. Benny DiCarlo of 401 Pearson street announce the engagement of their daughter, Edna, to Sgt. John DeJoseph, a returned veteran and son of Mr. and Mrs. Anthony DeJoseph of 1117 Croton avenue.

The engagement will terminate in a wedding in the near future. Sergeant DeJoseph is home on a 30-day furlough.

K. E. SMITH CLASS TO PICNIC THURSDAY

K. E. Smith class of the Central Christian church will meet at the home of Mr. and Mrs. Norman Zeigler, 230 West Moody avenue, for a 6:30 o'clock picnic on Thursday evening.

Mrs. Tom Evans, Mrs. Elmer Glass and Mrs. Anna Compadore are the committee in charge of arrangements.

GRANATO YARVI ENGAGEMENT NEWS

Mr. and Mrs. Frank Granato of R. D. 1 announce the engagement of their daughter, Anne Marie, to Pfc. Raymond Yarvi, son of Mr. Hilma Yarvi of Sharon.

No date has been set for the wedding.

HUTCHISON REUNION AT WILMINGTON PARK

Descendants of John and Eliza Swezey Hutchison will have their annual reunion on Friday evening at 6 o'clock at New Wilmington park in the form of a basket picnic.

Woman Scientist Disclaims Idea Of Destructive Weapon

Austrian Woman Scientist Did Vital Preliminary Work On Atomic Bomb

By STEEN HELDMAN
(U.S. Staff Correspondent)

STOCKHOLM Aug. 8. — Dr. Lisa Meitner, 68-year-old Austrian woman who did vital preliminary work leading to the atomic bomb invention, today disclaimed any belief that such a destructive weapon would result.

"I didn't think my experiments would end in the atomic bomb," she told International News Service in an interview at her home in a small Swedish village.

Professor Meitner, who said that newspapermen have been calling her day and night, expressed the fear that her contribution to the discovery has been exaggerated.

However, she and Dr. Otto Hahn of Germany were credited with being first to smash uranium nucleus.

The woman, who has wide brown eyes and almost striking movements, still speaks with a Viennese accent. She still is an Austrian citizen, despite nearly 32 years in Germany.

In Berlin

Arriving in the Reich in 1908, Meitner was assistant to the famous German Professor Planck at the Institute of Theoretical Physics from 1912 to 1915. From 1917 to 1938, she was member of the physical department of the Kaiser Wilhelm Institute in Berlin.

"The Austrian scientist began her atomic research in 1930."

"We didn't think about bombs or killing weapons," Prof. Meitner assured this correspondent.

"But," she added, "I understood that leading men of the Nazi party at the time already calculated on the atomic bomb."

"Jew-baiting in Germany in 1938 forced me to leave the country even though they didn't threaten me. I escaped to Holland without difficulties—it was just like a Sunday walk."

Scientists in Holland helped the professor and the Swedish atomic expert, Prof. Sengstrand, brought her to Sweden where she has been working ever since, with the exception of the time she spent in two years in Denmark.

Exonerates Officer For Wounding Boy

PITTSBURGH Aug. 8. — INS. — Sub-Patrolman Oliver W. Mason, 41, of Pittsburgh, today described an incident which he said was a "mistake" when he was charged with wounding a 17-year-old youth who tossed a brick at him "just for fun."

Mason had Master Sergeant W. H. R. McDermott, his superior, describe the incident as a "mistake" when he was charged with wounding a 17-year-old youth who tossed a brick at him "just for fun."

World Must Find Way To Control Nuclear Energy

New Atomic Discoveries Make Control Of This Power Essential To Survival

By MICHAEL GRIFFIN
U.S. Staff Correspondent

NEW YORK, Aug. 8.—(INS)—It is one thing to destroy a Japanese city with an atomic bomb but it is quite another thing to harness the same energy to operate an automobile in peace time.

Prof. Carl Van Der Merwe, chairman of the physics department of New York university, used this comparison today to illustrate the great post-war problem created by the development of the atomic bomb.

Enormous Power

It is generally accepted that the development of the atomic bomb means that science has at last tapped nuclear energy, and "The power thereby made available is enormous."

But the bomb destroys. The problem now is to control the energy which is now being used for destruction. If we can harness that energy and keep it under control, the possibilities in this development are almost beyond comprehension.

But it will be difficult to build the harness. It will take time. I believe it can be done and that the day will come when we can control this great energy.

Could Obliterate World

"God help the world if this energy is not controlled. Mankind must hang together now and keep the peace, or the world will be obliterated."

Dr. Van Der Merwe emphasized

Famous to relieve MONTHLY
FEMALE MISERY
(Also Fine Stomachic Tonic)

Lydia E. Pinkham's Vegetable Compound is famous to relieve not only monthly pain but also accompanying nervous, dizzy, irritating feelings—when due to functional periodic disturbances. Taken regularly—it helps build up resistance against such distress. Pinkham's Compound keeps nature! Follow label directions. Try it!

Lydia E. Pinkham's VEGETABLE COMPOUND

that the development of the atomic bomb opens the door to a new epoch.

"The possibilities in mankind's use of nuclear energy are tremendous," he said. "A ridiculously small power plant, using this energy, could drive vehicles across the country, vessels across the ocean. It could operate factories; in fact, it could do all the work that now requires vast quantities of ordinary fuel and power."

"Fully developed for peacetime use this energy could revolutionize life as we know it today. It could revolutionize the automobile industry or the utility industry."

"The industrial revolution of the 18th century will seem small beside development inherent in this great scientific achievement if we find a way to control the energy."

"That control will be a difficult job but it will come in time, I believe."

Lions Club Hears Talk By Francis

Local Auto Dealer Sees Shortage Of Mechanical Equipment And Workmen For Some Time

William A. Francis, local auto dealer, gave an interesting talk to members of the New Castle Lions club at their noon luncheon meeting in The Castleton, Tuesday, which he predicted that there is going to be a scarcity of mechanical equipment for several years after the war, and that it will take a considerable length of time to train men to service the new developments which are going to come after the war is over. This will necessitate patience on the part of the American public, he stated.

Mr. Francis spoke on the subject "A new approach to mechanics."

He traced the development of the automobile from a small scale to the tremendous output attained by the assembly line, and was one of the first to advocate and develop a shop where repairs could be made to automobiles, when the necessity for such a place was shown by the ever-increasing production of these vehicles.

Adrian Fisher, concert pianist, well known local artist, was a guest of the club and gave several delightful selections.

Other guests were J. G. Thomas of New York and C. L. Sellers of Meadville. N. N. Jagusch of the Bell Telephone company and Geo. R. Gering of the U. S. Employment office here were admitted as new members of the club.

W.P.B. Promises New Household Articles Soon

Limited Quantities Of Some Civilian Goods Are To Be On Market In Fall

WASHINGTON, Aug. 8.—(INS)—American consumers received the welcome promise from W.P.B. today that limited quantities of some new household articles such as washing machines and vacuum cleaners, will be on the market by fall.

Paul M. Mitchell, director of W.P.B.'s consumer durable division, also announced the good news in the board's first item-by-item report of reconversion progress, said that more products will be available next spring and summer.

"Sewing machines, vacuum cleaners, domestic washing machines and electric irons should reach the retail market in small quantities this fall," Mitchell asserted, "and alarm clocks in fairly large numbers by that time."

Volume In 1946
"Volume production of these and many other goods of consumer interest is not expected to be attained until the spring of summer of 1946 and even then should not be sufficiently immediately to meet pent-up demands."

Mitchell reported that production of some consumer items, such as razors, hearing-aid batteries and dry-cell batteries is almost equal to consumer demand.
Reconversion is moving as fast as it can, he added, "for war production cutbacks following victory in Europe have not as yet resulted in the release of large numbers of workers or critical materials for civilian production."

Troublesome material shortages were reported in sheet steel, grain, iron castings, tin, wood, shipping containers and chemicals and explosives used for machines on war machines, and other civilian goods.

The remnants charge that huge deposits of coal dust and refuse have settled on their land making it worth less for planting and their home impossible to live in.

In addition to the \$20,000, Butterbaugh and Hoffman requested the court to restrain the mining company from further mining on their property.

PITTSBURGH'S PIGEONS MUST HAVE SECOND TEST
PITTSBURGH, Aug. 8.—(INS)—The tedious job of exterminating from pigeons for a pest-control test has to be done all over again—previous tests expatriated on their long air journey to California.

Dr. I. Hope Alexander, director of the Pittsburgh health department, said today the corks blew off the vials while they were being flown to the Hooper Foundation, University of California, for testing.

Little Theatre Of Butler Buys Campbell's Barn

BUTLER, Aug. 8.—Butler Little Theatre has a new home, the building known here as Campbell's Barn. Purchase by the Butler Little Theatre group, now five years old, was negotiated by Howard O. Low from the Jennie Campbell estate

through the trust department of the Butler Savings and Trust Company. Members of the Little Theatre will do the job redecorating and altering the building into a place where the group can present plays to the public, come for meetings and have parties.

Plans are for a stage and auditorium to seat 200 persons on the first floor, an office kitchen, library, clubroom and lounge on the second floor, with space on the third floor for stage properties and costumes, and, possibly, dressing rooms.

ATOMIC BOMB IS NO INSPIRATION FOR BABY'S NAME
PITTSBURGH, Aug. 8.—(INS)—Despite its momentous impact on the world at large, the atomic bomb proved to be a dud to the new mothers of Pittsburgh.

None of them has even attempted a play on "atomic" to discover names for their newly-born children.

Perhaps, Pittsburghers aren't scientific minded.

RESIDENT SUES PITTSBURGH FOR FALL ON SIDEWALK
PITTSBURGH, Aug. 8.—(INS)—The city of Pittsburgh today faced a suit for \$25,000 damages brought by Richard B. Duncan, Pittsburgh, for injuries allegedly sustained last December 14 when ridges of snow and ice raised him to fall on a sidewalk.

Duncan said he suffered a fracture of his right leg as well as other injuries.

Neighboring Colleges

Will Be Hostesses

College-going gals come to our Campus Center to get the low-down on up and doing fashions. After seeing hundreds of style-wise misses through four years of college, we've acquired the "know how" of smart dressing—and simplicity is the keynote. Choose your clothes in a classic mood, the kind of clothes that rate A-1 in fashion credits yet keep well within your budget. We're ready to fill your every need all the way from those important accessory details right up to your "big moment" formal.

Exquisitely tailored suits, slim skirts and beautiful all-wool sweaters in a bevy of colors to accompany you from class to class. Indispensable little wool dresses that have a capable air but are completely feminine from neck to hem. Handsome coats, casual jackets, lovely formals—but we can't begin to describe the bright array of magnificent fashions that cater to college days. Come in and see for yourself. You'll find them all gathered together for your approval in our Campus Center.

Improvements Are In Progress

Many Of Street Resurfacing
Projects Completed—
Other Contracts Are
In Progress

James Gibson, director of public improvements, today reported completion of a city and state thoroughfare improvement project which has resulted in New Castle now having splendid main thoroughfares. However, there are other improvements under way which will be beneficial to residents.

Here are the improvements completed: City improvements: resurfacing County Line street between Mulberry and Ray streets; Ray street between East Washington street and the top of Ray street hill. State improvements: resurfacing Washington street between Croton avenue and Sankey street; including public square; Moravia street between Long avenue and city line; one inch repair top; Highland avenue between E. Washington street and city line; one inch repair top.

East Washington street between Bolder and Marshall avenues; Croton avenue between East Washington and Cascade streets; North Jefferson street between Public square and Grant street.

Other Projects

City and state projects now under way: widening of State street hill. The city is installing curbs and a sidewalk (the latter on the south side) and the state will install a concrete base and asphaltic top on the widened portion.

The city will complete the sanitary sewer in Park avenue near North Mercer street this year. However, the contractor for the new storm sewer in what is known as Park avenue hollow has not commenced work but will soon.

Work is under way on the main sanitary sewer between South Cedar street, the disposal plant and thence to the river.

Director Gibson also announced that the city has employed a weed cutter to remove weeds between curbs and sidewalks and at intersections.

Street employees were removing some dirt from the south side of Croton avenue extension of New shaddock creek where the bathing pool is located. Benches will be placed there and grass planted to beautify the section next spring. Dirt now being removed is used to fill in depressions caused by recent rain storms.

Germans Sought To Secure Facts On Atomic Bomb

F.B.I. Discloses Four-Year Battle
To Prevent Nazis Gaining
Secrets In U. S.

WASHINGTON, Aug. 8.—(INS)—The F.B.I. disclosed today the details of a four-year undercover fight to keep Germany from learning the American secrets of the atomic bomb.

The attempt of German agents proved unsuccessful, due in large part to the agents themselves, who double-crossed their employers and went over to the Federal Bureau of Investigation.

Five of the key German spies, all trained at the German intelligence school at Hamburg, and sent here specifically to learn what they could about atomic experimentation were apprehended upon reaching the United States. They agreed to work instead for this government.

Turned States Evidence

They in effect turned state's evidence to escape prosecution and possible execution. They worked hand-in-hand with the FBI without the knowledge of the German ABWEHR, the Nazi intelligence.

Wireless sets were set up by the FBI and ostensibly operated by the five agents, who arrived in the country between February 8, 1940 and October 12, 1944.

"We were not only able to keep the Germans in the dark about what we were doing," it was explained, "but we were able to learn what progress the Germans were making on their atomic experiments from the queries they sent over."

"Double Agents"

The Germans apparently had no idea that their five key operatives were working as "double agents" for the United States government. As late as February, 1945, a few months before the end of the war in Europe, the Germans kept pressing for information from their agents.

So successful was the FBI in breaking up German efforts that not one sabotage attempt was made against the plants at Oak Ridge, Tenn., Pasco, Wash., and the New Mexico project where the atomic bomb was manufactured, or against numerous laboratories where experimentation was going on.

"There was no indication either," said an FBI spokesman, "that they had any inkling of the secret code name 'Manhattan District Project' which cloaked the work on atomic fusion."

As an added precaution, key scientists were constantly guarded by the FBI.

FBI records disclosed that the first of the five agents—dubbed by American agents as "Harry Sawyer," an alias—began training for the work in Hamburg as early as July 1939, several months before the outbreak of war.

President Will Award Two Medals

Two More Soldiers Back From Ger-
many Will Get Congress-
sional Medals

WASHINGTON, Aug. 8.—(INS)—A 30-year-old Chicago filling station operator and a Mexican cotton farmer from Texas were designated today to receive the congressional medal of honor for extreme heroism in action against the Germans.

Award of the nation's highest decoration will be made by President Truman to T-Sgt. Robert E. Gerstung of Chicago and S-Sgt. Marcario Garcia, 25, of Sugarland, Tex.

Sgt. Gerstung, pinned down near a Stiefried line pillbox by mortars, rifle and tank fire, held off a German attack until other members of Company H, 313 infantry, 79th division, were able to withdraw 200 yards to defensive positions. He was wounded in the leg.

Garcia, who left Mexico when he was three years old, became a citizen after his return from Europe last month.

The Mexican youth alone knocked out two German machine guns, using grenades in eliminating the weapon which had pinned down B company of the 22nd infantry, fourth division in the Herten forest area of Germany last Nov. 22.

Cannery Crop Records Reach New High In '44

HARRISBURG, Aug. 8.—Four new all-time records for state inspections of cannery crops were established in 1944 by the Bureau of Markets, State Department of Agriculture, according to D. M. James, supervising inspector.

Apples, peaches and lima beans handled in state inspections last year were such that they more than doubled the amounts passed by inspectors during the previous year. Apples inspected totaled 127,034,596 pounds compared with less than 60,000,000 in 1943. Pea inspections totaled 11,825,000 pounds compared with 5,555,000 pounds in the previous year. Inspection of lima beans for processing totaled 294,000 pounds compared with only 163,000 in 1943.

In total, pounds of tomatoes far exceeded all other fruit and vegetable inspections. A grand total of 201,134,000 pounds was more than 3,000,000 in excess of the amount handled by inspectors during the previous year.

As of July 1, 1945, indications pointed toward considerable expansion in the inspection of Pennsylvania cannery crops, particularly on peas, tomatoes and lima beans. The prospects for fruit crops, however, were not favorable due to freezing weather at blossoming time.

Uniform Rules For Motor Boating On Pymatuning Sought

HARRISBURG, Aug. 8.—W. R. Wheelock, chief of the lands, agriculture division, will meet here with the state water and power resources board tomorrow to consider adoption of uniform regulations governing use of motor boats on Pymatuning lake.

Wheelock is chief of the lands, landscaping and recreation section in the agriculture division.

W. E. Kirkpatrick, water board secretary, said the group would discuss such regulations as speeds, restricted areas and registration of boats.

"There are in effect now certain regulations in respect to boating on Pymatuning," he said, "and these will have to be discussed and reviewed and possibly modified to a certain extent."

Since the lake is situated in both Pennsylvania and Ohio territory, Kirkpatrick said the two states would try to work out uniform rules.

Use of motor boats of six horsepower or less on Pymatuning was authorized by the 1943 legislatures in both states. A similar congressional authorization, recently was signed by President Truman.

President Gets New Reports On Bomb Effects

WASHINGTON, Aug. 8.—(INS)—Secretary of War Stimson had a lengthy conference with President Truman today and gave the chief executive new reports on the devastating effect of the atomic bomb on Hiroshima.

"I gave the president some additional information on Hiroshima," Stimson said, "but I cannot say what it was."

ATOMIZER FOR JAPS
DETROIT, Aug. 8.—(INS)—The Detroit Times commented editorially today on the atom bomb.

"We're fighting the Japs with an atomizer."

Probe State's Proper Share Of Road Costs

HARRISBURG, Aug. 8.—(INS)—An investigation to determine the state's "proper share" of highway construction and maintenance costs was launched at the state capitol today by a sub-committee of the joint state government commission.

Sen. John G. Snowdon (R) is coming, chairman of the Senate highways committee, was directed to supervise the survey under a \$50,000 appropriation.

"We want to determine what part of the cost of construction restoration of the highway system the Commonwealth should bear," he stated.

Another group charged with probing alleged sharp practices by finance companies was prepared to schedule September hearings during its initial meeting also.

BOY BITTEN BY DOG

John Mrozek, 301 Chestnut street reported to police yesterday his four-year-old son received lacerations of the legs when attacked by a dog assertedly owned by Anthony Di Nucci, 511 South Ray street. The attack took place Tuesday afternoon. Mr. Di Nucci promised to pay medical fees as the result of the attack, the police reported.

Urges Sportsmen Help Harvesting

HARRISBURG, Aug. 8.—(INS)—The State Game Commission today issued a call for Pennsylvania sportsmen to aid farmers harvest vitally needed food for the fighting forces and liberated countries.

In a plea made for the third year, the commission pointed out "this year the problem is a bigger one. Grain is being left standing because in sections where food is scarce and living conditions crowded, transient farm workers will not stay and work."

"It is up to the sportsmen to see the farmers through again this harvest season," officials asserted.

Block signal systems on railways today are a modification of the early semaphore.

Atomic Studies Were Centered On Chicago's Campus

World's Greatest Scientists Worked
In Secret On Midway Of
Terming School

CHICAGO, Aug. 8.—(INS)—The University of Chicago, aided by several thousand of the world's great scientists, technicians and research workers, today was revealed as the nerve center of atomic bomb experimentation for the last two and a half years.

Paper Work Destructive
It was on the university midway that paper work, theoretical experimentation and coordination of theories took place so that the most powerful destructive force in history finally could be produced.

Other universities in various parts of the nation also contributed to the bomb's development.

Secretary of War Stimson said that research which made the bomb possible also was done at Columbia university, the University of California and Iowa State college.

But the greatest physicists, chemists and mathematicians of the nation, as well as refugee scientists from conquered countries and Germany itself, came and went on the University of Chicago campus, their movements sometimes camouflaged or cloaked in the deepest secrecy.

Einstein and Others
Among them were Dr. Albert Einstein, physicist and mathematician, who developed the theory of relativity; Dr. Rudolf Piers, German mathematician; Franz Eugene Simon, German physicist; Dr. Enrico Fermi, Italian physicist; 1938 Nobel prize winner and member of the Columbia university faculty; and Dr. Niels Bohr, Danish scientist.

Dr. Vannevar Bush, head of the office of scientific research and development, was understood to have participated in the work on the midway.

Nobel Prize Winners
Others included Dr. Ernest Orlando Lawrence of the University of California, who developed the cyclotron, the atom-smashing machine, and won the Nobel prize in 1939.

Four men presumably were on the ground floor of the work at midway. One was Dr. Arthur H. Compton, Nobel prize winner and head of the physics department until he was named chancellor of Washington university in St. Louis July 1.

Another was Prof. Paul J. Demarest, who discovered the substance known as U-235 which is derived from uranium.

Prof. William H. Zeharisen, acting head of the University of Chicago physics department, and Dr. Robert H. Hutchins, the chancellor, also were acquainted with the progress of the work.

Others included Dr. Ernest Orlando Lawrence of the University of California, who developed the cyclotron, the atom-smashing machine, and won the Nobel prize in 1939.

THE PARENT PROBLEM

(Continued From Page Four)

quite lest he should learn early to "juggle accounts." An allowance plan makes for each necessary group of expenditures needed for the period (say a week) before it is spent.

As the child grows older, he will have more regular, necessary expenditures. Gradually, too, he might include in this allowance an amount for certain items of clothing and, eventually, have a complete clothing budget to cover six months (when the allowance period could be six months, say in senior high school). Also as the child grows older he will gradually need more "free money" in the allowance. However, most parents increase this item far too rapidly.

When the child earns money, his earnings also should be budgeted. Let any increase go in the direction of general savings or savings toward the purchase of some useful things or services, not toward added luxuries.

Sgt. Sovesky Has Completed Over 5 Years In Army

Sgt. Chester Sovesky recently received an honorable discharge at the separation center, Jefferson barracks, Mo., under the point system.

By coincidence, he enlisted on his birthday, January 30, 1940, and has had nearly five and a half years service with the U. S. Army Medical Corps, including 2½ years overseas. He served for two years in Puerto Rico as a laboratory technician and nearly six months on hospital ships in the ETO area as a medical technician.

T-4 Sovesky was awarded the Bronze Star for the western European campaign and the Good Conduct Medal.

Chester Sovesky is the son of Mr. and Mrs. Stanley Sovesky of R. D. 4. He is looking forward to the fulfillment of his youngest brother, Flight Officer Thomas V. Sovesky, whom he hasn't seen for 4½ years.

E. W. Sovesky, somewhere in the Philippines, is another brother whom he hasn't seen for an equal length of time.

Okinawa Troops Believe War's End Hastened By Bomb

OKINAWA, Aug. 8.—(INS)—At least 150,000 Japanese were estimated today to have been killed Monday in the atomic bombing of the Japanese city of Hiroshima. This estimate was made by Lt. Col. Ross Herring, Brockington, Tex., and others at several women after viewing new reconnaissance photographs taken of the devastated city by Okinawa-based planes.

The latest reconnaissance photographs failed to show any buildings or walls standing anywhere in Hiroshima.

The southern Honshu city was leveled flat.

The scene of devastation created a great furor among troops who now believe the end of the war is in sight.

They can't imagine that even the Japanese will be willing to see their entire nation wiped out by atomic bombs.

The only question in the minds of soldiers on Okinawa is:

"How many atomic bombs have we got ready?"

Hiccough Champion Begins Her Third Protracted Siege

MEKEESPORT, Pa., Aug. 8.—(INS)—Miss America Laureate, 36-year-old McKeeport, started her third siege of Hiccough today, an 11-day fast for doctor and nurse for the "undisciplined" Hiccough champion of the Pittsburgh district.

Twice before Miss Laureate has been attacked by Hiccough—the first time in 1941, shortly after Pearl Harbor and the second time in January of 1943. The first attack lasted 21 days and the second 15 days.

Hundreds of "cures" have been sent to Miss Laureate but none so far has worked.

Big Assortment Of Articles And Things Lost Here

Lost Column On Tuesday Sets
Some Kind Of Record Locally In Relief

New Castle residents have had a difficult time holding on to their belongings this week, according to the size and variety of the Lost and Found column of The News on Tuesday evening.

In fact, it wasn't even a Lost and Found column—it was strictly "Lost." Fifteen separate articles, including gold naval air wings, a Filipino coin bracelet and, of course, a ration book, were in the list.

"Lost or strayed," a gray angora cat named Tommy is missing from home; other animals in the column were a black, white and tan female beagle hound and a brown and white dog, port shepherd and part police, who answers to "Trickie."

Money is always an item, and in Tuesday's column it was five items—a small black change purse with \$40 in it, an allotment check for a serviceman's wife, a savings account book with \$41 in cash, a brown billfold with a license, papers and money; and another brown billfold, this one with gas stamps, too.

Completing the list were a set of two keys with a small license tag, a bracelet with rhinestone settings, a gold, closed-end watch, and a pair of girl's blue pajamas. Monday must have been a record day for setting rid of one's possessions.

Businesses Which Use Tins Must Now Save All Containers

HARRISBURG, Aug. 8.—(INS)—Hotels, food processors and industries using tin cans were notified today by the War Production Board's state salvage committee they must save tin containers for reclamation.

"A new War Production Board order makes it mandatory on manufacturers, food processors and others who open tin cans for the purpose of using or repurposing their contents, or who discard cans because the cans or their contents were defective, to salvage those cans," said Secretary C. S. Baker.

Violators are subject to fines or imprisonment and the loss of property and license, he emphasized. Cans must be flattened and delivered to designated plants or salvage committees, he added.

Local salvage committees have been directed to canvass all industries using tin cans.

So critical is the tin situation today that WPB has been forced to impose its regulations on the use of the several thousand tin can plants.

Collectors dropped from 17,000 in 1943 to 11,000 in 1944 and 10,000 in 1945, it was reported.

Should Banish Wars Forever

WASHINGTON, Aug. 8.—(INS)—The CIO News said editorially that development of the atomic bomb now makes it mandatory that the nations of the world join together in peace if mankind is to survive on this planet.

The mighty man-made atomic earthquake that this week spread over devastation in Japan's city of Hiroshima has implications for more terrible and also hopeful than quick extermination of Japanese war-makers and ends, and successful conclusion of the war.

"Release of atomic energy may send others besides the Japanese to join their ancestors under the people of the world take firm steps to banish war forever."

"Now more than ever it is vitally necessary for the people of the world to demand that their leaders support without equivocation every step toward world cooperation and world peace that the United Nations ought to take."

During the French Revolution the statue of the old king of France at Notre Dame cathedral was thrown in 1793 by a mob of revolutionaries in the name of the Republic to the people of the world.

Nation Mourns As Major Dick Bong Is Laid To Rest

Military Funeral At Superior, Wis., Today For Late Pacific Flying Ace

SUPERIOR, Wis., Aug. 8.—(INS)—Flags flew at half staff today for the funeral of Maj. Richard I. Bong, America's ace of aces, in the same church in which he was married only last February 10.

His body, accompanied by his bride, the former Marjorie Ann Votawahl of Superior, was flown in an Army C-54 transport plane from California where he met his death in the explosion of a new jet plane he was testing.

The sorrow of the nation at the tragic death of the likeable, snub-nosed youth whom the Army took out of combat after he had shot down 40 Jap planes so he "won't get killed" was felt perhaps most deeply in his home community.

In Superior, where he took his bride, and in Poplar, Wis., 29 miles to the east, his home town, business places were closed for the day and residents for miles around thronged to the funeral rites at the

Concordia Lutheran church, set for 2 p. m.

National tribute also was paid to the memory of the popular hero. An officer of the Eighth Army Air Force command in Washington, D. C., telephoned that a 30-piece band and a military escort of 16 soldiers were on their way. High War department officials were to attend, the message said.

M. M. 1-C R. L. Booth Gets Medical Release

After serving for five years in the navy, M. M. 1-c Richard L. Booth, Jr., a former resident of North Mercer street, this city, now living in Willard, O., has been given a medical discharge. M. M. Booth, who enlisted, was a member of the crew of the Tennessee at Pearl Harbor, when the Japs struck there. Since that time he has been serving on destroyers.

He is the son of Mr. and Mrs. Richard L. Booth, Sr. R. L. Booth, Sr., was general foreman of the B. & O. R. R., when the family lived here.

M. M. Booth, who visited Tuesday with Mr. and Mrs. James L. Cole, 136 East Sheridan avenue, plans to enter a school of combustion engineering at Cleveland, Ohio.

BRITISH CROWD HAILS MONTY

Britain's Field Marshal Sir Bernard L. Montgomery receives a rousing ovation on his arrival in Chiswick, England, from townspeople who turned out to greet him. Bobbies are shown keeping the enthusiastic welcomers in check as Montgomery walked to ceremonies at which he was given the freedom of Chiswick and Brentford.

With Atomic Power, Car's Motor Will Be Size Of Man's Fist

NEWARK, O., Aug. 8.—(INS)—Automotive Expert William B. Stout said today harnessing of the atom will eventually reduce automobile motors to the size of a man's fist.

But it will take many years to develop such an engine, the Graham-Paige Motor Corporation, research engineer and adding "I expect we are working on it as long as I live."

Compensation Suits Are Threatened

ALTOONA, Pa., Aug. 8.—(INS)—The CIO-United Railroad Workers of America announced today it had notified the Pennsylvania railroad that compensation suits estimated at over \$1,000,000 would be filed unless the company agreed to settle.

National Director A. B. Martin said 999 compensation claims have been referred to the union by employees in 14 states.

"A fairly large number of these crippled and disabled employees are women who were coach cleaners, boiler helpers, machinist helpers and other shop employees," Martin said.

The URRWA asked the Pennsylvania railroad for full back compensation from date of injury to such time as the future as prescribed by law; payment of all hospital and doctor bills and full wages from the time of injury where wages are involved in any of these cases.

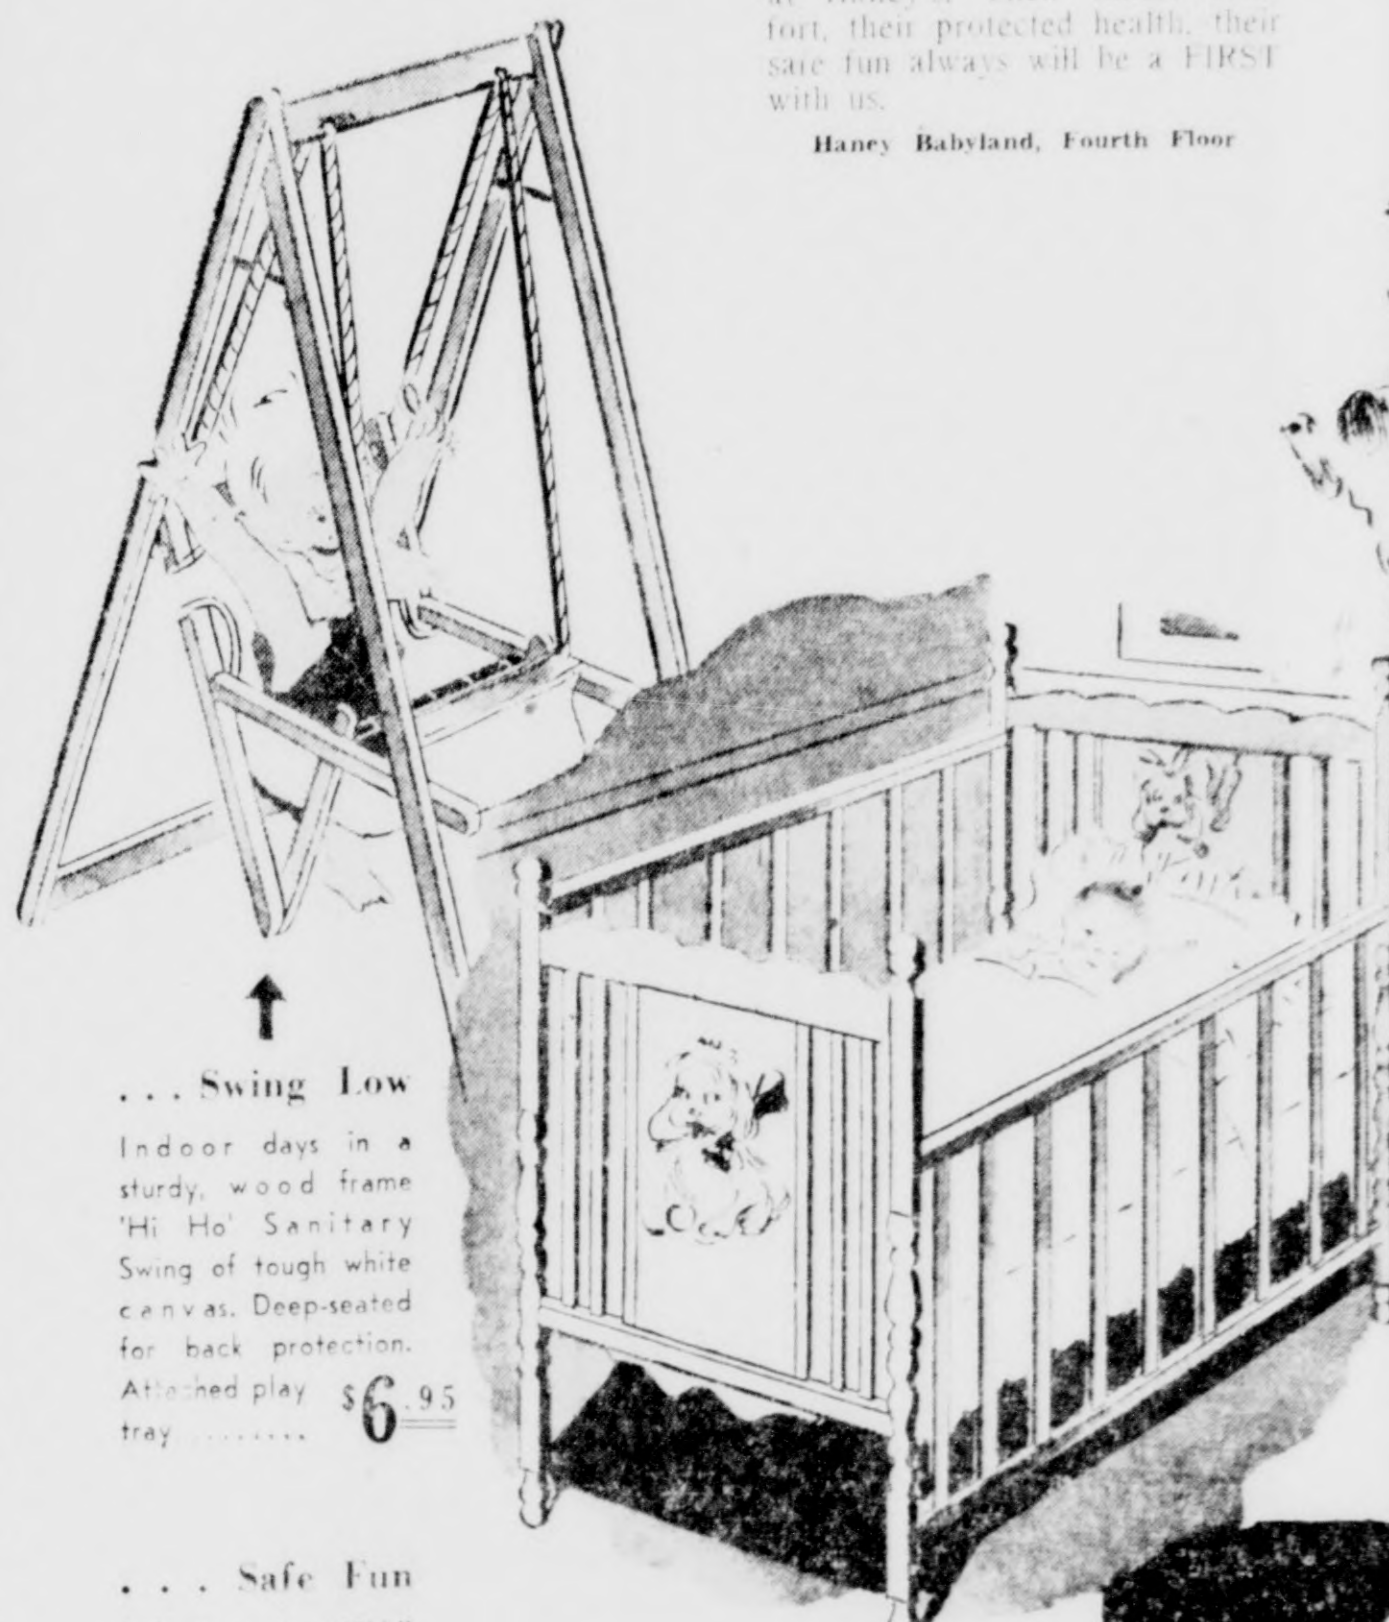

A delicious repast was enjoyed, and the after hours were spent in games and music.

Master Builder James Best has announced a meeting of the order for this evening at 7:30 o'clock in the Cathedral.

Every year grain boats carry about 55,000,000 bushels of wheat down the Great Lakes from Duluth, Minn., and Superior, Wis. Certain fungus domesticated by ants is extinct in its wild state, just like the grains domesticated by man.

Battleship Iowa Is 'First Lady' Of U. S. Third Fleet

Has Travelled 150,000 Miles Chasing Japs From Marshall Islands To Japan's Shores

WASHINGTON, Aug. 8.—(INS)—The chief of the navy's bureau of ships described the mighty 45,000-ton battleship Iowa today as "first lady of the third fleet" because the hard-hitting dreadnaught has travelled 150,000 miles chasing the Japs from the Marshall islands to the shores of Japan.

At the time, it was disclosed that the battleship—one of the world's largest—carried the late President Roosevelt to Casablanca for his conference with Prime Minister Churchill following her commissioning and shakedown early in 1943.

"The Iowa has earned her title of first lady of the third fleet through the record she has established since joining the Pacific fleet early in 1944," Vice Admiral E. L. Cochrane, chief of the bureau of ships, said.

Although it had been disclosed that the Iowa recently participated in the shelling of the Jap homeland, the navy for the first time gave details of the famous vessel's itinerary after keeping her on the "secret list" for many months. She suffered damage only once from enemy fire.

According to Cochrane, the Iowa "has already done much toward repaying her initial cost of \$110,000,000." He added that the Iowa has "proven that the mighty new type battleships have a very definite and important role to play in the modern navy."

The Iowa was the first of the 45,000-ton class, which also includes the New Jersey, Wisconsin and Missouri. She is 887 feet long and 108 feet of beam.

Only damage suffered by the Iowa was at Mille atoll in the Marshalls on March 18, 1944, when Japanese shore batteries scored two hits, but caused only minor damage and failed to silence her 16-inch guns. There were no personnel casualties in that action.

The Iowa was considered a match for any ship in the Jap navy but she has seen little surface action because of the tactics used by the enemy. Most of her work has centered on blasting enemy shore positions, especially coastal batteries.

Among the landings supported by the Iowa and other vessels were those in the Marshalls, the Marianas and the Philippines. She also operated with the fast carrier task force during strikes against Okinawa, Formosa, Luzon and the Jap homeland.

Once during the Philippine operation the Iowa at night contacted a Jap cruiser or large destroyer in the San Bernardino straits and her guns set the enemy vessel on fire. Light units closed in and the Jap ship was sunk. Fifty Jap survivors were found among the debris.

MADAME LAVAL ALO ACCUSED OF WORK WITH NAZIS

LONDON, Aug. 8.—(INS)—Former Laval wife of the French Vichy leader, was said today to have been formally charged with intelligence with the enemy.

Reuters news agency, in a dispatch from Paris, said that the charge was lodged by Investigating Magistrate Morchat.

CHIEF ON VACATION

Fire Chief James E. Thomas is enjoying his annual vacation. During his absence First Assistant Chief George W. Harper will be in charge with Second Assistant Chief William Hawk aiding him.

Poor Digestion? Headachy? Sour or Upset? Tired-Listless?

Do you feel headachy and upset due to poorly digested food? To feel cheerful and happy again your food must be digested properly.

Each day, Nature must produce about two pints of a vital digestive juice to help digest your food. If Nature fails, your food may remain undigested—leaving you headachy and irritable.

Therefore, you must increase the flow of this digestive juice. Carter's Little Liver Pills increase this flow naturally, often in as little as 30 minutes. And, you're on the road to feeling better.

Don't depend on artificial aids to counteract indigestion—when Carter's Little Liver Pills and digestion-aiding Nature's own order. Take Carter's Little Liver Pills as directed. Get them at any drugstore. Only 25¢.

Mercer Corporal Used Cigarettes To Get Pictures

Corporal John Ellis, Back Home With Tales, Picture Taking In German Prison Camp

MERCER, Pa. Aug. 8.—(INS)—Cpl. John Ellis, for two years a prisoner of the Germans kept asking for cigarettes from his family in Mercer.

They knew he didn't smoke but complied with his requests and sent cartons of cigarettes to him through the Red Cross at every opportunity.

Ellis' wife, Evelyn, and his daughters, Mrs. and Mrs. C. A. Ellis, today why he wanted them.

He is back home with a prized collection of pictures which he took with a camera, traded from his Nazi guards for 25 packages of American cigarettes. The Germans even took 15 rods of exposed film, had them processed and mailed to his home, Ellis said.

"I never worked a camera when I was home," Ellis said in Mercer, "but I decided to try my hand. I had some six other American prisoners act as spotters to warn me of the approach of German soldiers."

Ellis said he used many methods to hide his camera from the inspecting eyes of German officers. Usually, however, he hid it in a high corner in the cement floor under his cot.

Most of his pictures were taken when his guards were eating, but sometimes he bribed them to make shots for him.

Ellis was captured in Tunisia in 1943. He was first imprisoned at the big Stalag 3B camp at Furstenberg, where he got the camera. When he was transferred to Luebenwald, he hid the camera in his clothing and got by because he was not searched.

The "cigarettes" again bought off a guard who supplied him with film. Ellis said he was now exchanging pictures with six other prisoners who traded for cameras.

"Taking pictures gave me something to do during those 29 months," Ellis said.

Higgins Sees Early End To Jap War

CHICAGO, Aug. 8.—(INS)—Andrew Jackson Higgins, New Orleans shipbuilder, today saw the end of the war with Japan coming soon, possibly within 90 days, as a result of the destruction wrought by the atomic bomb.

Higgins in Chicago to dedicate a room at the Roosevelt museum of science and industry, revealed that his 1,400-acre plant in New Orleans had been devoted to making component parts for the atomic bomb.

He said that the plant was built by the government at a cost of 26 million dollars. About 2,500 persons were employed on the project, he said today.

"There is no question in my mind but that the war with Japan will be over in 90 days,"

Hervy Allen, who spent five years writing "Anthony Adverse" was twice invalided in World War I when he was a first lieutenant in the infantry.

Floor Sample CLEARANCE of Quality Furniture

Scores of worthwhile items up to 1/2 off ceiling prices, just when you need them most! Sgt. C. S. McFarland Indict Woman In Is Reported Killed Death Of Infant

Local Soldier, Previously Reported
As Missing In Action, Was
Killed, Message States

Sgt. Charles S. McFarland, son of Sanford and May McFarland of 10 1/2 South Front street, who had previously been reported as missing in action on September 20, 1944, is now revealed by the War Department to have been killed in action on that date in France.

The sad message informing his parents of his fate was received recently.

Sergeant McFarland, who entered service in February, 1942, was serving with the 48th Armored Infantry Battalion when he met his death.

The letter stated that the Purple Heart has been awarded in his name posthumously and that a letter will be received by the parents from his commanding officer and the chaplain of his unit, giving further details as to how he met his death.

Sergeant McFarland was born in New Castle on April 26, 1915, and graduated from New Castle high school.

It is said that circus people speak a language that is all their own. People who enjoy the free sights out on the lot are called lot-fleas. Elephants are referred to as bulls, zebras as convicts, monkeys as old folk, ostriches as big turkeys, camels as humps, hippos as hogs and hyenas as gravediggers.

Try The News Want Ads For Results

GREENSBURG, Pa., Aug. 8.—(INS)—A 21-year-old wife of an overseas soldier was under indictment for murder today in the strangulation death of her newly-born baby last May 21.

State police testified Mrs. Emma Fabry, of West Leechburg, Pa., allegedly admitted burying the infant in a manure pile. They said the baby was born between the time Mrs. Fabry was examined by a physician at her parents' home and her removal to a hospital several hours later.

The infant was found in the manure pile and taken to the Tarentum Valley hospital where it lived about 12 hours. Death was attributed to strangulation and exposure.

The grand jury also indicted Tullio Venturini, of West Leechburg, alleged father of the child, on an adultery charge.

**GUEST STEALS;
THEN STABS HOST.
VICTIM ACCUSES**

PITTSBURGH, Aug. 8.—(INS)—Police today held Robert Teed, 64, Pittsburgh, in connection with the stabbing of Arthur Conrad, 46, Pittsburgh.

According to officials, Conrad is alleged to have been a guest at Teed's room. After he left, Teed reported he missed an alarm clock and some canned goods. Police said Teed pursued Conrad and overtook him on the street.

Hospital attaches report Conrad is suffering from a stab wound in his chest.

LINEUP OF 'LONG TOMS' FOR JAPAN D-DAY

Long line of 155-MM "Long Toms", their nozzles presenting an ominous threat, are shown massed at a Philippine base on the outskirts of Manila, ready to play their part in the coming invasion of Japan. The Philippines, and particularly Manila with its important harbor, are serving the same role in the Pacific that England played prior to the invasion on the Normandy coast of France.

Fireman's Second Wife Dies In Fire Just As Sister Did

PHILADELPHIA, Aug. 8.—(INS)—The wife of an acting fire captain died today when fire raged through her south Philadelphia home.

Three of her children were injured when they jumped from a second story window.

The dead woman was Mrs. Theresa Colonna, 52. The injured children were Stella, 29; James, 21; and Gerald, 19, a sailor.

They told police their mother refused to jump with them. Her husband, Vito, ran to a fire box to turn in an alarm and was unable to enter the blazing home when he returned. The flames were believed to have started in the kitchen.

Colonna's first wife, a sister of his second, died 25 years ago when fire destroyed their home.

**Believe Auto Of
Slain Erie Man
Found At Canton**

CANTON, O., Aug. 8.—(INS)—Stark county sheriff deputies reported today that they had found an automobile believed to have been owned by Joseph Campbell, slain Erie, Pa., industrialist.

The car was found on a dirt road one mile south of Canton, police said.

A spokesman added that the license plates on the car had been changed, but that the numbers on the motor showed the automobile to be Campbell's.

**ATTENDS REUNION
OF ENGINEERS UNIT**

Harry Frazer of the Y. M. C. A. was returned from Coshocton, O., where he attended the annual reunion of the 207th engineers of World War I.

This famous outfit is credited with building the first bridge over the Rhine river, and during the day, taking place during the day of the army of occupation, following the close of World War I, Count Commissioner Karl Rohrer and Earl J. Soxer are also veterans of this outfit, but were unable to attend the reunion this year.

Give Your Feet An Ice-Mint Treat

Get Happy, Cooling Relief For
Burning Callouses—Put Spring in Your Step

MILLBURN

The Ladies' Friendship club will hold its August meeting at the hall Thursday afternoon, Aug. 16.

The primary department of White Chapel held their picnic at the home of Mrs. J. R. Patterson Friday.

There were 32 present.

Mr. and Mrs. Dickson Stewart entertained at 500 Saturday evening.

There were three tables in play, and high score went to Mr. and Mrs. Paul Woods. Refreshments were served by the hostess.

Mrs. S. J. Drake and her house guests, Mrs. Dean Henry and children, of North Caldwell, N. J., and Mrs. John Woods, attended the annual picnic of the missionary society of White Chapel church, which was held at New Wilmington Park last week.

Mr. and Mrs. George Davis of New Castle called on Mr. and Mrs. C. Oakes Sunday evening.

Mr. and Mrs. Dean Henry and children, of North Caldwell, N. J., are visiting Mrs. Henry's parents, Mr. and Mrs. S. J. Drake.

Colleagues in the home of Mrs. Ed Ramsey recently were Mr. and Mrs. Robert Neal and family, of Jackson Center, Margaret Ann Davis, Mrs. Frances Jordan, LeRoy Jordan, of Mercer, Mrs. Thomas Campbell of Grove City and Miss Hillman of Sandy Lake.

Edna Litzberg of Volant was a week-end guest of her aunt, Mrs. B. C. Oakes. Other callers in the Oakes home were Mrs. Mary Williams and Miss Philip Jones, of Sharon and Robert Oakes of Jackson Center.

Miss Myrtle Anderson left Tuesday to resume her work in the Oakdale vocational school at Oakdale, Ky.

Miss Anderson and Mr. and Mrs. L. B. Anderson and Mrs. Nancy Hillman were Sunday dinner guests of Mr. and Mrs. Elmer Anderson.

Later in the day Mr. and Mrs. George Caldwell and children and Mr. and Mrs. Alfred Stump of Mercer and Mr. and Mrs. Clyde Bauer and family of Elwood City, called in the Anderson home.

Miss Constance Hume of Pittsburgh spent the week-end at home. Louis Haseley of New Wilmington was a caller in the Hume home.

Mrs. L. E. Stewart spent several days with relatives in Monaca, Pa.

John Woods spent several days at Hershler, Pa. in the interests of the Black Angus cattle sale.

Mrs. Esma Minick of Mercer is visiting former neighbors and friends in the vicinity of Leesport Station.

Mr. and Mrs. R. E. Anderson and daughter Sally of Mercer and Joan and Peggy Woods were recent guests of Mr. and Mrs. J. H. Armstrong.

Stephen Lukacs and Mrs. J. P. Hart attended the quarterly meeting of Pomona Grange Saturday afternoon.

Mrs. Hiram Drake and children of Mercer were Sunday dinner guests of Mr. and Mrs. S. O. Drake.

Mrs. Harry Ficks, Mrs. Clayton Lynn and Mrs. Scott Winkler of Brownsville, visited Mrs. Ficks' brother, George Masters, and family Sunday.

They were accompanied home by Geraldine Masters, who is on vacation.

Heleen Lukacs, who submitted to a tonsil operation at Mercer hospital Monday morning of last week was discharged Wednesday.

The young people of the Grange met with the lecturer, Mrs. Ruth Hume, for a play practice Monday evening.

MAY BE SEPARATED TRIP

BOSTON, Aug. 8.—(INS)—More than 250 European war veterans arrived today aboard the S.S. Esplanade, asking these questions:

"What's the latest on the atom bomb? Will it really wipe out Japan? Does it mean we won't have to go to the Pacific?"

More Deferments For Men Under 30 May Be Cancelled

WASHINGTON, Aug. 8.—(INS)—Men under thirty years of age in essential industry were faced today with loss of draft deferments unless they army and navy slackers demands for 100,000 recruits a month.

This situation was emphasized in a report by the selective service system to the House military affairs committee, discussing the current problems of the draft in the light of present army requirements, which have met with severe congressional criticism.

The selective service system, in order to meet the calls remaining unmet after incurring those reaching 18 years of age has no other choice but to terminate the deferments and process for induction many of the limited number of men remaining deferred in classes 2-A, 2-B and 2-C, selective service stated.

The only exceptions to the threatened tightening of deferments, the agency said, would be such vital industries as coal mining, railroading and ship repair yards.

The report pointed out that those now classified as 1-A would soon be exhausted at the prevailing rate of approximately 100,000 inductions a month.

**Mercer To Enforce
Traffic Regulations**

MERCER, Aug. 8.—Mercer's traffic problem, which has been a nightmare to the borough council for years, and which was stated by councilmen at last month's meeting of that body had increased 10 percent over that of last year. It caused them to decide upon drastic enforcement of the dormant traffic ordinance and instructed the police force to enforce the regulations.

Borough Solicitor L. H. Rickard was instructed to write to the Allegheny County Automobile Association and inform them that in the future the borough authorities would strictly enforce the traffic regulations.

**WESTINGHOUSE
OFFICIAL NOW
BANK TRUSTEE**

PITTSBURGH, Aug. 8.—(INS)—Gwiliam A. Price, vice president and director of the Westinghouse Electric Corporation, today was elected a member of the board of trustees of Central Hanover Bank and Trust Company.

Prior to joining the Westinghouse organization in 1943 Price was president of the Peoples Pittsburgh Trust Company. He also holds directorships in the Peoples-Pittsburgh Trust, Pittsburgh Steel, Blue-Knox, South Penn Oil and National Union Fire Insurance.

—THOUSANDS EVERY DAY

Most of the time you pick up the telephone and your Long Distance call goes right through. That's the way we try to have it, even with a war on.

But sometimes there's an extra rush and some of the thousands of Long Distance calls get concentrated on certain circuits.

Then the operator will help to keep things moving by saying—"Please limit your call to 5 minutes."

THE BELL TELEPHONE COMPANY OF PENNSYLVANIA

Declares U. S. Should Retain Bomb Secret

WASHINGTON, Aug. 8.—(INS)—Sen. Wiley (R-Wis.) today declared that the United States should not at this time give the secret of the atomic bomb to other nations.

Too often in the past, our country has done just that in the field of military and industrial weapons in which it has pioneered, said Wiley.

The discovery of the bomb, he said, should be followed by creation of a national research laboratory to make further experiments in science.

Joseph S. Cowan To Be Buried Here

J. S. Cowan, who died suddenly of a heart attack in Gary, Ind., Tuesday morning, will be buried in Greenwood cemetery, New Castle, with the services being conducted by Rev. Roy McKnight at 10 o'clock Friday morning.

Mr. Cowan, the nephew of Mrs. S. J. Rhodes of 1262 Highland avenue, was formerly employed in the office of U. S. Steel in New Castle, but has lived in Gary for the past 30 years.

Born in Parkers' Landing, on August 29, 1891, he was the son of Mr. and Mrs. C. M. Cowan. His father, Richard Lusk Cowan, was born and reared in New Castle, where his father was born in Sanary, Pa.

Funeral services will be held in Gary on Thursday evening after which the body will be sent to the Fred C. Wolford funeral home, 215 East North street, New Castle, where the body will be commuted Friday morning at 10 o'clock at the grave.

Atomic Bomb Rays Lurk For Seventy Years

NEW YORK, Aug. 8.—(INS)—Death-dealing rays will lurk in Hiroshima for 70 years.

The Japanese city, devastated by America's atomic bomb, will be a death trap for Japanese rescue workers unless they are thoroughly shielded against secondary radiation.

These warnings were made today in an exclusive statement to International News Service by Dr. Harold Jacobson, 35-year-old physicist who worked for 12 years on the "Manhattan project" as the atomic bomb development was known.

The terrific force of the explosion irradiates the air and the ground. In explained, "Investigation will become infected with secondary radiation which breaks up the red corpuscles in the blood."

This prevents the body from assimilating oxygen. Such areas that have been exposed will die in the same way victims of leukemia die.

Vaporizes All in Path
Dr. Jacobson said that the force of the atomic bomb is so great that it actually vaporizes all matter in its path. Trees and stores and the steel in buildings turn into gas and explode. This means that the entire area will be dead.

Laboratory tests have shown, he said, that the rays will not be fully dissipated for 70 years. Furthermore, rain falling on the area will pick up the rays and carry them down to the rivers and the sea. All life in these waters will perish.

Dr. Jacobson cited these facts to illustrate the awesome force of the explosion, but he emphasized that there is no danger in this country in manufacturing the bomb. Every process is completely under control, he said.

Dr. Jacobson said that the energy of the atomic bomb can be used to heat a city and provide all the necessary power. A pound of U-235 immersed in water would produce a super-heated steam, he explained.

But such a power plant would have to be built in a remote area and thoroughly insulated with sheets of lead and paraffin.

The energy could also be used to run an automobile, he asserted. Enough U-235 to cover the head of a pin would do the trick.

"But an insulator to protect the occupants of such an automobile has not yet been developed," he said. "The great problem now is to find the insulator."

NEW CASTLE WAC TO WED OVERSEAS

Mrs. C. C. Porter of New Castle, Pa., announces the engagement of her daughter, Cpl. Lois G. Porter, to Cpl. George C. Rinehart, son of Mr. and Mrs. George Rinehart of Addison, Michigan.

The bride-elect plans an early fall wedding in Warrington, England, where she and her fiancé are serving. Overseas 15 months, Cpl. Porter met Cpl. Rinehart at the air base where they both are stationed.

Lawrence County Farm And Home News

By Extension Representatives, LEWIS C. DAYTON, Agriculture;
MISS MARY ELLEN McCLAIN, Home Economics

TREES PROVIDE THREE-WAY BENEFITS

Forest tree planting pays dividends in three ways, in the opinion of R. D. Walter of Mahoning township. They provide a cash income from the sale of Christmas trees, a potential supply of timber for farm use or for sale, and a continual source of enjoyment for those who can watch them grow.

Mr. Walter made his first planting about 22 years ago and has made frequent plantings since that time. On the area first planted, some of the larch trees have grown over 30 feet in height. Other varieties have also made substantial growth.

By planting mixtures of evergreen trees on part of his farm not suitable for cultivation, Mr. Walter has obtained income and satisfaction from land which otherwise would be of little value. Many Lawrence county farms have similar areas which can be put to the same use with profit to the owner.

MINERAL OIL CONTROLS WORM IN SWEET CORN

Application of light mineral oil can control earworm in sweet corn. Where fresh corn silks can be found, this insect will lay eggs in them in preference to anything else, so it is important to provide protection to the corn from this time on, if damage is to be kept at a minimum.

The simplest treatment is the application of the light mineral oil into the tips of the ears. This can be accomplished by use of an oilcan with a spout having a small tip. Or a glass medicine dropper can be used for small plantings.

For best results, the oil should be applied four days after silking, in order to permit the corn a chance to pollinate first. Only a quarter-teaspoon of oil should be applied to the tip of each ear. Too much oil will cause the corn to discolor. Oil should be applied about the time the silk is beginning to turn brown.

Because not all ears will be in proper condition for treatment at the same time, two or three times may be necessary to give complete protection against attacks of the corn earworm.

CCP AND RULER ARE SOAP SAVERS

A measuring cup and a ruler kept near the washing machine may help in saving soap and also in doing an efficient washing job. A suds about two inches thick has proved best for washing clothes clean.

Too much soap is not only wasteful but does not do the best washing job. Too little soap does not get clothes clean.

A little experience will show just what measure of soap is needed to give a 2-inch suds. Try a half cup of soap first, and then add until exactly the right measure is found. It is easier to add soap than to try to remove an excess. Just how much a person needs depends on the size of the machine, the water and the kind of soap used—whether flakes, chips, powder or jelly.

Measuring the water and the load

of clothes is also important. Fill the tub with just enough water to reach the water-line indicated inside the machine after the clothes are in. Too much water may strain the motor and run over into the sewer and oil case. Too little will not get clothes clean. Put in only the weight of clothes or number of pieces advised by the directions that came with the machine. Too heavy a load will not wash well and may overburden the motor.

Measuring days in laundering as it does in cooking. Yet many a housewife who takes the utmost care in measuring ingredients when she cooks uses slapdash methods in washing, and is especially careless about dumping in soap.

CONTROL FALL WEBWORM NOW

With the first nests of the fall webworm appearing, now is the time to start control. The webworm, which feeds on many kinds of trees and shrubs, resembles the tent caterpillar in some respects, but feeds much later in the year. Where the nests can be reached, the webworm can be controlled by destroying the nests. On large trees, a spray of arsenate of lead will give control.

The fall webworms were very destructive in 1944, and probably will continue their activities this year unless control is started early.

ELECTRIC LIGHTS HELP AVERT SUMMER EGG SLUMP

Late summer slumps in egg production can be averted or lessened by the use of artificial lights, good housing and ventilation, and maintaining feed consumption in the laying flock. August 15 is the date when many poultrymen begin turning on the electric lights in their laying houses.

Late summer eggs are among the year's higher-priced eggs, and large eggs command a greater spread in price over smaller eggs as the supply becomes less. Pellets or wet mashes, and often both, are used to stimulate the appetite of the layers and increase the total daily feed intake. Ample feeder space also promotes greater feed consumption.

In using artificial lamps in the poultry houses, most poultrymen operate the lights so the equivalent of 12 hours of daylight is provided.

CAN PEACHES WITHOUT SUGAR

The amount of peaches you can this year need not depend on your sugar allowance, for peaches may be canned satisfactorily with little or no sugar. One bushel of peaches will yield 18 to 24 quarts.

Choose ripe, fresh, firm fruit and don't use any decayed spots. Wash and peel peaches, handling gently. To peel peaches easily, place a few at a time in a wire basket or cheesecloth, dip in boiling water for a minute, then dip quickly into cold water. The skin will slip off easily. Cut peaches in half or slice them, removing pits.

To can without sugar, cook fruit in its own juice until heated through but not soft. If fruit is not juicy, add just enough water to keep it from sticking to the pan. Pack the hot peaches in clean jars, leaving a half-inch headspace. Press down until peaches are covered with juice, then drive out air by running a silver knife around edge of jar.

Sugar is not needed to keep canned peaches from spoiling. When canning with sugar, slice peeled peaches directly into clean jars, leaving a half-inch headspace. Press down until peaches are covered with juice, then drive out air by running a silver knife around edge of jar.

Work out air bubbles by running a silver knife down side of jar. Wipe jar rim with a clean, damp cloth, adjust lids and seal according to the manufacturer's directions. Process pint jars 20 minutes and quart jars 25 minutes in the boiling water bath.

When processing time is up, take out jars, finish seal where necessary, and set jars to cool, right side up, and away from drafts. When cold, store jars in a cool, dark, dry place.

GOES TO WARSAW

STATE COLLEGE, Aug. 3.—(INS)—Clarence S. Anderson, professor of agricultural education at Pennsylvania State College, has been granted a leave to go to Warsaw, Poland, on an official mission for the United Nations relief and rehabilitation administration.

He will be one of nine delegates commissioned to establish the present UNRRA mission in Poland and to ascertain Polish service needs in the fields of health, displaced persons, welfare and agricultural and industrial rehabilitation.

The Volga is the longest river in Europe.

WE WAITED a long, long time to see a newspaper headline saying: "Aluminum released for civilian demands."

We waited for that day because we know how much women miss new aluminum cooking utensils, aluminum-wrapped food products, and new light-weight household appliances of aluminum. And, now that Alcoa Aluminum has been released for these things, and you may not yet be able to find your favorite line of aluminum products in the stores, we believe that you would like to know you will get them:

1. Just as soon as workers are released from war work so they can take jobs making civilian goods.
2. Just as soon as such work does not inter-

fere in any way with existing or future war contracts.

3. Just as soon as other parts which manufacturers use with aluminum, such as small motors, handles, etc., are available in sufficient quantities.
4. Just as soon as shipping containers and shipping space are available.

We join with you in wishing that this day may come speedily. We know you also join us in recognizing that winning the war comes first and nothing must interfere with it.

But it is gratifying to know that the good things of the aluminum age are within sight and that you will soon be enjoying more and more of the Alcoa Aluminum that has done so much to lighten the burdens of everyday life.

ALUMINUM COMPANY OF AMERICA

ICE CREAM MAKING HERE LEADS NATION

HARRISBURG, Aug. 8.—(INS)—The Pennsylvania output was sufficient to supply every citizen of the state with about five gallons each. Production of creamery butter in Pennsylvania during 1944 was 11,244,000 pounds compared with 12,444,000 in 1943.

Cheese production, excluding full cream Cheddar and cottage pot and bakers' cheese, declined 1,600,000 pounds compared with 1943, but cottage pot and bakers' cheese increased 2,000,000 pounds.

The quantities of condensed and evaporated whole milk and of condensed and evaporated skimmed milk exceeded 1943 production by 11 per cent and 15 per cent, respectively. Dry whole milk declined roughly 1,200,000 pounds and dry skimmed milk for human consumption, dropped almost 1,600,000 pounds compared with 1943 production.

Army Speech Course Makes GI's 'Mellow'

FORT LOGAN, Colo.—(INS)—They're going to make mellow fellows out of the GI's at Fort Logan, so don't be surprised at the well-modulated and dulcet tones in the voices of soldiers covered with combat ribbons.

A thorough speech course has been started at the convalescent hospital to enable the men stationed there to participate more successfully in social situations which require speech skills.

The course, under the auspices of the hospital's education branch, will endeavor to correct speech impediments and to give representatives a basic knowledge of the principles of speech and to stimulate interest and train men in various areas of speech.

The class scope includes training in public speaking, speech correction, conversation, radio and dramatic speech.

Instruction in the gestures that go with proper speech are also included.

The students use the post radio station and cut records of their voices at different stages of the course so they can tell how they are progressing.

Visits to radio stations, guest speakers and use of the theater facilities at the post, round out the course's program for making Loquacious vocal speakers.

San Francisco, not the Netherlands, possesses the largest windmill in the world. Standing in a park it is some 75 feet high.

Army Speech Course Makes GI's 'Mellow'

FORT LOGAN, Colo.—(INS)—They're going to make mellow fellows out of the GI's at Fort Logan, so don't be surprised at the well-modulated and dulcet tones in the voices of soldiers covered with combat ribbons.

A thorough speech course has been started at the convalescent hospital to enable the men stationed there to participate more successfully in social situations which require speech skills.

The course, under the auspices of the hospital's education branch, will endeavor to correct speech impediments and to give representatives a basic knowledge of the principles of speech and to stimulate interest and train men in various areas of speech.

The class scope includes training in public speaking, speech correction, conversation, radio and dramatic speech.

Instruction in the gestures that go with proper speech are also included.

The students use the post radio station and cut records of their voices at different stages of the course so they can tell how they are progressing.

Visits to radio stations, guest speakers and use of the theater facilities at the post, round out the course's program for making Loquacious vocal speakers.

San Francisco, not the Netherlands, possesses the largest windmill in the world. Standing in a park it is some 75 feet high.

Who Will Guard Atomic Secret?

Tremendous Possibilities Are Seen In Latest Development Of Force

WHAT NATIONS TO SHARE CONTROL?

By JOHN E. LEONARD
(U.S. Staff Correspondent)

Now that man has managed to unleash the tremendous forces of the universe, he would not be advised to keep a secret of the stock of what he has done.

It also behooves him to share it, for a considerable shorter time than it took him to manufacture the atomic bomb, some kind of treaty to substitute for the one he broke.

The super-secret of the entire atom-bombing project made it impossible for the general public to be told of the significance and potentialities of the energy released by the intricate process.

Now that the world is on new oceans and mountains, all public a spate of highly interested articles on what a pan-head of mankind can do to wit: power automobiles, heat whole cities, pull trains, render such projects as the Boulder dam useless and consign electric power to limbo.

All these tremendous possibilities are true—provided, of course, that the deadly radiation disseminated by the atom's process of splitting can be controlled.

Immediate Problem
But the matter for immediate consideration is what nation or nations will hold primary control over this terrible atomic weapon of warfare. Even if Britain and the United States refuse to divulge the secret of the Anglo-American bomb, there is virtually no possibility that other nations' scientists cannot break down its secret sooner or later.

Some quarters are warning the terrible power of the atomic bomb that appeared on the part of Hiroshima, rendered cities, buried cities and apparently without further thought that man at last has made war so

horrible that he will wage no more wars.

It goes without saying that such a statement is ridiculous. It is useless, obviously, to try to keep this bomb a secret.

What, then, to do with it?

Most Sensible
The most sensible suggestion thus far put forward was that the secret, together with control of the metals involved, be placed in the hands of the world security organization as the ultimate threat against would-be aggressor nations.

That seems a very sound proposition indeed until one ponders the problem of which nations are now or will be considered would-be aggressors.

It has been assumed that defeated Germany will one day be accepted into the great family of nations. If so, then Germany one day will share the potential use of the atomic bomb and will be among those nations considered in danger or what is an aggression.

It also may be assumed that Japan, if the war lords do not bring on her utter destruction by continued refusal of our terms of unconditional surrender, will at some time set a new lease on life and join the world's nations around the conference table.

The victors of this war must discuss not only monetary and political control, but the control of a power as destructive that man has within his grasp to destroy himself and his nonhuman world.

The victims of this war must discuss not only monetary and political control, but the control of a power as destructive that man has within his grasp to destroy himself and his nonhuman world.

At the completion of the triumphal march, the victors of this war must discuss not only monetary and political control, but the control of a power as destructive that man has within his grasp to destroy himself and his nonhuman world.

Seaman McCallion Returns To Warship

East-Sider Concludes Leave, Will Rejoin Destroyer Refitted For Pacific Service

William L. McCallion, S-1, has left for Seattle, Wash., and will join his ship, a destroyer being refitted on the West Coast, and return to Pacific waters.

Bill recently concluded a 13 days leave visiting with his parents, Mr. and Mrs. James McCallion and family of 309 Pine street, after returning from nine months service in the Pacific. He was in the battles of Iwo Jima and Okinawa, and has been awarded two battle stars. He has been through several typhoons in that area.

McCallion will go to Kelly Field, San Antonio, Texas, for further training, after his furlough ends. Before his induction into selective service January 25, 1942, he was employed at the Penna. Railroad shops here.

McCallion has been in the armed forces for 43 months, and overseas 26 months. He has been located in England, France, Belgium and Germany. He has been awarded the Unit Presidential Citation, ETO Ribbon, Good Conduct Medal, and two Battle Stars (this far).

McCallion will go to Kelly Field, San Antonio, Texas, for further training, after his furlough ends. Before his induction into selective service January 25, 1942, he was employed at the Penna. Railroad shops here.

STOCK MARKET RALLIES TODAY

Market Rallies Fractionally Today,
Few Leaders Gain Nearly
Point

NEW YORK, Aug. 8.—(INS)—The stock market rallied fractionally in forenoon trading today and recovered partly from yesterday's sell-off. A few leaders gained nearly a point when traders, hesitant at the opening, switched to the buying midway through the first hour.

Turnover continued fairly active, approximately nearly 200,000 shares in the initial hour.

Vanguard Corp. of America, leading uranium producer, staged another run-up, selling as high as 29 7/8, no more than 3 points.

Chrysler U. S. Steel and Bethlehem added nearly a point each. Ralls were quieter than the general market and traded near Tuesday's final. Aviations made headway, paced by Lockheed and Douglas. Utilities were uniformly better. Chemicals were strong. Coppers, electricals, and rubber issues added small fractions.

The bond market was quiet and steady.

NEWS AND VIEWS AT CAPITAL

HARRISBURG, Aug. 8.—(INS)—Five high-paying commonwealth posts including a \$10,000-a-year membership on the state liquor control board were vacant today, a survey reveals. In addition to the liquor control board membership, vacancies exist on the parole board, securities and milk control commissions and the unemployment compensation board of review.

Gov. Edward Martin has not indicated when the posts would be filled. He has explained the boards and commissions were operating smoothly with their present memberships.

The liquor board post and a \$9,000-a-year membership on the parole board have been vacant since the chief executive assumed office in January 1943. A vacancy on the unemployment compensation board was created with the resignation March 31 of Col. Henry Lawrence, unsuccessful candidate for the Republican nomination for mayor of Scranton. The post pays \$8,500 annually. The securities commission has been operating with only two members since the resignation October 1, 1943, of Walter C. Miller of Lancaster. The commission pays \$7,000 a year. Milk Control Commission Chairman John M. McKee's term expired May 1 and Governor Martin did not reappoint him because of "bipartisan objections" by the senate. H. N. Cobb of Towanda was named chairman of the commission. The regulatory agency membership pays \$6,000 a year.

The state health department has reported that the bureau of sanitary engineering supervises the public water supplies of 8,000,000 Pennsylvanians, approximately 80 per cent of the state's population. About 225 filtration plants serve six million citizens while another 2,000,000 persons are supplied chlorinated water by 500 chlorine installations.

For the first time in four years, cabins have been opened for tourists at the Leonard Harrison state park on the rim of "the grand canyon of Pennsylvania" near Williamsport. The commonwealth department announced. Buildings heavily demolished by heavy snows last winter

have been repaired and picnic tables and fireplaces placed in order, the department added. The park is located in Tioga county.

The Federal Bureau of Investigation has compiled a list of factors "which might affect the amount of crime in a community." They included population of the city and metropolitan area adjacent thereto, composition of population "with reference particularly to age, sex and race," economic status and activities of population, climate, educational, recreational and religious facilities, number of employees per unit of population, standards governing appointments to police force, policies of prosecuting officials and the courts, attitude of the public toward law enforcement problems and efficiency of law enforcement agencies.

The president looks upon it not as a weapon of destruction and warfare but as a means that can be made an effective instrument to maintain peace in the world.

This was reported today by Sen. Carl Hatch (D-N.M.) after a visit to the White House during which he discussed the effect of the discovery on the United Nations organization.

"The president looks upon it not as a weapon of destruction and warfare but as a means that can be made an effective instrument to maintain peace in the world," said Hatch.

PAGING DIOGENES

ITHACA, N. Y.—(INS)—If Diogenes is looking for an honest woman, he need look no further than the cashier in the dining room at Cornell University. She tried to give a gentleman change for a \$10 bill when he paid his check. He protested, saying he had given her a \$5 bill. When the cash register was checked at the end of the day, sure enough, there was \$5 over. The cashier now wishes the gentleman would re-appear so she can give him the money.

Prisoners Of Japs Gradually Forget Prison Hardships

Mr. and Mrs. J. G. Thomas, Who
Were Confined In Santo Tomas,
Visit Relatives Here

Mr. and Mrs. J. Gilbert Thomas and little daughter Jayne, who spent over three years in the Santo Tomas prison camp, maintained by the Japs at Manila, who are the guests of Mrs. Thomas' brother and wife, Mr. and Mrs. Loy H. Patterson of Grant street, are gradually learning to forget the hardships they suffered during their enforced incarceration at the hands of the Japs and learning again to appreciate the goodness of life in this country.

Mr. Thomas, who was a guest of his brother-in-law at the newly reopened of the Lions club Tuesday stated that he still feels a little weak from his experiences, and is unable to take any extended exercise without feeling very tired. He contracted beriberi because of the meager diet at the camp, particularly during the last four months of his stay at the camp, when the army used rice as the staple of feeding them. A handful of soup rice or soup remained was all that subsisted on until they were freed by the Americans in their victorious landing on Luzon.

Those who observed the regulations set up at the camp, and bowed to their Jap captors, were not mistreated, but any who did not observe these regulations were beaten. Mr. Thomas saw several instances of this during his stay in the camp.

During his incarceration he dropped in weight from around 190 pounds to 125 pounds, but is now regaining his health and weight.

Man Had Brick In His Stomach For 10 Years

One man recently stated that for 10 years he felt he had a brick in his stomach. This feeling was due to the lump of undigested food he always had inside of him. He was weak, worn out, headachy, swollen with gas and terribly constipated. Recently he started taking E.R.B.-HELP and says the feeling like a brick in his stomach disappeared the second day. Bowels are regular now, gas and headaches are gone and he feels like a new man.

E.R.B.-HELP contains 12 Great Herbs; they cleanse bowels, clear gas from stomach, act on sluggish liver and kidneys. Miserable people soon feel different all over. So don't go on suffering! Get E.R.B.-HELP. Sold by All Drug Stores here in New Castle.

BUSINESS COLLEGE

Our office is open daily for those who wish to call and make their arrangements for the September 4 opening. This year our Day School as well as our Night School begins September 4 (the day after Labor Day). It will greatly accommodate us if you can call at our office in the near future to make your plans. It will be good for you to have your plans made in the near future and it will cost you less than it would if you waited until the opening date. Our tuition rates until the school opening will be the same as last year.

IN U. S. ARMED SERVICE

(War Censorship Regulations Limit Information Allowed In This Column)

Pfc. Louis Zambelli and Pfc. Carmelo Zambelli, brothers, of 510 East Division street, met in Freyburg, Germany, on July 11. It was the first time they had seen each other for three years and at first sight neither recognized the other. Carmelo stopped at Freyburg for a visit of a few hours with his brother in the course of a 674-mile trip. He has been overseas two and one-half years with combat engineers, Louis, with the 320th infantry, has been overseas for the past nine months.

Pvt. Victor C. Black, son of Mr. and Mrs. Cornelius Black, of 314 Pine street, is stationed at Camp Lee, Virginia, in the Quartermaster Division. Another son, Cpl. Calvin D. Black, has recently been transferred from Germany to France.

Mr. and Mrs. Henry Grossman of South Ray street have received word from their son, Ronald Fulkerston, of the Seabees, that he has arrived in the Hawaiian Islands.

Mr. and Mrs. Charles L. Brown of 116 North Lee avenue have been informed that their son, Sgt. Russell W. Brown of the U. S. Marines, has arrived at a Pacific destination. This is Sgt. Brown's second trip to the Pacific area, as he served for 31 months with the First Marine Division. Another son, Walter E. Brown, is now attached to the Atlantic Fleet aboard one of the newly commissioned destroyers.

Mr. M. M. 2-c Joseph Yanul of the U. S. Navy has returned to New York after spending a five-day leave with his parents, Mr. and Mrs. Michael Yanul, of 511 Electric street, John T. Patjak, of Adams, Mass., a buddy of Mr. M. M. Yanul, also visited at the Yanul home for a few days.

Pfc. William L. Harkins, veteran of 33 months in the ETO, where he served in the infantry, has returned to this country aboard an air transport command trans-Atlantic plane, arriving at LaGuardia Field, N. Y. He plans to visit soon with his wife of Arlington avenue. Pfc. Harkins has been awarded the ETO ribbon with six stars, Presidential Unit Citation, Combat Infantry badge, Good Conduct and American Defense medals.

T-5 Richard C. Graham, 88 South Lee avenue, and T-5 Bennie P. Russo, 221 South Liberty street are members of the first platoon of the 694th Quartermaster Truck company. This platoon helps to operate the "Red Ball Express" of vital supplies from warehouses in central England to Southampton for shipment to armies in the continent.

After helping care for the survivors of the Dachau and Alach concentration camps overseas, Pfc. Wallace Trautz of 12 East Balph avenue, is now being processed at the assembly area command in

France for direct redeployment to the Pacific area. Pfc. Trautz is attached to an evacuation hospital unit.

S-Sgt. Joseph A. DeLillo, 505 Canyon street, was among those honorably released from service on August 5 at Fort Dix, N. J.

Cpl. John P. Tarter of R. D. 3 is now being processed at Camp New York, France, as the first step in his redeployment to this country for further before starting for the Pacific area. He is a member of the 489th Air Service group.

Sgt. Andrew V. Rich, son of Michael Rich, Box 3, Hillsville, has been assigned to Camp Air Base Casablanca, with the ATC's North African Division. This group is assisting in the movement by air each month of 40,000 veterans of the European and Mediterranean theaters of war back to the United States for redeployment and discharge. Sergeant Rich has been overseas for 35 months.

Pvt. Donald E. Krueger, son of Mrs. Elizabeth Krueger, of 238 Smithfield street, has returned to Fort Meade, Maryland, after ten days at home. A brother, Pvt. William Krueger, is stationed at Camp Gordon, Georgia.

Jesse C. Dufford, Mr. M. M. 1-C, stationed at Key West, Fla., has arrived to spend a 30-day leave with his parents, Mr. and Mrs. J. C. Dufford, of 1232 East Washington street.

Charles H. Mort, Petty Officer 2-C, has returned to Camp Perry, W. Va. after spending the week end at the home of his parents, Mr. and Mrs. David Mort, of the Wilmington road. His sister First Lt. Hilma E. Mort, U. S. N. C. is believed en route to duty in the Pacific area after having served for the past year and a half in France.

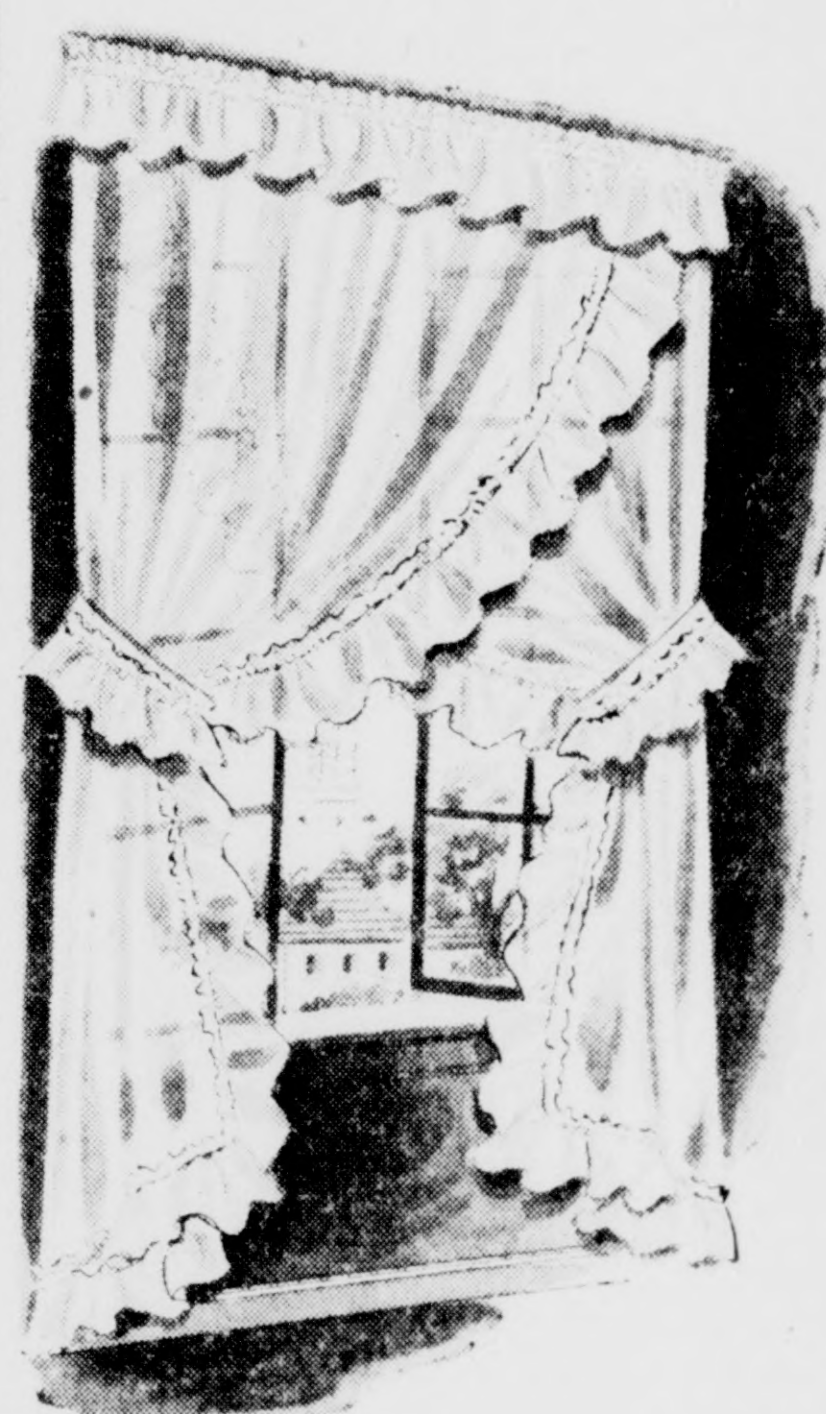

Pfc. William L. Harkins, 206 1/2 North Walnut street, and T-4 Darrell W. Gould, 421 Elizabeth avenue, both of New Castle, and Cpl. Charles H. Cole, 413 Stanley street, Ellwood City, are listed as having been honorably released from service Monday at Indiantown Gap.

S. 1-C Richard M. Fortney has returned to the Navy Yards, Philadelphia, after visiting with his parents, Mr. and Mrs. J. R. Fortney, 15 Levine Way, S. Fortney, who was injured while stationed at Hollister Air Base, Calif., is now awaiting a medical discharge from the U. S. Navy.

Pennsylvania soldiers arriving Monday for redeployment at Indiantown Gap include the following: Pfc. David J. Tietz, 905 Franklin avenue, Pfc. Merle H. Jay, 223 Smithfield street, Pfc. Gaylord L. Myers, R. D. 1, Pfc. Leon C. Williams, King avenue, Pfc. John Small, 322 Electric street, Sgt. George E. Myers, R. D. 6, and Pfc. John H. Morrow, 333 Neshaunack avenue, all of New Castle, and T-5 Jack Shaffer, R. D. 2, Ellwood City.

Lawsence McNair, ship's serviceman aboard the U. S. Navy, husband of Mrs. Ethel B. McNair, mounted Route 7, Ellwood City, is a member of the crew aboard a U. S. submarine tender at an advanced Pacific base. This repair vessel is charged with refitting war-weary submarines returning from combat patrol in the Pacific area.

First Lt. George W. Randall, 331 Crescent avenue, this city, arrived Monday with a group of officers at Indiantown Gap for redeployment.

Atomic Expert Escapes Nazis To Reach U. S.

Location Of Scientist Kept Secret
From Gestapo; Flew In
Plane's Bomb-Bay

LONDON, Aug. 8.—(INS)—The hair-breadth escape from German authorities of a Danish atomic expert who worked on the history-making new bomb that has been hurled against Japan was revealed today.

Doctor Neils Henrik David Bohr, professor of theoretical physics at Copenhagen university and Nobel prize winner, was whisked by fishing-boat to Sweden, and thence flown to England, before making his way to the United States.

As recalled today, the physicist escaped being apprehended by the Germans in Denmark, and managed to get to Sweden in September 1943. When he disembarked from the fishing-boat, he was surrounded immediately by Swedish police upon the request of Danish authorities.

Guarded By Police

The Swedish police guarded him against possible harm by German Gestapo agents, and 12 days later Bohr was whisked to Britain in the bomb-bay of a swift-winged Mosquito bomber. The aircraft flew through the Nazi blockade, carrying the scientist and much priceless data to the United Kingdom.

Whereabouts of Bohr was a closely-guarded secret while he worked on experiments in Britain, and later when he went to America with other scientists. He was believed to be in constant danger of being hunted down by enemy agents, and was known to have refused to help the German Professor Hahn, who years before had made great progress in the discovery of atomic power.

NEW CASTLE STORE

Says Statesmen Behind Scientists

DENVER, Aug. 8.—(INS)—The atomic bomb should mean the end of big armies, it was stated today by Sen. Ed C. Johnson (D. Colo.).

The big trouble, said Johnson, is that the scientists have progressed faster than the statesmen.

"Unless the statesmen catch up, the destruction of mankind itself may be in sight," said the senator, who added he knew about the atomic bomb experiments for three years.

The atomic bomb ought to blow up peace-time conscription, as well as bring the war with Japan to a speedy conclusion," he said.

RUSSIA HAS DECLARED WAR

President Truman Announces Russia Enters Jap War

Estimate Atomic Bomb Casualties Are 150,000 Dead

Most Of City Of Hiroshima Completely Wiped Out By One Bomb

PHOTOS OF HAVOC TAKEN BY FLIERS

BY KENNETH MCALBER

U. S. Staff Correspondent

GUAM, Aug. 8.—One hundred and fifty thousand Japanese were estimated today to have been killed by the atomic bomb dropped Monday on Hiroshima.

This estimate was made by scores of veteran airmen who viewed new reconnaissance photographs taken today by Okinawa-based planes which flew over the awesome scene of desolation and destruction.

Radio Tokyo virtually confirmed the staggering loss of life, declaring "practically all living things, human and animal, were literally erased to death" in the southern Hiroshima city.

Gigantic Destruction

If the estimate of Lt. Col. Bob Herring, Blackhawk, Tex., and scores of his veteran airmen on Okinawa is right, then the lone atomic bomb wiped out in one blow more than the total number of Americans killed in the first World War, when 126,000 U. S. soldiers died in action.

The number of dead is equal to the population of cities like Albany, N. Y., Sacramento, Calif., or Flint, Mich.

The new reconnaissance photos failed to disclose a building or wall standing anywhere in the leveled city which looked as if a million comets had dug up and disintegrated everything.

News of the terrifying destruction caused by the atomic bomb troops on Okinawa. They forecast the end of the war, believe that even the Japanese are unwilling to have their entire nation wiped out by the revolutionary bomb.

So widespread was the effect of the bombing that "those outdoors were burned to death, while those indoors were roasted."

(Continued on Page Two)

PA NEW Observes

According to announcement of the Petroleum Administrator for War at Washington, the present quantity of high test aviation gas for military use is being increased. There is no change in the total amount of gasoline available, but the authorities are changing the proportion of premium grade for civilian use. The increased output of premium grade is made possible by the end of the war in Europe which is expected.

From the post office department at Washington today comes the announcement that use of the two Juna stamps and other issues with patriotic themes is barred from mail for prisoners of war held by the Japanese to prevent possible confusion by the Japanese.

Vacation days for New Castle's army of school children are rushing on. Only four weeks from today, Wednesday, September 5, and school will be in session.

Work is in progress at the top of State street, all on route 423 in widening the curve that has been a traffic bottleneck in that much traveled highway. Curbing is now being set, and when the improvement is completed traffic will be greatly facilitated at that point.

Daily Weather Report

United States weather statistics for the 24-hour period ending at 9 p. m. today follow:
Maximum temperature, 79.
Minimum temperature, 56.
Precipitation, .16 inches.
River stage, 5.4 feet.
Statistics for the same date a year ago follow:
Maximum temperature, 86.
Minimum temperature, 58.
No precipitation.

(BULLETIN 3:00 P. M.)
WASHINGTON, Aug. 8.—President Truman announced this afternoon that Russia has declared war against Japan throwing the might and power of the great Soviet fighting machine against the crumbling Nipponese empire.

The president made the disclosure at a special news conference at 3 p. m. He gave no further details except to say that Russia has declared war.

The announcement doomed Japan.

The entry of Russia into the Pacific war, coming on top of Anglo-American use of atomic bombs against the enemy, means Japan faces early surrender or utter destruction.

NEW YORK, Aug. 8.—(INS)—Moscow radio announced this afternoon that the Soviet Union had declared war against Japan.

CBS heard the broadcast.

The Moscow radio went on the air at 3:05 with the war declaration report.

The Moscow radio said:

"In coordination with the forces of the United States and Great Britain the armies of the Soviet Union will pursue the fight against the Japanese aggressor."

"We shall bring Japan to her knees by our united force."

"The Soviet Union considers that this is the only way the arrival of peace can be hastened."

"Therefore we announce again that as of today, the Ninth of August, the Soviet Union is officially at war with the Japanese empire."

At the same time the Soviet embassy in Tokyo is informing the Japanese government of this step, the radio report stated.

Peta's Defense Fleeing Japs Being Presented Are Pursued By Chinese

Witness Relates Some Of Activities Of Peta's Said To Have Aided Allies

BULLETIN

PARIS, Aug. 8.—(INS)—Defense Attorney Jacques Isorni announced today that defense testimony in the Peta's trial would be completed by Friday night.

Prosecutor Andre Mornet will conclude his case Saturday and the trial is expected to end by Tuesday.

PARIS, Aug. 8.—(INS)—Testimony that Marshal Henri-Philippe Peta's defense attorney Jacques Isorni helped finance a secret French air force during the Nazi occupation was introduced today at the old soldier's treason trial.

Gen. Jean Berenger, former Vichy air minister now under arrest, said as the trial entered its 15th day that the air force, trained at a preference sports camp and led by German pilots, was designed to secure information for the British.

Alleged Secret Agreement

Meanwhile, further testimony was expected concerning a secret agreement said to have existed between Great Britain and Vichy in 1940.

Berenger testified that Peta's defense attorney had helped him for the Allied cause in November, 1942, because "the aged marshal refused to abandon French prisoners into German hands."

The defense witness further testified that Peta's alleged defense attorney had helped him for the Allied cause in November, 1942, because "the aged marshal refused to abandon French prisoners into German hands."

Berenger also told the court that

Manufacturers Are Given Go-Ahead On Lower Priced Shoes

WASHINGTON, Aug. 8.—(INS)—Manufacturers today had an unrestricted go-ahead on the production of low and medium priced shoes ranging from \$1.25 to \$6.25 per pair.

The WPB said that to encourage production of this inexpensive and moderately-priced footwear the industry now may make as many of these shoes as it wishes.

Previously, production was limited to specified percentages of individual firms' pre-war production. A ban which prohibited firms from making types of shoes they did not produce in peace years also was lifted.

Shoes affected by the relaxation run from non-leather babies' shoes costing \$1.25 to men's dress shoes retailing at \$6.25 and include girls, children, youths and boys, women and work shoes and house-slippers.

DETROIT, Aug. 8.—(INS)—Richard T. Frankenstein, international vice president of the UAW-CIO today led Mayor Edward J. Jeffries, Jr. by better than 14,000 votes following yesterday's mayoralty primary in Detroit.

With all but one precinct in the vote stood, Frankenstein, 82,936; Jeffries, 68,754.

The thirty-eight year old labor leader, who has slugged and been slugged in many a picket line, fought his way to the top again—but for the first time in major league politics.

Frankenstein and Mayor Jeffries will settle the issue at the polls in November's general election.

DETROIT, Aug. 8.—(INS)—A man, tentatively identified as W. D. Flickinger, 42, of 14719 Chilton avenue, Lakewood, O., an employee of the Republic Steel Corp., leaped or fell to his death early today from the eighth floor of the Sclerian hotel.

The identification was made from papers found in his room. No note was found and police could not determine whether his fall was accidental or intentional. The body was unclimbed.

DETROIT, Aug. 8.—(INS)—The Detroit News reported today that the British freighter Argos Hill was reported today on fire at sea about 200 miles off the Newfoundland coast.

In response to distress signals, three naval mine sweepers equipped with fire fighting apparatus were rushed to the assistance of the 4,413-ton vessel.

Teheran Dispatch Says Allied Forces Will Be Withdrawn

LONDON, Aug. 8.—(INS)—A Reuters dispatch from Teheran reported today that the foreign ministry has announced the decision to withdraw all Anglo-Russian forces from Tehran immediately.

According to the dispatch, the British embassy informed Iran of the decision which was arrived at during the Potsdam conference.

Tokyo Reports Atomic Bomb Causes Havoc

Fearful Losses And Damage At Hiroshima Are Now Reported By Japan

DESTRUCTIVE POWER IS INDESCRIBABLE

BULLETIN

SAN FRANCISCO, Aug. 8.—(INS)—Radio Tokyo declared today that the corpses in Hiroshima were "too numerous to be counted" and that "practically all living things, human and animal, were literally erased to death" in the southern Hiroshima city.

The atomic bomb dropped on the southern Hiroshima city on August 6, a French language broadcast in Europe, that the use of the atom bomb was a violation of international law.

The denunciation quoted in the broadcast aimed at Europe was attributed to "authorized quarters in Tokyo" which were otherwise unimpressed by the catastrophe.

Most of Town Destroyed

As a consequence of the use of the atom bomb against the town of Hiroshima on August 6, most of the town has been completely destroyed and there are numerous dead and wounded among the population, Tokyo declared.

"The destructive power of these bombs is indescribable," the broadcast continued, "and the cruel trial resulting from the attack is an impressive illustration of the danger."

Jap Synthetic Oil Works Is Reported Sunk

GUAM, Aug. 8.—(INS)—Twenty-four Air Force headquarters today listed Japan's Ube Coal Liquefaction Company as destroyed and sunk.

Headquarters revealed that the great Jap synthetic oil works, built on reclaimed land in the mouth of the Ube river, was destroyed.

On the Dwaing river, the great Chungking works completed capture of the Tanchuk airfield on the north bank of the west river. The airbase lies 18 miles southeast of Pingnan.

The enemy remnants retreated toward Yanning, with our forces pursuing.

Yanning is the next major Jap bastion lying some 32 miles north of Chungking, or about 80 miles from Canton. The advance of the Chinese forces is expected to reach Canton by the end of the month.

Superforts In Three Strikes At Jap Islands

More Than 500 B-29s Make Three Separate Raids On Japanese Targets

YAWATA GIVEN HEAVY BOMBING

GUAM, Aug. 8.—(INS)—More than 515 B-29s and escorting fighters lashed at Japan today in three separate strikes.

A force of more than 30 Superforts bombed an airport and an industrial area in the Tokyo area within six hours after more than 225 Superforts, escorted by 140 fighters, blasted the steel production center of Yawata on northern Kyushu this morning.

The Superforts dropped approximately 2,000 tons of demolition bombs on Yawata.

Mines Are Planted

The third strike at Japan was carried out by 30 Superforts which planted mines in four harbors from northern Korea to Honshu to further tighten the stranglehold shipping blockade on the Nipponese homeland.

Targets of the B-29s which hit the Tokyo area just before dusk today with demolition bombs were the Nakajima, Mitsubishi-Tokai plant and the Mitsubishi Tokyo arsenal.

Control Plan For Austria

Four Nations Set Up Plan For Control Of Country Overrun By Nazis

UPPER AUSTRIA IS ASSIGNED TO U. S.

WASHINGTON, Aug. 8.—(INS)—United States, Britain, Russia and France today set up a control plan for Austria which is expected to pave the way for acceptance as a member of the United Nations.

The "Big Four" set forth a plan for the first of the European nations overrun by Nazis. Somewhat similar to that for Germany, it provides for uniform control of the four allied occupation zones.

The plan does not impose any punitive terms. It prepares for the gradual reestablishment of temporary rule in the country.

Occupation will be considered to include the boundaries which existed before Hitler took over the country in 1937. This area will be allocated for occupation with the northeastern section including upper Austria, east of the Danube and all of Burgenland going to Russia.

U. S. In Upper Austria

The United States forces will occupy upper Austria west of the Danube and the province of Salzburg.

Describes Damage By Single Atomic Bomb On Japan

GUAM, Aug. 8.—(INS)—Here is the text of the historic communique in which Gen. Karl Spaatz, chief of the U. S. Army Strategic Air Forces, officially describes the damage caused by the single atomic bomb dropped on Hiroshima Monday.

Reconnaissance photographs made over Hiroshima on the morning of 6 August show that four and one-tenth square miles or sixty per cent of the city's built up area of six and nine-tenths square miles were completely destroyed by the atomic bombing mission five major industrial targets within this area were completely destroyed.

Additional damage was shown outside the completely destroyed area.

DETROIT, Aug. 8.—(INS)—The Detroit News reported today that the British freighter Argos Hill was reported today on fire at sea about 200 miles off the Newfoundland coast.

In response to distress signals, three naval mine sweepers equipped with fire fighting apparatus were rushed to the assistance of the 4,413-ton vessel.

Halsey's Fleet Ready To Strike At Japan Again

WASHINGTON, Aug. 8.—(INS)—Admiral William F. Halsey's third fleet was geared today to strike new blows against Japan's vital coastal installations in combination with new atomic bombing attacks on the enemy homeland.

In making this announcement the admiral declared that the Japanese "must now take their choice, mass suicide or surrender."

The navy's strategy that it is too easy to determine effects of the atomic bomb on Japanese morale, asserted.

"We may have to destroy four or five cities before they actually believe we have such a bomb. But we will bring them the proof."

With the destruction from this new type of bomb, and with the continued damage from Admiral Halsey's carrier planes and ships, Japanese fighting strength—and perhaps even their will to fight—will rapidly weaken.

The navy served notice that Halsey's fleet destroyers and the big guns of his heavy ships will soon let loose more and more destruction on vital coastal installations.

It was expected that Halsey had to move his third fleet to safe waters last week because of a threatening typhoon.

Planes Can Win, Rickenbacker Says

NEW YORK, Aug. 8.—Captain Edward V. Rickenbacker expressed the opinion that Japan could be defeated by air power alone.

"The World War I ace and Eastern Airlines president said in a statement.

"I believe that in a very short time the Japanese people and industry will be so demoralized and battered by the daily rain of atomic bombs, demolition and incendiary bombs that they will quit."

It is my firm belief that this is the first war which will be won exclusively by air power, notwithstanding all experts' feelings that we will have to land troops on the home islands themselves."

U. S. First To Become United Nations Member

WASHINGTON, Aug. 8.—(INS)—The United States today formally became the world's first country to be a full fledged member of the United Nations.

The action took place when President Truman and Secretary of State Byrnes signed the document of ratification as approved by the senate.

The charter as well as the statute of international court of justice were signed by both the president and Byrnes.

The signed charter was then deposited in the Archives building, completing the process through which the nation became a member of the United Nations organization.

AFTER EFFECTS OF ATOMIC BOMBING LAST FOR YEARS

(Continued From Page One)

yet learned the needed thickness of such insulation.

Need Years To Recover
Only years of rain and the hot rays of the sun can wipe from the dense fabric of the earth, this powerful radioactive force. Even then, the radiation, washed into the rivers and seas may destroy animal and vegetable life until diluted beyond danger.

Some doubt existed even today that Tokyo investigators could walk through the recently bombed area without endangering their lives since even factory workers painting a thin solution of radium on watch dials have found their work fatal.

While awe spread through informed civilization over the war making potential of the atomic bomb and the possible immediate result on the war with Japan, others speculated on its effect on modern civilization.

Observers of international affairs foresaw the wide revision of foreign policy of many nations, accompanied by regroupings of national interest. The list of raw material which today influence thought on national interests, it was foreseen, might be swept aside with the wartime and peacetime developments of atoms.

MOST OF AIRMEN ON PLANE UNAWARE OF BOMB MISSION

(Continued From Page One)

San Francisco, N. M., and Maj. Thomas W. Ferebee, bombardier from Moxville, N. C., were the only men aboard the "Enola Gay" who were fully informed of the nature of the mission.

The "Enola Gay" took off on its history-making mission some three hours after midnight and saw the city of Hiroshima virtually go up in smoke at 9:15 a. m. Monday when the bomb was dropped.

Given Bare Hint
The handpicked crew was given a bare hint of the nature of their mission when they were fitted with dark glasses as protection against the expected blinding flash.

Captain Parsons, the Navy bomb expert, was the last to see the man aboard the Superfort when the bomb exploded.

We made a tight turn away from the target in order to get a maximum distance between us and the explosion," Parsons said.

"It was a little more than a minute after we dropped the bomb that we felt the impact of the explosion."

Parsons described the men aboard the "Enola Gay" as "amazed and speechless" in the wake of the bombing.

"One of them," he said, "simply stared and softly murmured a single 'My God.'"

Mountain of White Smoke
"What had been Hiroshima was a mountain of white smoke mushrooming into the sky. For a thousand feet above the ground was a black pall which must have been dust. There may have been some smoke in it but it couldn't have been from fire alone."

Maj. Ferebee, the bombardier, dropped the atomic bomb visually in perfect bombing weather.

Others who helped with the new chapter in warfare included Capt. Theodore J. Van Kirk, Northern Bedford, Pa., navigator, and Second Lieut. Morris depon, address unobtainable, electronics officer.

Tibbets, Ferebee, and Van Kirk formed the nucleus of the hand-picked crew. The three officers saw much service together in Europe and were specially chosen for the daring inaugural atomic bombing mission.

The peacock is a kind of pheasant. I originated in Asia and the East Indies. In India it is regarded as sacred by various castes.

TOO MANY DOGS
NEW YORK, Aug. 8.—Harriet Oswald's fancy for dogs landed her in a Brooklyn court yesterday charged with violations of the Sanitary Code.

Magistrate Charles Solomon suspended a 60-day sentence, providing she let the American Society for Prevention of Cruelty to Animal keep her dogs.

It wasn't that the court objected to dogs.

But 39 of them in a three-room city apartment was a bit too much, ruled the magistrate.

DEATHS OF THE DAY

John Ponick
John Ponick, of 1012 South Jefferson street, died in the New Castle hospital, Tuesday at 6 p. m., from a heart attack.

He was employed at the P. & L. E. railroad. The body is at the Joseph B. Leyde mortuary, Highland at Winter.

Funeral arrangements will be announced later.

ESTIMATE ATOMIC BOMB CASUALTIES ARE 150,000 DEAD

(Continued From Page One)

indors were killed by the indescribable pressure and heat," Tokyo declared.

City Becomes 'Cosmic Dust'
A single bomb, the most terrible weapon of destruction in mankind's history, transformed the heart of the city of 340,000 population into something that resembled cosmic dust.

In a momentous communiqué, Gen. Carl Spaatz, chief of the U. S. Army's Strategic Air Forces, declared that four and one-tenth square miles of Hiroshima were "completely destroyed."

This represented 60 per cent of the city built up over six and nine-tenths square miles.

The terrible blast that occurred when the atomic bomb was dropped at 9:15 Monday morning (Japanese time) wrought heavy additional damage outside the completely destroyed area.

The waves of concussion, which in the test of the revolutionary bomb in the New Mexico desert, knocked two men six miles away off their feet, must have been death-dealing in Hiroshima.

No destructive was the atomic raid that Hiroshima, once a big Japanese army base, was an isolated city with all communications cut off, according to radio Tokyo.

Only One Bomb Dropped
No other bombs were dropped on Hiroshima—just the single atomic bomb.

As the destructive power of the mighty bomb began to dawn on the Japanese war lord, Premier Kato Suzuki summoned a special meeting of his cabinet.

The chief cabinet secretary, Hisatsune Komizumi, "made a report" on the Hiroshima raid, radio Tokyo reported but did not divulge the nature of his report.

There was no mistaking the fearful damage picture in the official reconnaissance photographs viewed today at Guam headquarters by war correspondents.

The four and one-tenth square miles that General Spaatz described as "completely destroyed" actually were reduced to a flat, featureless plain that once was the center of Hiroshima.

Difficult To Believe
It was difficult to believe that a single bomb, with the explosive force of 20,000 tons of TNT, had caused the havoc.

The size of the atomic bomb or the height from which it was dropped by the Superfortress, "Enola Gay," were not revealed.

There was no comment at Guam on the radio Tokyo report that it was attached to a parachute and burst over the city with cataclysmic force.

Here and there in the trackless plain were tiny protrusions, like pumies. Intelligence officers, analyzing the photographs, said that these probably were the remains of reinforced concrete structures.

Around the center of complete destruction were huge irregular bare patches as though a mysterious force reached out from the point of the bomb's contact to crumble whole city blocks to Hiroshima's edge where some semblance of the man-made metropolis remained.

Reconnaissance photographs taken by the "Enola Gay" at the time of the shattering explosion showed the center of Hiroshima dissolving in a vast cloud of dust.

Smoke 10,000 Feet High
From the center of this dark, crawling mass emerged a column of almost pure white smoke, billowing funnel-shaped into the sky.

Successive photos showed a column of smoke mushrooming upward and outward, while another mushroom of smoke puffed up from below. The smoke rose in a column to 10,000 feet and then billowed upwards to 40,000.

The atomic explosion pumped six rivers in its path. Four black-wide streams, running through Hiroshima, merge into two wider streams, each about the width of four city blocks. These would have made natural fire breaks, in normal times.

Some bomb attacks which only a few days ago were considered the most dreadful weapon man's mind could devise.

The destruction in Hiroshima was summed up accurately by Col. Paul Tibbets, Miami, Fla., pilot of the "Enola Gay."

"The only way we could tell a city had been there was because we had seen it only a moment before."

PETAINE'S DEFENSE BEING PRESENTED

(Continued From Page One)

Petaine opposed sending the German military aid in Syria which the Germans requested following the North African landing.

Opposed Nazi Demands
Petaine was described by Bergeret as constantly opposing German demands for the use of French fighter planes.

Beginning in 1941, Bergeret testified, the Germans demanded that Petaine release the French air force for the defense of Paris and the channel ports against the Allies.

Petaine refused these demands, preventing outright French collaboration with the Germans. He added that the secret French air force comprised 27 groups of which 25 were fully equipped. He said the force totaled 19,000 men.

Petaine, on trial for treasonable activities during his tenure, has contended that he would be cleared of the charges if the full story of the past were told by Britain.

IN MEMORIAM

Deaths of the Day

(Continued From Page One)

John Ponick, of 1012 South Jefferson street, died in the New Castle hospital, Tuesday at 6 p. m., from a heart attack.

He was employed at the P. & L. E. railroad. The body is at the Joseph B. Leyde mortuary, Highland at Winter.

Funeral arrangements will be announced later.

Mrs. Catherine Ryan Calahan
Mrs. Catherine Ryan Calahan, aged 90 years, of 703 West Washington street, died this morning at 11:15 o'clock following a three days illness.

She was the widow of Patrick J. Calahan, who died 24 years ago.

Mrs. Calahan was born in New Castle, daughter of Michael and Mary Ryan. She was a member of St. Mary's church.

Surviving are the following children: J. Frank Calahan of Parkersburg, W. Va., and Howard T. Calahan of this city; five grandchildren and four great-grandchildren; a brother, Philip of Brookfield, Mo. A son, James Lee, died in 1937.

The body is at the Zeller funeral home, North Beaver street, where friends may call tonight 7 to 9 o'clock and Thursday 2 to 4 p. m. Funeral arrangements are incomplete.

Elizabeth May Rupp
Miss Elizabeth May Rupp of New Bedford died at her residence Tuesday afternoon at 12:30 as the result of a heart attack.

Born in New Middletown, O., on June 28, 1877, she was the daughter of John and Savilla Miller Rupp. Miss Rupp had lived in New Bedford for the past 52 years and was a member of the Hopeful Presbyterian church and the Friendship Bible class.

Surviving are a brother, Perry, of New Bedford, and a sister, Mrs. Silas Sears, of Coatsville, O. Funeral services will be held in the Hopeful church, Thursday at 2:30 p. m., with burial in Evergreen cemetery. Dr. R. W. Veach will officiate at the service.

The family will receive friends at the Kelly funeral home in Hubbard, O., Wednesday evening and the body will be in state in the Hopeful church from one o'clock Thursday afternoon until time for the funeral.

White Funeral
Funeral services for Robert W. White, New Castle R. D. 6, were held from the R. L. Boyd funeral home, North Jefferson street, Tuesday at 1 p. m., with Rev. J. M. Blackwood, pastor of Oak Grove U. P. church in charge.

Interment was in Mt. Hermon cemetery.

Palmer's
Funeral services for Robert M. Palmer, Joseph Myers Richard, Raymond Young and Raymond Kline.

Reider Funeral
Funeral services for Andrew Reider, 2307 Albert street, were held from P. L. Boyd funeral home, North Jefferson street, Tuesday at 1:30 p. m., with Rev. Owen W. Shedd, Croton Methodist church and Rev. Roy R. McKnight, First Methodist church in charge.

Interment took place at Oak Park cemetery.

Palmer's
Funeral services for J. G. Clement, Claude McMillan, Norman E. Clark, Arthur McKee, Robert R. Garvin and Edwin E. Marshall.

Thomas Minutelli Funeral
High mass of requiem for Thomas Minutelli, aged 49 years, of R. D. 2, Albion, Pa., who died on July 21, were held in St. Vitus church on July 28. Interment was in St. Vitus cemetery.

Mr. Minutelli was born in Cleveland, Pa., September 12, 1895. He was a retired worker of the Pennsylvania railroad and was a member of St. Lawrence church, Albion.

Surviving are his wife, Mrs. Josephine Minutelli, and daughters, Theresa and Antonella, his mother, Antonella, and his brothers, three brothers, Tony of New Castle, Alfonso of Erie, and Dominick of New Jersey, and four sisters, Mrs. Felix Cervone, Mrs. Tony Perrella, Mrs. Frank DeVita of Edinburg and Mrs. John Warren of Besenier.

Mrs. Swaine's Funeral
Funeral services for Mrs. Anna Swaine, 1411 Water street, were held Tuesday at 9:30 a. m. at the J. J. Nova funeral home, Rev. P. William M. Pharoek in charge.

The body was sent this afternoon at 1 o'clock to Detroit for interment.

Hughes Funeral
Funeral services for Daniel Hughes, Sr., of 1208 Clearview avenue, were held from the Joseph B. Leyde mortuary, Highland at Winter, at 2 p. m., with Rev. Griffin Thomas in charge.

David Rees sang a solo during the services, with Mrs. John Evans accompanying on the pipe organ.

Palmer's were: Sam Matthews, William Powell, Thomas L. Jones, John H. Evans, Lew Morris and Isaac Isaac.

Interment was in Oak Park cemetery.

Mrs. Nora Stoner
Mrs. Nora Stoner, aged 84 years, of 1411 Water street, died in the New Castle hospital Tuesday evening at 11:30 o'clock. She was the widow of William Stoner.

Mrs. Stoner was born in Perry township August 13, 1860, daughter of Joseph and Alena Wimer Hall.

She leaves a brother, F. G. Hall.

The body is at the Joseph B. Leyde mortuary, Highland at Winter, where the family will receive friends tonight and Thursday night. Funeral services will be Friday at 2 p. m. from the funeral home.

No satisfactory results can be achieved by applying paint or enamel to a heating stove. The good old-fashioned stove polish still makes the best dressing for metal that must withstand intense heat.

IN MEMORIAM

between men and women killed by the fire. The corpses are too numerous to be counted.

An earlier broadcast, headed "Atomic Bomb Causes Havoc," stated that the atomic bomb in the city, crisscrossing houses and buildings.

Burned Beyond Recognition
All of the dead and injured were burned beyond recognition," said the broadcast recorded by the FCC.

Authorities still are unable to obtain a definite check on the extent of the casualties, and authorities are having their hands full in giving every available relief possible under the circumstances, the broadcast continued.

The effect of the bomb on Tokyo "will be far-reaching," said the broadcast, "and will be widespread according to the Japanese." "Those outdoors burned to death, while those indoors were killed by the indescribable pressure and heat."

In the destruction of property, even emergency medical facilities were burned out, said Tokyo, and relief squads were unable to enter the area from all surrounding districts.

Premier Kato Suzuki summoned a special cabinet meeting to hear a report of the fearful damage.

Hiroshima Seismologist, chief cabinet secretary, gave the details of the destruction to the cabinet members, who assembled in Suzuki's study. Vice ministers and ministers also attended the cabinet meeting.

The 30-year-old prime was serving as Japanese army officer, according to the dispatch recorded by the FCC.

SUPERFORTS IN THREE STRIKES AT JAP ISLANDS

(Continued From Page One)

Both targets were bombed twice in clear weather. The main body of the force hit the aircraft plant and a smaller group bombed the already damaged aerial area.

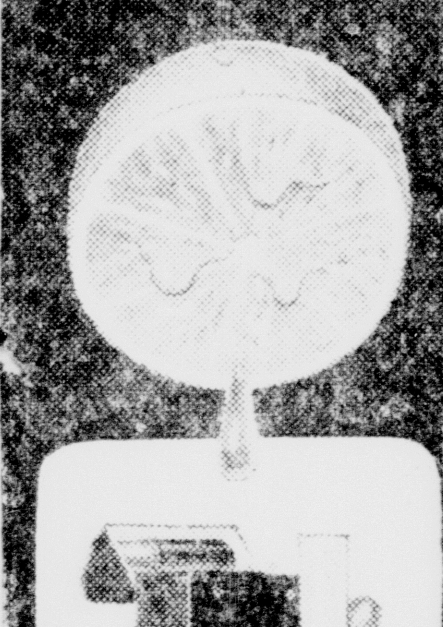

The aerial area was burned over in an incendiary attack on April 14.

Yawata First Target
Yawata was the first Jap home-land target ever struck by the Superforts. The big steel water was first hit on June 14, 1944 by China-based Superforts which followed up with two subsequent attacks.

GILL BROWN CLASS EVENT FOR TEACHER

On Tuesday evening members of the Gill Brown class of Central Presbyterian church, their families and guests gathered at the home of Mr. and Mrs. George Hudson, Jr., Youngstown road, for a three-course dinner.

Guests of honor were Mr. Brown, teacher of the class since its organization; Mrs. Brown and their children; Mrs. Robert Hudson and Harold, who will leave next week to take up residence in Pittsburgh.

Dinner was served at three tables on the lawn where places were set for 70.

Musical, baggins and volleyball were in play during the evening and continued after dark by means of floodlights.

Mr. Brown was presented with a handsome gold watch chain in appreciation of his faithful teaching.

Mrs. Hudson's aides were Mrs. William Stoner and Mrs. John Gallagher.

Special guests were Mr. and Mrs. Willard Bowden and daughter Janet of Cleveland, O.; Mrs. Louise Jacob, Clare Kelo, F. L. and Mrs. Kelo, Mr. and Mrs. Frank Kelo, Mr. and Mrs. Alfred Kelo, Mr. Charles Gallagher and Dale Melke, all of New Castle.

EAGLES AUXILIARY PROGRAM OUTLINED

Ladies' Auxiliary to the P. O. E. met Tuesday evening at the Eagles hall when plans for the fall program were outlined with Mrs. Olive Key, president, presiding.

Announcement was made that Mrs. Mulda Rodgers has been appointed to serve on the social committee of which Mrs. Alvin Herberg is chairman. Projects for the auxiliary's charity and welfare work are in charge of this committee. The group will start its fall work in this connection during the week of August 20.

A donation was voted to Fr. Flanagan for a special fund for the "returning sons" of Boys' Town.

Social period for the evening was in charge of Mrs. Edward Eckert and committee, Mrs. William Schell, Mrs. Charles Brown and Mrs. Frank Peterson.

E. N. C. MISSION PLANS REUNION

Seventh annual reunion of the former East New Castle mission will be held Thursday evening at the home of Mr. and Mrs. Oscar Graft, East New Castle.

Supper will be served at 6 o'clock with Mrs. Graft as chairman of the table committee. Ted Watson is chairman of the sports committee and Scott Kerr is president.

CASTLE HILLS CLUB LADIES DAY CONTEST

On Thursday at Castle Hills, ladies day will take the form of a picnic at noon preceded by golf with tee off time 9 a. m.

Mrs. Arden Benoit and Miss Eleanor Bolinger will be hostesses.

Thursday
London Bridge, Mrs. Joseph Davis, R. D. 2.
E. O. W., Mrs. Carrie Mortimer, 1214 East Washington street.
J. E. F. E. Harold McCartney, West Greifeld avenue.
Happy Group, Mrs. Joseph Bordonaro, Northview avenue.
Amenita, Mrs. Norman Cusino, Huey street.
E. L. V. E. E. club.
Reunited Ladies, Mrs. Ed Campbell, Boston avenue.
1945 Victory, Cascade park.
Buene Amici, Mrs. Teresa Guidio, Mill street.
G. N. M., Mrs. Christine Lombardo, Lutton street.
L. A. M., Mrs. Mary Vaughn, East street.
Semper Fidelis, Cascade park.
Ki-Nu, Mrs. Rose Gilliland, West Washington street.

Son Born To Former Residents
Birth of a son, who has been named Terry Edwin, on July 26 at Westmoreland hospital, has been announced by Mr. and Mrs. George E. Malsie of Greensburg, former residents of New Castle.

The baby is a grandson of Mr. and Mrs. J. R. Massie of South Ray street, and a great-grandson of Mrs. Georgiana Massie of East Grant street, and Mr. and Mrs. J. E. Pettin of Chestnut street.

Engagement Told
Mr. and Mrs. Louis Zona of 118 Center street have announced the engagement of their daughter, Christina Zona, and Albert Rich, son of Mr. and Mrs. Nicholas Rich of East Brook road.

The engagement was announced at a gathering at the Zona residence on Mrs. Zona's birthday recently.

No date has been set for the wedding.

Freinstein-Slater
Miss Lida Elizabeth Freinstein, daughter of Mr. and Mrs. Fred Freinstein of 12 West Lawrence street, and Brewster C. Slater of P. D. 3, were married at 6:30 Tuesday evening by Alderman Margaret M. Ornes at her home, West Washington street.

The couple was attended by Mrs. Irene Freinstein, sister of the bride, and Mr. Freinstein.

Whinnery Reunion
Members of the Whinnery family will have their 50th annual reunion at Centennial park, Salem, O., on Sunday, August 19. Mrs. Maude Whinnery Hamilton of this city is a member of the historical committee. The program will be in the Quaker church there.

Simon Relief Corps
Members of the Louis E. Simon Relief Corps No. 11 met in the 1600 room, Neshaunock avenue, Tuesday evening. A donation was made to the Revokville, Pa. home. Plans were made for a picnic at Cascade park Tuesday, August 21, at 6 p. m. at shelter 4.

The word "earnation" is thought to come from coronation as the flower was much used in wreaths to celebrate marriage.

FAREWELL PARTY FOR WAVE ENLISTEE

Miss Betty L. Gray of 610 Taylor street entertained at her home on Tuesday evening for her niece, Miss Dorothy Dodds, of Beckford street, who leaves today for training with the Waves at Hunter College, New York City.

Games were a diversion during the evening and later refreshments were served at a table decorated with a patriotic color scheme of red, white and blue candles and flowers and small flags. Mrs. Lorrin Gray assisted the hostess.

Mrs. George Dodds of Monaca and Mrs. James Gilmore and her daughter, Miss Sonia Gilmore of Youngstown were out-of-town guests.

Miss Dodds has been entertained at several farewell events since announcement of her enlistment in the Waves.

PICNIC AT PARK FAREWELL EVENT

As a surprise farewell event for Mr. and Mrs. Berkeley Dillon, members of the Cambridge club entertained with a picnic dinner at Cascade park, Grove on a recent evening. Dinner was served at 7 o'clock to 35 members and several guests.

Mrs. Selby Moore and H. M. Stevens were in charge of arrangements.

Mr. and Mrs. Dillon and their son, Berkeley, Jr., plan to leave August 15 to take up residence in Redlands, Calif.

The guests of honor were presented with a gift of luggage on behalf of the group by Selby Moore. He accompanied the presentation with a brief farewell speech.

Mrs. William Wace of Cambridge, O., and the Misses Ethel Koch and Loraine Donovan of this city, were guests.

PANTHERETTE CLUB PLANS ACTIVITIES

Pantherette club members met Tuesday evening in the home of Mrs. A. J. Capezio, Agnew street, with president, Mrs. Louise Gaspare in charge. A corn and butter roast was planned to be held soon.

Card playing was the pastime, high score prizes going to Mrs. Andy Marape, Mrs. Anthony Ambrose, Mrs. Joseph Puno, and Mrs. James Fuleo in charge.

A hunkie shower was held with Mrs. A. J. Capezio and Mrs. Ralph Morelli being honored. They were also co-hostesses on this occasion and served a dainty lunch later.

August 21 is the meeting at Cascade park, weather permitting. Hostesses will be Mrs. Robert Puno, Mrs. Joseph Puno and Mrs. Joseph Puno.

CONTEZZO WEDDING THURSDAY

Miss Pauline Conze, daughter of Mr. and Mrs. William Conze of Wabash avenue and Cpl. Arthur Ezzo, son of John Ezzo, South Lafayette street, will be united in marriage Thursday morning at 9:30 o'clock in an "open church wedding" in St. Lucy's church.

Open house reception will be held in St. Margaret's hall, North Liberty street, at 7:30 p. m.

DiCARLO DeJOSEPH ENGAGEMENT NEWS

Mr. and Mrs. Benny DiCarlo of 401 Pearson street announce the engagement of their daughter, Elma, to Sgt. John DeJoseph, a returned veteran and son of Mr. and Mrs. Anthony DeJoseph of 1117 Croton avenue.

The engagement will terminate in a wedding in the near future. Sergeant DeJoseph is on leave on a 30-day furlough.

K. E. SMITH CLASS TO PICNIC THURSDAY

K. E. Smith class of the Central Christian church will meet at the home of Mr. and Mrs. Norman Zeigler, 230 West Moody avenue, for a 6:30 o'clock picnic on Thursday evening.

Mrs. Tom Evans, Mrs. Elmer Glass and Mrs. Austin Cowenow are the committee in charge of arrangements.

GRANATO YARVI ENGAGEMENT NEWS

Mr. and Mrs. Frank Granato of R. D. 1, announce the engagement of their daughter, Annie Marie, to Pfc. Raymond Yarvi, son of Mr. Hilma Yarvi of Sharon.

No date has been set for the wedding.

HUTCHISON REUNION AT WILMINGTON PARK

Descendants of Joan and Eliza Swezy Hutchison will have their annual reunion on Friday evening at 6 o'clock at New Wilmington park in the form of a basket picnic.

Motorists Are Lazy, Traffic Head Says

PITTSBURGH, Aug. 8.—One of the city's greatest traffic problems is caused by the car operators' laziness, according to Donald M. McNeil, traffic engineer of the city of Pittsburgh.

McNeil, who heads a committee of six traffic experts making a three-month survey of postwar traffic problems in Pittsburgh, declared yesterday:

"The average American, studies show, won't walk more than 1,500 feet from the place he has parked his car to the place of business he wants to patronize. This is why we have such a traffic and parking problem in Pittsburgh. Of the 15,500 off-street parking spaces in downtown Pittsburgh, only 657 are within 1,500 feet of the center of the business district."

Officials estimated hundreds of dollars have been spent recapturing youths who have escaped from the home.

RESCUES BABY FROM FIRE

PITTSBURGH, Aug. 8.—INS.—Near tragedy marked the first birthday anniversary today for Christine Onizki.

Christine was trapped on the second floor of her uncle's home in Lawrenceville when fire broke out. Her cousin, Betty Wojno, 28, dashed through dense smoke and rescued the tot before she was harmed.

PRISONER OF WAR IS SOUGHT HERE

Federal Bureau of Investigation agents, state police and city police today were searching this district for Alfred Neehring, 25, German promoter of war who yesterday fled Camp Sheffield near Kane. He was described by the FBI as follows: height, 5 feet 8 inches; weight, 140; skin, light; eyes, blue; clothing, blue denim, marked "P. O. W." Neehring cannot speak English.

BUILD F. D. R. MONUMENT

KINGSTON, N. Y., Aug. 8.—The plain white marble monument Franklin D. Roosevelt requested is being built for the late president's grave at Hyde Park.

Bernie Broke of this city said it had received a contract for construction of the monument and that work had been started.

In accordance with Mr. Roosevelt's instructions, found after his death, the monument will be eight feet long, four feet wide and three feet high.

Woman Scientist Disclaims Idea Of Destructive Weapon

Austrian Woman Scientist Did Vital Preliminary Work On Atomic Bomb

By STEN HEDMAN
(U. S. Staff Correspondent)

STOCKHOLM, Aug. 8.—Dr. Lise Meitner, 68-year-old Austrian woman who did vital preliminary work leading to the atomic bomb invention, today disclaimed any belief that such a destructive weapon would result.

"I didn't think my experiments would end in the atomic bomb," she told International News Service in an interview at her home in a small Swedish village.

Professor Meitner, who said that newspapermen have been calling her day and night, expressed the fear that her contribution to the discovery has been exaggerated.

However, she and Dr. Otto Hahn of G. many were credited with being first to smash uranium nucleus. The woman, who has wide brown eyes and almost girlish movements, still speaks with a Viennese accent. She still is an Austrian citizen, despite nearly 22 years in Germany.

In Berlin

Arriving in the Reich in 1908, Meitner was assistant to the famous German Professor Planck at the institute of theoretical physics from 1912 to 1915. From 1917 to 1938, she was chief of the physical department of the Kaiser Wilhelm Institute in Berlin.

The Austrian scientist began her atomic research in 1930.

"We didn't think about bombs of killing weapons," Prof. Meitner assured this correspondent.

"But," she added, "I understood that leading men of the Nazi party at this time already calculated on the atomic bomb."

"Jew-baiting in Germany in 1938 forced me to leave the country, even though they didn't threaten me. I escaped to Holland without difficulties—it was just like a Sunday walk."

Scientists in Holland helped the professor and the Swedish atomic expert, Prof. Sigfrid, brought by to Sweden where she has been working ever since, with the exception of the time she spent in two journeys to Denmark.

Exonerates Officer For Wounding Boy

PITTSBURGH, Aug. 8.—INS.—Sub-Patrolman Oliver W. Mason, 41, of Pittsburgh, today described an eight block chase in which he wounded a 15-year-old youth who tossed a brick at him "just for fun."

Mason told Magistrate W. H. K. McDiarmid he wounded Carroll Davis, 15, of Pittsburgh, in the leg because he was fleeing in an attempt to evade arrest. He said Davis hurled a brick at him as he got off a street car near his home.

McDiarmid discharged a feigning shooting charge against Mason after Davis admitted throwing the brick.

FUEL OIL STILL On Restriction

WASHINGTON, Aug. 8.—INS.—The Petroleum Administration today issued decrees of heavy and home-heating fuel oil to large-scale East Coast consumers if the consumer has 30 days supply in inventory at the delivery will provide more than 60 days supply.

PAW said the action effective immediately is designed to assure minimum fuel oil for military and civilian needs. The restriction, however, does not apply to dwellings accommodating three families or less.

FLOWING WELL NEAR TRANSFER

GREENVILLE, Aug. 8.—An artisan well believed to be one of the very few of its kind in the county, was struck by drillers yesterday at the Harry Wilson farm located near Transfer in the Transfer-Clarksville road.

Robert Carroll, brought in the well at a depth of 75 feet and said it was the first of the kind he had struck in many years of well drilling.

The well has produced water at the rate of five gallons a minute since yesterday afternoon.

SEEKS DIVORCE

DETROIT, Aug. 8.—Rosalind J. Thomas, 35-year-old president of the United Auto Workers, C.I.O., has filed suit for divorce from Mrs. Mildred Waterman Thomas, his attorney said.

William Henry Galtman, the attorney, said he had been authorized by Mr. Thomas to file the action. Samuel Rose, who said the representative Mrs. Thomas, said the divorce would be entered.

They were married in 1937 when Mr. Thomas, then U. A. W. president, after serving as a worker in a Chrysler plant. He wife was a sewing machine operator at the same plant. They have one son, Frank 6.

World Must Find Way To Control Nuclear Energy

New Atomic Discoveries
Make Control Of This
Power Essential To
Survival

By MICHAEL GRIFFIN
U. S. Staff Correspondent

NEW YORK, Aug. 8 (INS)—It is one thing to destroy a Japanese city with an atomic bomb, but it is quite another thing to harness the same energy to operate an automobile in peacetime.

Prof. Carl Van Der Merwe, chairman of the physics department of New York university, used this comparison today to illustrate the great post-war problem created by the development of the atomic bomb.

Enormous Power

It is generally accepted that the development of the atomic bomb means that science has at last tapped nuclear energy, he said. "The power thereby made available is enormous."

But the bomb destroys. The problem now is to control the energy which is now being used for destruction. If we can harness that energy and keep it under control, the possibilities in this development are almost beyond comprehension.

But it will be difficult to build the harness. It will take time. I believe it can be done and that the day will come when we can control this great energy.

Could Obliterate World

"God help the world if this energy is not controlled. Mankind must hang together now and keep the peace, or the world will be obliterated."

Dr. Van Der Merwe emphasized

Famous to relieve MONTHLY FEMALE MISERY
(Also Fine Stomachic Tonic)
Lidia E. Pinkham's Vegetable Compound is famous to relieve not only monthly pain but also accompanying nervous, tired, hysterical feelings—when due to functional periodic disturbance. Taken regularly it helps build up resistance against such distress. Pinkham's Compound helps nature! Follow label directions. Try it!

Lydia E. Pinkham's VEGETABLE COMPOUND

that the development of the atomic bomb opens the door to a new epoch.

"The possibilities in mankind's use of nuclear energy are tremendous," he said. "A ridiculously small power plant, using this energy, could drive vehicles across the country, vessels across the ocean. It could operate factories; in fact it could do all the work that now requires vast quantities of ordinary fuel and power."

"Fully developed for peacetime use this energy could revolutionize life as we know it today. It could revolutionize the automobile industry or the utility industry."

"The industrial revolution of the 18th century will seem small beside development inherent in this great scientific achievement if we find a way to control the energy."

"That control will be a difficult job, but it will come in time, I believe."

Lions Club Hears Talk By Francis

Local Auto Dealer Sees Shortage Of
Mechanical Equipment And
Workmen For Some Time

William A. Francis, local auto dealer, gave an interesting talk to members of the New Castle Lions club at their noon luncheon meeting in The Castleton, Tuesday, in which he predicted that there is going to be a scarcity of mechanical equipment for several years after the war and that it will take a considerable length of time to train men to service the new developments which are going to come after the war is over. This will necessitate patience on the part of the American public, he stated.

Mr. Francis spoke on the subject "A new approach to mechanics." He traced the development of the automobile from a small scale to the tremendous output attained by the assembly line, and was one of the first to advocate and develop a shop where repairs could be made to automobiles, when the necessity for such a place was shown by the ever-increasing production of these vehicles.

Adrian Fisher, concert pianist, well known local artist, was a guest of the club and gave several delightful selections.

Other guests were J. G. Thomas of New York and C. L. Sellers of Meadville. N. N. Jaquish of the Bell Telephone company and George R. Gettings of the U. S. Employment office here were admitted as new members of the club.

W.P.B. Promises New Household Articles Soon

Limited Quantities Of Some Civilian
Goods Are To Be On
Market In Fall

WASHINGTON, Aug. 8 (INS)—American consumers received the welcome promise from W.P.B. today that limited quantities of some new household articles such as washing machines and vacuum cleaners, will be on the market by fall.

Fred M. Mitchell, director of W.P.B.'s consumer durable goods division, who announced the good news in the board's first demobilization report of reconversion progress, said that more products will be available next spring and summer.

"Sewing machines, vacuum cleaners, domestic washing machines and electric irons should reach the retail market in small quantities this fall," Mitchell asserted, "and also clocks in fairly large numbers by that time."

Volume In 1945
"Volume production of these and many other sorts of consumer goods is not expected to be attained until the spring or summer of 1946 and even then should not be sufficiently immediately to meet pent-up demands."

Mitchell reported that production of some consumer items, such as razors, heating-oil batteries and dry-cell batteries is almost equal to consumer demand.

"Reconversion is moving as fast as it can," he added, "for war production cutbacks following victory in Europe have not as yet resulted in the release of large numbers of workers or critical materials for civilian production."

Troublesome materials shortages were reported in sheet steel, gray iron castings, tin, wood, shipboard containers and chemicals and plastics used for flippers on bookbinding machines and other civilian goods.

ed until the spring or summer of 1946 and even then should not be sufficiently immediately to meet pent-up demands."

Girls from Six

Neighboring Colleges

Will Be Hostesses

College-going gals come to our Campus Center to get the low-down on up and doing fashions. After seeing hundreds of style-wise misses through four years of college, we've acquired the "know how" of smart dressing—and simplicity is the keynote. Choose your clothes in a classic mood, the kind of clothes that rate A-1 in fashion credits yet keep well within your budget. We're ready to fill your every need all the way from those important accessory details right up to your "big moment" formal.

Exquisitely tailored suits, slim skirts and beautiful all-wool sweaters in a bevy of colors to accompany you from class to class. Indispensable little wool dresses that have a capable air but are completely feminine from neck to hem. Handsome coats, casual jackets, lovely formals—but we can't begin to describe the bright array of magnificent fashions that cater to college days. Come in and see for yourself. You'll find them all gathered together for your approval in our Campus Center.

Little Theatre Of Butler Buys Campbell's Barn

BUTLER, Aug. 8.—Butler Little Theatre has a new home, the building known here as Campbell's Barn. Purchase by the Butler Little Theatre group, now five years old, was negotiated by Edward O. Lee from the Jennie Campbell estate

through the trust department of the Butler Savings and Trust Company. Members of the Little Theatre will do the job redecorating and altering the building into a place where the group can present plays to the public, come for meetings and have parties. Plans are for a stage and auditorium to seat 200 persons on the first floor, an office, kitchen, library, clubroom and foyer on the second floor, with space on the third floor for stage properties and costumes, and, possibly, dressing rooms.

ATOMIC BOMB IS
NO INSPIRATION
FOR BABY'S NAME
PITTSBURGH, Aug. 8 (INS)—Despite its momentous impact on the world at large, the atomic bomb proved to be a dud to the new mothers of Pittsburgh. None of them has even attempted a play on "atomic" to discover names for their newly-born children. Perhaps, Pittsburghers aren't scientific-minded.

RESIDENT SUES
PITTSBURGH FOR
FALL ON SIDEWALK
PITTSBURGH, Aug. 8 (INS)—The city of Pittsburgh today faced a suit for \$25,000 damages brought by Richard B. Duncan, Pittsburgh, for a birth allegedly sustained last December 14 when, riding on a sidewalk, Duncan said he suffered a three-inch fracture of his right leg as well as other injuries.

Improvements Are In Progress

Many Of Street Resurfacing
Projects Completed—
Other Contracts Are
In Progress

James Gibson, director of public improvements, today reported completion of a city and state thoroughfare improvement project which has resulted in New Castle now having splendid main thoroughfares. However, there are other improvements under way which will be beneficial to residents.

Here are the improvements completed:

City improvements: resurfacing County Line street between Mulberry and Ray streets; Ray street between East Washington street and the top of Ray street hill.

State improvements: resurfacing Washington street between Croton avenue and Sanket street (includes public square); Moravia street between Long avenue and city line; one inch repair top; Highland avenue between E. Washington street and city line; one inch repair top.

East Washington street between Butler and Marshall avenues; Croton avenue between East Washington and Cascade streets; North Jefferson street between Public square and Grant street.

Other Projects

City and state projects now under way: widening of State street hill. The city is installing curbs and a sidewalk on the latter on the south side and the state will install a concrete base and asphaltic top on the widened portion.

The city will complete the sanitary sewer in Park avenue near North Mercer street this year. However, the contractor for the new storm sewer in what is known as Park avenue hollow has not commenced work but will soon.

Work is under way on the main sanitary sewer between South Cedar street and the disposal plant and thence to the river.

Director Gibson also announced that the city has employed a weed cutter to remove weeds between curbs and sidewalks and at intersections.

Street employees were removing some dirt from the south side of Croton avenue extension of Ne-shannock creek where the bathing pool is located. Benches will be placed there and grass planted to beautify the section next spring. Dirt now being removed is used to fill in depressions caused by recent rain storms.

Germans Sought To Secure Facts On Atomic Bomb

F.B.I. Discloses Four-Year Battle
To Prevent Nazis Gaining
Secrets In U. S.

WASHINGTON, Aug. 8.—(INS)—The F.B.I. disclosed today the details of a four-year undercover fight to keep Germany from learning the American secrets of the atomic bomb.

The attempt of German agents proved unsuccessful, due in large part to the agents themselves, who double-crossed their employers and went over to the Federal Bureau of Investigation.

Five of the key German spies, all trained at the German intelligence school at Hamburg, and sent here specifically to learn what they could about atomic experimentation were apprehended upon reaching the United States. They agreed to work instead for this government.

Turned States Evidence
They in effect turned state's evidence to escape prosecution and possible execution. They worked hand-in-hand with the FBI without the knowledge of the German ABWEHR, the Nazi intelligence.

Wireless sets were set up by the FBI and ostensibly operated by the five agents, who arrived in the country between February 8, 1940 and October 12, 1944.

"We were not only able to keep the Germans in the dark about what we were doing," it was explained, "but we were able to learn what progress the Germans were making on their atomic experiments from the queries they sent over."

"Double Agents"
The Germans apparently had no inkling that their five key operatives were working as "double agents" for the United States government. As late as February, 1945, a few months before the end of the war in Europe, the Germans kept pressing for information from their agents.

So successful was the FBI in breaking up German efforts that not one sabotage attempt was made against the plants at Oak Ridge, Tenn., Pasco, Wash., and the New Mexico project where the atomic bombs were manufactured or against numerous laboratories where experimentation was going on.

"There was no indication either," said an FBI spokesman, "that they had any inkling of the secret code name 'Mathdriten' District Project which cloaked the work on atomic fission."

As an added precaution, key scientists were constantly guarded by the FBI.

FBI records disclosed that the first of the five agents—dubbed by American agents as "Harry Sawyer," an alias—began training for the work in Hamburg as early as July 1939, several months before the outbreak of war.

President Will Award Two Medals

Two More Soldiers Back From Ger-
many Will Get Congres-
sional Medals

WASHINGTON, Aug. 8.—(INS)—A 30-year-old Chicago filling station operator and a Mexican cotton farmer from Texas were designated today to receive the congressional medal of honor for extreme heroism in action against the Germans.

Award of the nation's highest decoration will be made by President Truman to T-Sgt. Robert E. Gerstung of Chicago and S-Sgt. Marcelito Garcia, 25, of Sugarland, Tex.

Sgt. Gerstung, pinned down near a shattered line pillbox by mortar and tank fire, held off a German attack until other members of Company H, 313 infantry, 79th division, were able to withdraw 200 yards to defensive positions. He was wounded in the leg.

Garcia, who left Mexico when he was three years old, became a citizen after his return from Europe last month.

The Mexican youth alone knocked out two German machine guns, using grenades and a rifle. He killed six Germans in eliminating the weapon which had pinned down B company of the 22nd infantry, fourth division in the Herten fort area of Germany last Nov. 22.

Cannery Crop Records Reach New High In '44

HARRISBURG, Aug. 8.—Four new all-time records for state inspection of cannery crops were established in 1944 by the Bureau of Markets, State Department of Agriculture, according to D. M. James, supervising inspector.

Apples, peas and lima beans handled in state inspections last year were such that they more than doubled the amounts passed by inspectors during the previous year. Apples inspected totaled 137,034,990 pounds, compared with less than 50,000,000 in 1943. Pea inspections totaled 11,885,000 pounds compared with 5,553,000 pounds in the previous year. Inspection of lima beans for processing totaled 294,000 pounds compared with only 163,000 in 1943.

In total poundage, tomatoes far exceeded all other fruit and vegetable inspections. A grand total of 201,134,000 pounds was more than 3,000,000 in excess of the amount handled by inspectors during the previous year.

As of July 1, 1945, indications pointed toward considerable expansion in the inspection of Pennsylvania canning crops, particularly on peas, tomatoes and lima beans. The prospects for fruit crops, however, were not favorable due to freezing weather at blossoming time.

Uniform Rules For Motor Boating On Pymatuning Sought

HARRISBURG, Aug. 8.—W. R. Wheelerlock of the Ohio agricultural division, still here with the state water and power resources board tomorrow to consider adoption of uniform regulations covering use of motor boats on Pymatuning lake.

Wheelerlock is chief of the lands, landscaping and recreation section in the agriculture division.

W. E. Kirkpatrick, water board secretary, said the board would discuss such regulations as speed, restricted areas and registration of boats.

"There are in effect now certain regulations in respect to boating on Pymatuning," he said, "and these will have to be discussed and reviewed and possibly modified to a certain extent."

Since the lake is situated in both Pennsylvania and Ohio territory, Kirkpatrick said the two states would try to work out uniform rules.

Use of motor boats of six horsepower or less on Pymatuning was authorized by the 1945 legislature in both states. A similar congressional authorization recently was signed by President Truman.

President Gets New Reports On Bomb Effects

WASHINGTON, Aug. 8.—(INS)—Secretary of War Stimson had a lengthy conference with President Truman today and gave the chief executive new reports on the devastating effect of the atomic bomb on Hiroshima.

"I gave the president some additional information on Hiroshima," Stimson said, "but I cannot say what it was."

ATOMIZER FOR JAPS
DETROIT, Aug. 8.—(INS)—The Detroit Times commented editorially today on the atom bomb.

"We're fighting the Japs with an atomizer,"

Probe State's Proper Share Of Road Costs

HARRISBURG, Aug. 8.—(INS)—An investigation to determine the state's "proper share" of highway construction and maintenance costs was launched at the state capital today by a sub-committee of the joint state government commission.

Sen. John G. Snowden (R), coming, chairman of the Senate highways committee, was directed to supervise the survey under a \$50,000 appropriation.

"We want to determine what part of the cost of construction restoration of the highway system the Commonwealth should bear," he stated.

Another group charged with probing alleged sharp practices by finance companies was prepared to schedule September hearings during its initial meeting also.

ROY BITTEN BY DOG
John Mrozek, 501 Chestnut street, reported to police yesterday his four-year-old son received lacerations of the legs when attacked by a dog assertedly owned by Anthony Di Nucci, 511 South Ray street. Urges Sportsmen Help Harvesting

HARRISBURG, Aug. 8.—(INS)—The State Game Commission today issued a call for Pennsylvania sportsmen to aid farmers harvest vitally needed food for the fighting forces and liberated countries.

In a plea made for the third year the commission pointed out "this year the problem is a bigger one. Grain is being left standing because, in sections where food is scarce and living conditions crowded, transient farm workers will not stay and work."

"It is up to the sportsmen to see the farmers through again this harvest season," officials asserted.

Block signal systems on railways today are a modification of the early semaphore.

Atomic Studies Were Centered On Chicago's Campus

World's Greatest Scientists Worked
In Secret On Midway Of
Teeming School

CHICAGO, Aug. 8.—(INS)—The University of Chicago, aided by several thousand of the world's great scientists, technicians and research workers, today was revealed as the nerve center of atomic bomb experimentation for the last two and a half years.

Paper Work Destructive
It was on the university midway that paper work, theoretical experimentation and coordination of theories took place so that the most powerful destructive force in history finally could be produced.

Other universities in various parts of the world also contributed to the bomb's development.

Secretary of War Stimson said that research which made the bomb possible also was done at Columbia University, the University of California and Iowa State college.

But the greatest physicists, chemists and mathematicians of the nation, as well as refugee scientists from conquered countries and Germany itself, came and went on the University of Chicago campus, their movements sometimes camouflaged or cloaked in the deepest secrecy.

Einstein and Others
Among them were Dr. Albert Einstein, physicist and mathematician, who developed the theory of relativity; Dr. Rudolf Ples, German mathematician; Franz Eugene Simon, German physicist; Dr. Enrico Fermi, Italian physicist, 1938 Nobel prize winner and member of the Columbia university faculty; and Dr. Niels Bohr, Danish scientist.

Dr. Venner Bush, head of the office of scientific research and development, was understood to have participated in the work on the midway.

Nobel Prize Winners
Others included Dr. Ernest Orlando Lawrence of the University of California, who developed the cyclotron, the atom-smashing machine, and won the Nobel prize in 1939.

Four men presumably were on the ground floor of the work at midway. One was Dr. Arthur H. Compton, Nobel prize winner and head of the physics department until he was named chancellor of Washington University in St. Louis July 1.

Another was Prof. Paul J. Demarest, who discovered the substance known as U-235 which is derived from uranium.

Prof. William H. Zeharisen, acting head of the University of Chicago physics department, and Dr. Robert M. Hutchins, the chancellor, also were acquainted with the progress of the work.

Prof. William H. Zeharisen, acting head of the University of Chicago physics department, and Dr. Robert M. Hutchins, the chancellor, also were acquainted with the progress of the work.

THE PARENT PROBLEM

(Continued From Page Four)

quired lest he should learn early to juggle accounts. An allowance plan makes for each necessary group of expenditures needed for the period say a week before it is spent.

As the child grows older, he will have more regular, necessary expenditures. Gradually, too, he might include in this allowance an amount for certain items of clothing and eventually have a complete clothing budget to cover six months when the allowance period could be six months, say in senior high school. Also as the child grows older he will gradually need more "free money" in the allowance. However, most parents increase this item far too rapidly.

When the child earns money, his earnings also should be budgeted. Let any increase go in the direction of general savings or savings toward the purchase of some useful things or services, not toward added luxuries.

Sgt. Sovesky Has
Completed Over
5 Years In Army

Sgt. Chester Sovesky recently received an honorable discharge at the separation center, Jefferson barracks, Mo., under the point system.

By coincidence he enlisted on his birthday, January 30, 1940, and has had nearly five and a half years service with the U. S. Army Medical Corps, including 2½ years overseas. He served for two years in Puerto Rico as a laboratory technician and nearly six months on hospital ships in the ETO area as a medical technician.

Sgt. Sovesky was awarded the Bronze Star for the western Europe campaign and the Good Conduct Medal.

Chester Sovesky is the son of Mr. and Mrs. Stanley Sovesky of R. D. 4. He is looking forward to the full-time of his youngest brother, Flight Officer Thomas V. Sovesky, whom he hasn't seen for 4½ years. Lt. E. W. Sovesky, somewhere in the Philippines, is another brother whom he hasn't seen for an equal length of time.

Okinawa Troops
Believe War's End
Hastened By Bomb

OKINAWA, Aug. 8.—(INS)—At least 150,000 Japanese were estimated today to have been killed Monday in the atomic bombing of the Japanese city of Hiroshima.

The estimate was made by Lt. Col. Bob Herling, Battle Group, 7th, and several other officers after viewing new reconnaissance photographs taken of the devastated city by OKINAWA-based planes.

The latest reconnaissance photographs failed to show any buildings or walls standing anywhere in Hiroshima.

The southern Honshu city was leveled flat.

The scene of devastation created a great furor among troops who now believe the end of the war is in sight.

They can't imagine that even the Japanese will be willing to see their entire nation wiped out by atomic bombs.

The only question in the minds of soldiers on Okinawa is: "How many atomic bombs have we got ready?"

Hiccough Champion
Begins Her Third
Protracted Siege

MCKEESPORT, Pa., Aug. 8.—(INS)—Miss Angelina Lincette, 26-year-old McKeesport civilian, was today in her third protracted siege of hiccoughs, today an attack which her doctor said makes her the "undisputed hiccough champion" of the Pittsburgh district.

Twice before, Miss Lincette has been attacked by hiccoughs—the first time in 1941 shortly after Pearl Harbor, and the second time in January of 1943. The first attack lasted 21 days and the second 15 days.

Hundreds of "cures" have been sent to Miss Lincette but none so far has worked.

Big Assortment Of Articles And Things Lost Here

Lost Column On Tuesday Sets
Some Kind Of Record Locally Is Belief

New Castle residents have had a difficult time holding on to their belongings this week, according to the size and variety of the Lost and Found column of The News on Tuesday evening.

In fact, it wasn't even a Lost and Found column—it was strictly "Lost." Fifteen separate articles, including gold naval air wings, a Filipino coin bracelet and, of course, a ration book were in the list.

"Lost or strayed," a gray angora cat named Tommy is missing from home; other animals in the column were a black, white and tan female beagle hound and a brown and white dog, part shepherd and part police, who answers to "Trixie."

Money is always an item, and in Tuesday's column it was five items: a small black change purse with \$40 in it, an allotment check for a serviceman's wife, a store payment book and a savings account book with \$41 in cash, a brown billfold with a license, papers and money; and another brown billfold, this one with gas stamps, too.

Completing the list were a set of two keys with a small license tag, a bracelet with thimble settings, a gold closed-case watch, and a pair of girls' blue palamas. Monday must have been a record day for setting rid of one's possessions.

Businesses Which Use Tins Must Now Save All Containers

HARRISBURG, Aug. 8.—(INS)—Hotels, food processors and industries using tin cans were notified today by the War Production Board's state, always, accumulative they must save tin containers for reclamation.

"A new War Production Board order makes it mandatory on canners, food processors and others who open the cans for the purpose of using or repacking their contents or who discard cans because of damage or their contents were defective to salvage their cans," said Secretary Colton S. Baker.

Violators are subject to fines or imprisonment and the loss of their licenses, he explained. Cans must be flattened and returned to collecting plants or salvage companies to be stored.

Local salvage companies have been alerted to collect all cans, new or old, in tin cans, Baker stated.

"No return to the tin situation today that WPA has been forced to tighten its restrictions on the use of tin several times," he pointed out.

Collectors dropped from 12,000 tons during the first half of 1943 to 1,800 tons this year, it was reported.

Nation Mourns As Major Dick Bong Is Laid To Rest

Military Funeral At Superior, Wis., Today For Late Pacific Flying Ace

SUPERIOR, Wis., Aug. 8.—(INS)—Flags flew at half staff today for the funeral of Maj. Richard I. Bong, America's ace of aces, in the same church in which he was married only last February 10.

His body, accompanied by his bride, the former Marjorie Ann Vantaugh of Superior, was flown in an Army C-54 transport plane from California where he met his death in the explosion of a new jet plane he was testing.

The sorrow of the nation at the tragic death of the likable, snub-nosed youth whom the Army took out of combat after he had shot down 40 Japanese planes so he "went get killed" was felt perhaps most deeply in his home community.

In Superior, where he took his bride and in Poplar, Wis., 20 miles to the east, his home town, business places were closed for the day and residents for miles around thronged to the funeral rites at the

Concordia Lutheran church, set for 2 p. m.

National tribute also was paid to the memory of the popular hero. An officer of the Eighth Army Air Force command in Washington, D. C., telephoned that a 30-piece band and a military escort of 16 soldiers were on their way. High War department officials were to attend, the message said.

M. M. I-C R. L. Booth Gets Medical Release

After serving for five years in the navy, M. M. I-C Richard L. Booth, Jr., a former resident of North Mercer street, this city, now living in Willard, O., has been given a medical discharge. M. M. Booth, who enlisted, was a member of the crew of the Tennessee at Pearl Harbor, when the Japs struck there. Since that time he has been serving on destroyers.

He is the son of Mr. and Mrs. Richard L. Booth, Sr. R. L. Booth, Sr., was general foreman of the B. & O. R. R., when the family lived here.

M. M. Booth, who visited Tuesday with Mr. and Mrs. James L. Cole, 136 East Sheridan avenue, plans to enter a school of combustion engineering at Cleveland, Ohio.

BRITISH CROWD HAILS MONTY

Britain's Field Marshal Sir Bernard L. Montgomery receives a rousing ovation on his arrival in Chiswick, England, from town-people who turned out to greet him. Bobbies are shown keeping the town-people back in check as Montgomery walked to ceremonies at which he was given the freedom of Chiswick and Brentford.

With Atomic Power, Car's Motor Will Be Size Of Man's Fist

NEWARK, O., Aug. 8.—(INS)—Automotive Expert William B. Stout said today interesting of the atom will eventually reduce automobile motors to the size of a man's fist. But it will take many years to develop such an engine, the Graham-Paige Motor Corporation research director said today. "I expect to have gasoline used as long as I live."

Compensation Suits Are Threatened

ALTOONA, Pa., Aug. 8.—(INS)—The CIO-United Railroad Workers of America announced today it had notified the Pennsylvania railroad that compensation suits estimated at over \$1,000,000 would be filed unless the company agreed to settle.

National Director A. R. Martin said 550 compensating claims have been referred to the union by employees in 14 states. "A fairly large number of these crippled and disabled employees are women who were coach cleaners, boiler helpers, machinist helpers and other shop employees," Martin said. The URPWA asked the Pennsylvania railroad for "all back compensation from date of injury and to such time as the future as prescribed by law; payment of all hospital and doctor bills; and full wages from the time of injury where wages are involved in any of these cases."

Builders Enjoy Weiner Roast

Members of the Order of Builders and their girl friends enjoyed their annual weiner roast, which was held last evening at Rambler's Rest, a large number being present for the occasion. A delicious roast was enjoyed and the after hours were spent in dancing and games. Master Builder James Breit has announced a meeting of the order for this evening at 7:30 o'clock in the Cathedral.

In 1940 there was an average of 44.2 inhabitants per square mile in the United States. District of Columbia average in that year was 10,870. Nevada, 1.0, and Pennsylvania, 219.4.

THE FIELD ARTILLERY has won fame, in this war, for its tremendous fire-power. Artillerymen wear the crossed cannon as their insignia.

Artilleryman of a field howitzer battery in Northern Italy. Sketched by Harold Von Schmidt.

THE ARMY KNOWS where a big share of Hanes production is going

Yes, a large proportion of our production is serving the Armed Forces. So, naturally, sometimes your dealer's stock of Hanes Underwear will be low. But we are both doing all we can to supply your needs, too.

HANES VALUES didn't just happen. For 44 years, Hanes has been knitting—and constantly improving—underwear that brings men added value at moderate prices. Hanes quality begins with the cotton we buy. We spin our yarns—knit them into garments that have won a nation-wide reputation for comfort and long wear. P. H. Hanes Knitting Co., Winston-Salem, North Carolina.

COMFORT FEATURES OF THE NEW HANES FIG-LEAF SUIT. Designed in one piece to give athletic support and waistline comfort.

FISHERS

WE DO NOT ALWAYS HAVE ALL SIZES IN "HANES" UNDERWEAR. THE ARMED SERVICES MUST COME FIRST.

Every year grain boats carry about 55,000,000 bushels of wheat down the Great Lakes from Duluth, Minn., and Superior, Wis.

Certain fungus domesticated by man is extinct in its wild state, just like the grains domesticated by man.

Battleship Iowa Is 'First Lady' Of U. S. Third Fleet

Has Travelled 150,000 Miles Chasing Japs From Marshall Islands To Japan's Shores

WASHINGTON, Aug. 8.—(INS)—The chief of the navy's bureau of ships described the mighty 45,000-ton battleship Iowa today as "first lady of the third fleet" because the hard-hitting dreadnaught has travelled 150,000 miles chasing the Japs from the Marshall Islands to the shores of Japan.

At the time, it was disclosed that the battleship—one of the world's largest—carried the late President Roosevelt to Casablanca for his conference with Prime Minister Churchill following her commissioning and shakedown early in 1943.

The Iowa has earned her title of first lady of the third fleet through the record she has established since joining the Pacific fleet early in 1944. Vice Admiral E. L. Cochrane, chief of the bureau of ships, said.

Although it had been disclosed that the Iowa recently participated in the shelling of the Jap homeland, the navy for the first time gave details of the famous vessel's itinerary after keeping her on the "secret list" for many months. She suffered damage only once from enemy fire.

According to Cochrane, the Iowa "has already done much toward repaying her initial cost of \$110,000,000." He added that the Iowa has "proven that the mighty new type battleships have a very definite and important role to play in the modern navy."

The Iowa was the first of the 45,000-ton class, which also includes the New Jersey, Wisconsin and Missouri. She is 887 feet long and 108 feet of beam.

Only damage suffered by the Iowa was at Mille atoll in the Marshalls on March 18, 1944, when Japanese shore batteries scored two hits but caused only minor damage and failed to silence her 16-inch guns. There were no personnel casualties in that action.

The Iowa was considered a match for any ship in the Jap navy but she has seen little surface action because of the tactics used by the enemy. Most of her work has centered on blasting enemy shore positions, especially coastal batteries.

Among the landings supported by the Iowa and other vessels were those in the Marshalls, the Marianas and the Philippines. She also operated with the fast carrier task force during strikes against Okinawa, Formosa, Luzon and the Jap homeland.

Once during the Philippine operation the Iowa at night contacted a Jap cruiser or large destroyer in the San Bernardino straits and her guns set the enemy vessel on fire. Light units closed in and the Jap ship was sunk. Fifty Jap survivors were found among the debris.

MADAME LAVAL
ALSO ACCUSED OF WORK WITH NAZIS
LONDON, Aug. 8.—(INS)—Edouard Laval, wife of the former Vichy leader, was said today to have been formally charged with intelligence with the enemy.

British news agency in a dispatch from Paris said that the charge was lodged by investigating Magistrate Morchut.

CHIEF ON VACATION
Fire Chief James E. Thomas is enjoying his annual vacation. During his absence First Assistant Chief George W. Harper will be in charge, with Second Assistant Chief William Hawk aiding him.

POOR DIGESTION?
Headachy?
Sour or Upset?
Tired-Listless?

Do you feel headachy and upset due to poor digestion? Do you feel cheerful and happy again your food must be digested properly.

Each day, Nature must produce about two pints of a vital digestive juice to help digest your food. If Nature fails, your food may remain undigested—leaving you headachy and irritable.

Therefore, you must increase the flow of this digestive juice. Carter's Little Liver Pills increase this flow quickly—often in as little as 30 minutes. And, you're on the road to feeling better.

Don't depend on artificial aids to counteract indigestion—when Carter's Little Liver Pills aid digestion after Nature's own order. Take Carter's Little Liver Pills as directed. Get them at any drugstore. Only 25¢.

Mercer Corporal Used Cigarettes To Get Pictures

Corporal John Ellis, Back Home With Tales, Picture Taking In German Prison Camp

MERCER, Pa. Aug. 8.—(INS)—Col. John Ellis, for 10 years a prisoner of the Germans kept asking for cigarettes from his family in Mercer.

They knew he didn't smoke but complied with his requests and sent cartons of cigarettes to him through the Red Cross at every opportunity.

Ellis' wife Evelyn and his parents, Mr. and Mrs. C. A. Ellis, knew today why he wanted them.

He is back home with a prized collection of pictures which he took with a camera, traded from his Nazi guards for 25 packages of American cigarettes. The Germans even took 15 rolls of exposed film, had them processed and mailed to his home, Ellis said.

"I never worked a camera when I was home," Ellis said in Mercer, but I decided to try my hand. I had some six other American prisoners set as spotters to warn me of the approach of German soldiers.

Ellis said he used a method to hide his camera from the inspecting eyes of German officers. Usually, however, he hid it in a hole carved in the cement floor under his cot.

Most of his pictures were taken when his guards were eating but sometimes he bribed them to make shots for him.

Ellis was captured in Tunisia in 1943. He was first imprisoned at the Stalag 3B camp at Posenberg, where he got the camera. When he was transferred to Luckenwald, he hid the camera in his clothing and got by because he was not searched. The cigarettes again bought off a guard who applied him with film. Ellis said he was now exchanging pictures with six other prisoners who traded for cameras.

"Taking pictures saved me something to do during those 29 months," Ellis said.

Higgins Sees Early End To Jap War
CHICAGO, Aug. 8.—(INS)—Andrew Jackson Higgins, New Orleans shipbuilder, foresees the end of the war with Japan coming soon, possibly within 90 days, as a result of the destruction wrought by the atomic bomb.

Higgins, in Chicago to dedicate a room at the Rosenwald museum of science and industry, revealed that his 1,400-acre plant in New Orleans had been devoted to making component parts for the atomic bomb.

He said that the plant was built by the government at a cost of 26 million dollars. About 2,500 persons were employed on the project, he said today.

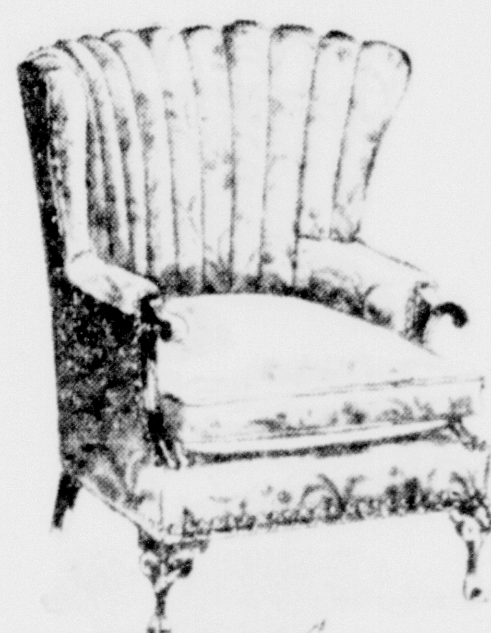

"There is no question in my mind but that the war with Japan will be over in 90 days,"

Floor Sample CLEARANCE

of Quality Furniture

Scores of worthwhile items up to 1/2 off ceiling prices, just when you need them most! Sgt. C. S. McFarland Indict Woman In Is Reported Killed Death Of Infant

Local Soldier, Previously Reported As Missing In Action, Was Killed, Message States

Sgt. Charles S. McFarland, son of Sanford and May McFarland of 101 South Front street, who had previously been reported as missing in action on September 20, 1944, is now revealed by the War Department to have been killed in action on that date in France.

The sad message informing his parents of his fate was received recently.

Sergeant McFarland, who entered service in February, 1942, was serving with the 48th Armored Infantry Battalion when he met his death.

The letter stated that the Purple Heart has been awarded in his name posthumously and that a letter will be received by the parents from his commanding officer and the chaplain of his unit, giving further details as to how he met his death.

Sergeant McFarland was born in New Castle on April 26, 1915, and graduated from New Castle high school.

It is said that circus people speak a language that is all their own. People who enjoy the free sights but do not buy tickets are referred to as bulls. Elephants are referred to as old folk, ostriches as big turkeys, camels as humps, hippos as hogs, and hyenas as gravediggers.

Try The News Want Ads For Results

GREENSBURG, Pa., Aug. 8.—(INS)—A 21-year-old wife of an overseas soldier was under indictment for murder today in the strangulation death of her newly-born baby last May 21.

State police testified Mrs. Emma Fabry, of West Leechburg, Pa., allegedly admitted burying the infant in a manure pile. They said the baby was born between the time Mrs. Fabry was examined by a physician at her parents' home and her removal to a hospital several hours later.

The infant was found in the manure pile and taken to the Tarentum Valley hospital where it lived about 12 hours. Death was attributed to strangulation and exposure.

The grand jury also indicted Tulio Venturini, of West Leechburg, alleged father of the child, on an adultery charge.

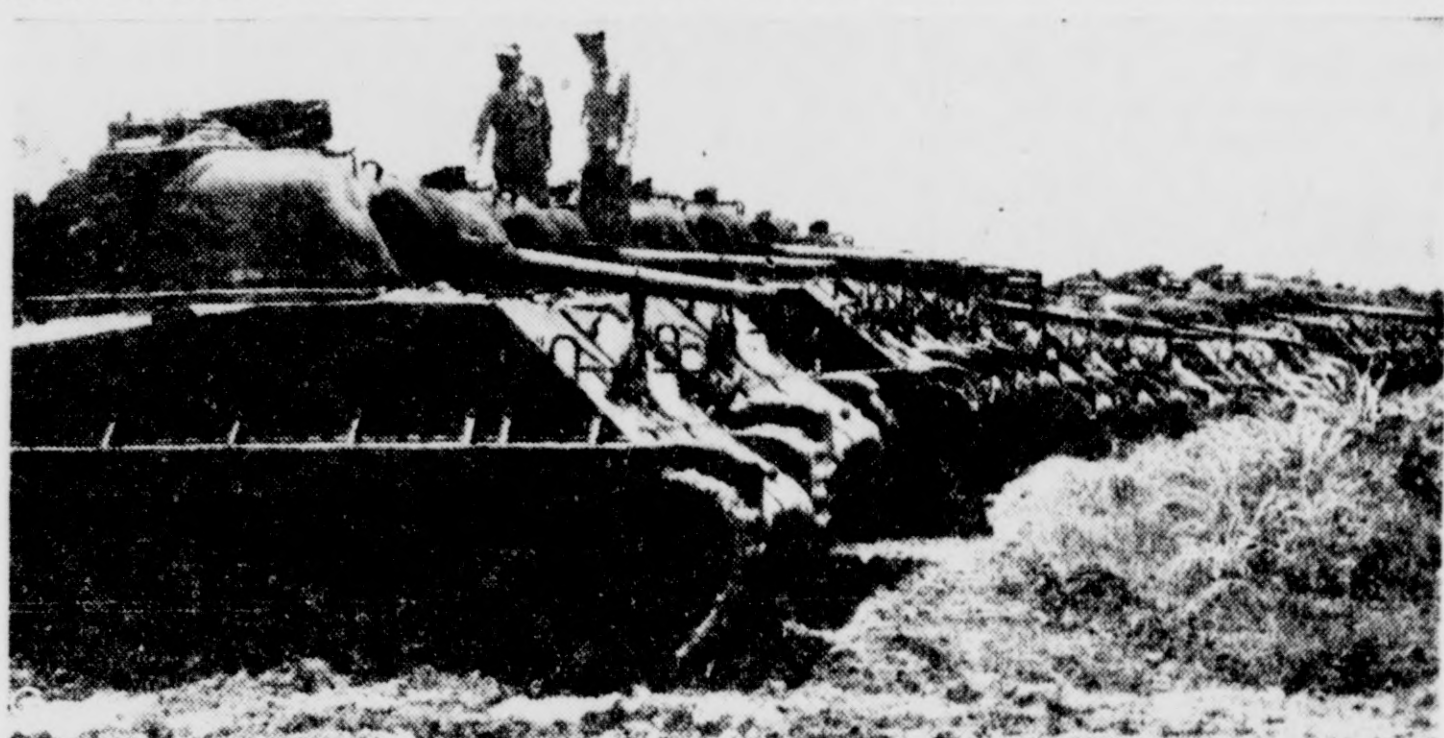

GUEST STEALS THEN STABS HOST. VICTIM ACCUSES

PITTSBURGH, Aug. 8.—(INS)—Police today held Robert Teed, 64, Pittsburgh, in connection with the stabbing of Arthur Conrad, 46, Pittsburgh.

According to officials, Conrad is alleged to have been a guest at Teed's room. After he left, Teed reportedly missed an alarm clock and some canned goods. Police said Teed pursued Conrad and overtook him on the street.

Hospital attaches report Conrad is suffering from a stab wound in his chest.

LINEUP OF 'LONG TOMS' FOR JAPAN D-DAY

Long line of 155-MM "Long Toms", their nozzles presenting an ominous threat, are shown massed at a Philippine base on the outskirts of Manila, ready to play their part in the coming invasion of Japan. The Philippines, and particularly Manila with its important harbor, are serving the same role in the Pacific that England played prior to the invasion on the Normandy coast of France.

Fireman's Second Wife Dies In Fire Just As Sister Did

PHILADELPHIA, Aug. 8.—(INS)—The wife of an acting fire captain died today when fire raged through her south Philadelphia home.

Three of her children were injured when they jumped from a second-story window.

The dead woman was Mrs. Theresa Colonna, 52. The injured children were Stella, 29; James, 21, and Gerald, 19, a sailor.

They told police their mother refused to jump with them. Her husband, Vito, ran to a fire box to turn in an alarm and was unable to enter the blazing home when he returned. The flames were believed to have started in the kitchen.

Colonna's first wife, a sister of his second, died 25 years ago when fire destroyed their home.

MILLBURN

The Ladies' Friendship club will hold its August meeting at the hall Thursday afternoon, Aug. 16.

The primary department of White Chapel held their picnic at the home of Mrs. J. R. Patterson 10. There were 32 present.

Mr. and Mrs. Dickson Stewart entertained at 500 Saturday evening. There were three tables in play, and high score went to Mr. and Mrs. Paul Woods. Refreshments were served by the hostess.

Mrs. S. J. Drake and her house guests, Mrs. Dean Henry and children, of North Caldwell, N. J., and Mrs. John Woods, attended the annual picnic of the missionary society of White Chapel church, which was held at New Wilmington Park last week.

Mr. and Mrs. George Davis of New Castle called on Mr. and Mrs. Clair Woods Sunday evening.

Mr. and Mrs. Dean Henry and children, of North Caldwell, N. J., are visiting Mrs. Henry's parents, Mr. and Mrs. S. J. Drake.

Callers in the home of Mrs. Ed Ramsey recently were Mr. and Mrs. Robert Neal and family, of Jackson Center; Margaret Ann Davis, Mrs. Frances Jordan, LeRoy Jordan, of Mercer; Mrs. Thomas Campbell of Grove City and Miss Hillman of Sandy Lake.

Edna Latzenberg of Volant was a week-end guest of her aunt, Mrs. B. C. Oakes. Other callers in the Oakes home were Mrs. Mary Williams and Mrs. Philip Joiner of Sharon and Robert Oakes of Jackson Center.

Miss Myrtle Anderson left Tuesday to resume her work in the Oakdale vocational school at Oakdale, Ky. Miss Anderson and Mr. and Mrs. L. B. Anderson and Mrs. Nancy Huffman were Sunday dinner guests of Mr. and Mrs. Elmer Anderson. Later in the day Mr. and Mrs. George Caldwell and children and Mr. and Mrs. Alfred Shoup of Mercer and Mr. and Mrs. Clyde Brewer and family of Elwood City, called in the Anderson home.

Miss Constance Hume of Pittsburgh spent the week-end at home. Louis Harlow of New Wilmington was a caller in the Hume home.

Mrs. I. E. Stewart spent several days with relatives in Monaca, Pa. John Woods spent several days at Hershey, Pa. in the quarters of the Black Angus cattle sale.

Mrs. Edna Munk of Mercer is visiting former neighbors and friends in the vicinity of Leesport, Station.

Mr. and Mrs. R. E. Anderson and daughter, Sally, of Mercer, and Joan and Peggy Woods, were recent guests of Mr. and Mrs. J. H. Armstrong.

Stephen Lukacs and Mrs. J. P. Hart attended the quarterly meeting of Pomona Grange Saturday afternoon.

Mrs. Hiram Drake and children of Mercer were Sunday dinner guests of Mr. and Mrs. S. O. Drake.

Mrs. Harry Fick, Mr. Clayton Linn and Miss Scott Whiskey of Brownsville, visited Mrs. Fick's brother, George Masters, and family Sunday. They were accompanied home by Geraldine Masters, who is on vacation.

Helen Lukacs, who submitted to a tonsil operation at Mercer hospital Monday morning of last week, was discharged Wednesday.

The young people of the Grange met with the lecturer, Mrs. Ruth Hume, for a play practice Monday evening.

More Deferments For Men Under 30 May Be Cancelled

WASHINGTON, Aug. 8.—(INS)—Men under thirty years of age in essential industry were faced today with loss of draft deferments unless their army and navy slacken demands for 100,000 recruits a month.

This situation was emphasized in a report by the selective service system to the House military affairs committee, discussing the current problems of the draft in the light of present army requirements, which have met with severe congressional criticism.

"The selective service system, in order to meet the calls remaining unfilled after inducting those reaching 18 years of age, has no other choice but to terminate the deferments and process for induction many of the limited number of men remaining deferred in classes 2-A, 2-B and 2-C," selective service stated.

The only exceptions to the threatened tightening of deferments, the agency said, would be such vital industries as coal mining, railroading and ship repair yards.

The report pointed out that those now classified as 1-A would soon be exhausted at the prevailing rate of approximately 100,000 inductions a month.

Mercer To Enforce Traffic Regulations

MERCER, Aug. 8.—Mercer's traffic problem which has been a nuisance to the borough council for years and which it was stated by councilmen at last night's meeting of that body had increased to a point over that of last year "it caused them to decide upon drastic enforcement of the dormant traffic ordinance and instructed the police force to enforce the regulations."

Borough Solicitor L. H. Richmond was instructed to write to the Allegheny County Automobile Association and inform them that in the future the borough authorities would strictly enforce the traffic regulations.

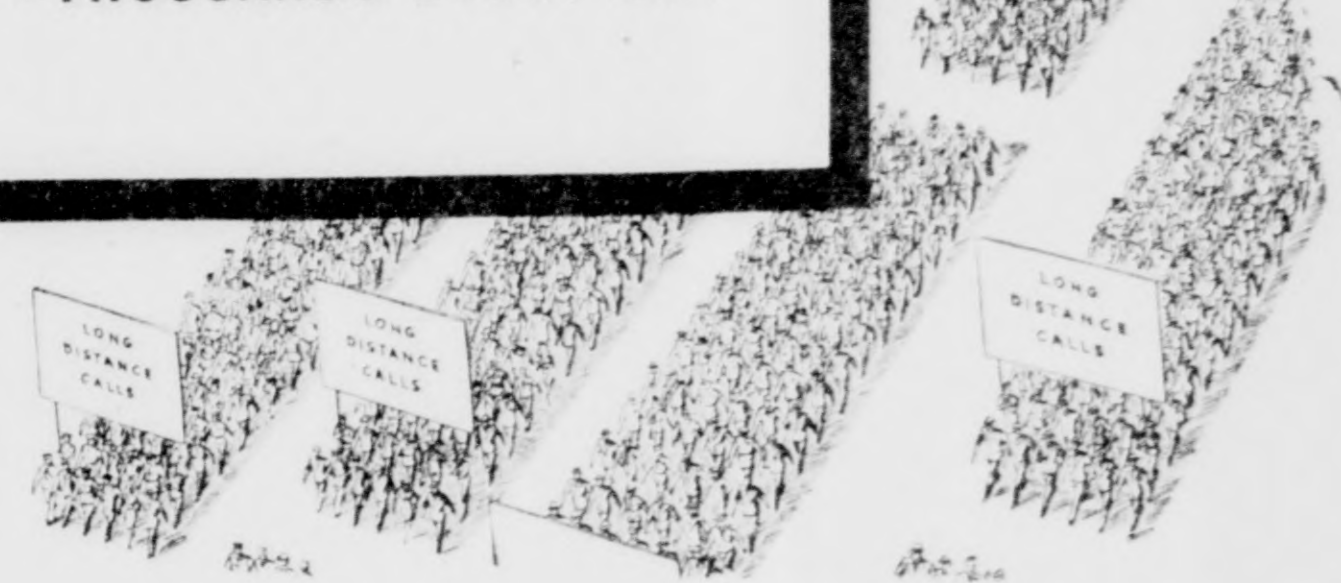

WESTINGHOUSE OFFICIAL NOW BANK TRUSTEE

PITTSBURGH, Aug. 8.—(INS)—Gwilym A. Price, executive vice president and director of the Westinghouse Electric Corporation, today was elected a member of the board of trustees of Central Hanover Bank and Trust Company.

Price is joining the Westinghouse organization in 1943 Price was president of the Peoples Pittsburgh Trust Company. He also holds directorships in the Peoples-Pittsburgh Trust, Pittsburgh Steel, Blaw-Knox, South Penn Oil and National Union Fire Insurance.

They keep marching right along

—THOUSANDS EVERY DAY

Most of the time you pick up the telephone and your Long Distance call goes right through. That's the way we try to have it, even with a war on.

But sometimes there's an extra rush and some of the thousands of Long Distance calls get concentrated on certain circuits.

Then the operator will help to keep things moving by saying — "Please limit your call to 5 minutes."

THE BELL TELEPHONE COMPANY OF PENNSYLVANIA

Declares U. S. Should Retain Bomb Secret

WASHINGTON, Aug. 8.—(INS)—Sen. Walter R. Bruce today declared that the United States should not at this time give the secret of atomic bomb to other nations.

"Too often in the past our country has done just that in the field of military and industrial weapons in which it has pioneered," said Bruce.

The discovery of the bomb he said should be followed by creation of a national research laboratory to make further experiments in science.

Atomic Bomb Rays Lurk For Seventy Years

NEW YORK, Aug. 8.—(INS)—Death-dealing rays will lurk in Hiroshima for 70 years.

The Japanese city, devastated by America's atomic bomb, will be a death trap for Japanese rescue workers unless they are thoroughly simulated against secondary radiation.

These warnings were made today in an exclusive statement to International News Service by Dr. Harold Jacobson, 33-year old physicist who worked in 1940 years on the "Manhattan project" as the atomic bomb development was known.

"The greatest danger of the explosion," he explained, "is the gamma rays which become involved with secondary radiation which breaks up the red corpuscles in the blood."

This prevents the body from assimilating oxygen which means that three to four weeks after the same war victims of leukemia die."

Vaporizes All in Path

Dr. Jacobson said that the force of the atomic bomb is so great that it actually vaporizes all matter in its path. Trees and stones and the steel buildings turn into gas and explosion. This causes effect saturation in the area with the death-dealing radiation.

Laboratory tests have shown," he said, "that the rays will not be fully dissipated for 70 years. Furthermore, rain falling on the area will pick up the rays and will carry them down to the rivers and the sea. All life in these waters will perish."

Dr. Jacobson cited three facts to illustrate the awesome force of the explosion, but he emphasized that there is no danger in this country in manufacturing the bomb. Every process is completely under control, he said.

Dr. Jacobson said that the energy of the atomic bomb can be used to heat a city and provide all of the necessary power. A pound of U-235 immersed in water would produce a super-heated steam, he explained.

But such a power plant would have to be built in a remote area and thoroughly insulated with sheets of lead and paraffin.

The energy could also be used to run an automobile, he asserted.

Although U-235 to cover the head of a pin would do the trick.

But an insulator to protect the occupants of such an automobile has not yet been developed," he said. "The great problem now is to find the insulation."

NEW CASTLE WAC TO WED OVERSEAS

Mrs. C. C. Porter of New Castle announces the engagement of her daughter, Cpl. Lois G. Porter, to Cpl. George C. Rinehart, son of Mr. and Mrs. George Rinehart of Addison, Michigan.

The bride-elect plans an early fall wedding in Washington, England, where she and her fiancé are serving. Overseas 15 months.

Cpl. Porter met Cpl. Rinehart at the air base where they both are stationed.

Lawrence County Farm And Home News

By Extension Representatives, LEWIS C. DAYTON, Agriculture; MISS MARY ELLEN McCLAIN, Home-Economics

TREES PROVIDE THREE-WAY BENEFITS

Forest tree planting pays dividends in three ways, in the opinion of R. D. Walter of Mahoning township. They provide a cash income from the sale of Christmas trees, a potential supply of timber for farm use or for sale, and a continual source of enjoyment for those who can watch them grow.

Mr. Walter made his first planting about 22 years ago and has made frequent plantings since that time. On the area first planted, some of the larch trees have grown over 50 feet in height. Oak varieties have also made substantial growth.

By planting mixtures of evergreen trees on parts of his farm not suitable for cultivation, Mr. Walter has obtained income and satisfaction from land which otherwise would be of little value.

Many Lawrence County farms have similar areas which can be put to the same use with profit to the owner.

MINERAL OIL CONTROLS WORM IN SWEET CORN

Applications of light mineral oil can control earworm in sweet corn. Where fresh corn silks can be found, this insect will lay eggs in them in preference to anything else, so it is important to provide protection to the corn from this time on. If damage is to be kept at a minimum.

The simplest treatment is the injection of the light mineral oil into the tips of the ears. This can be accomplished by use of an oil can with a spout having a small tin. Or a glass medicine dropper can be used for small plantings.

For best results the oil should be applied four days after silking, in order to permit the corn a chance to pollinate first. Only a quarter-teaspoon of oil should be applied to the tip of each ear. Too much oil will cause the corn to discolor.

Because not all ears will be in proper condition for treatment at the same time, two or three times may be necessary to give complete protection against attacks of the corn earworm.

CUP AND RULER ARE SOAP SAVERS

A measuring cup and a ruler kept near the washing machine may help in saving soap and also in doing an efficient washing job. A suds about two inches thick has proved best for washing clothes clean.

Too much soap is not only wasteful but does not do the best washing job. Too little soap does not get clothes clean.

A little experience will show just what measure of soap is needed to give a 2-inch suds. Try a half cup of soap first, and then add until exactly the right measure is found. It is easier to add soap than to try to remove an excess.

Just how much is needed depends on the size of the machine, the water, and the kind of soap used—whether flakes, chips, powder or jelly.

Measuring the water and the load

will also help in saving soap.

Representing FARM BUREAU MUTUAL AUTOMOBILE INSURANCE COMPANY, FARM BUREAU MUTUAL FIRE INSURANCE COMPANY, FARM BUREAU LIFE INSURANCE COMPANY

of clothes is also important. Fill the tub with just enough water to reach the water-line indicated inside the machine after the clothes are in. Too much water may strain the motor and run over into the pump and oil case. Too little will not get clothes clean. Put in only the weight of clothes or number of pieces advised by the directions that came with the machine. Too heavy a load will not wash well and may overburden the motor.

Measuring pays in laundering as it does in cooking. Yet many a housewife who takes the utmost care in measuring ingredients when she cooks uses slapdash methods in washing, and is especially careless about dumping in soap.

CONTROL FALL WERWORM NOW

With the first nests of the fall werworm appearing, now is the time to start control. The werworm, which feeds on many kinds of trees and shrubs, resembles the tent caterpillar in some respects, but feeds much later in the year.

Where the nests can be reached, the werworm can be controlled by destroying the nests. On large trees, a spray of arsenate of lead will give control.

The fall werworms were very destructive in 1944 and probably will continue their activities this year unless control is started early.

ELECTRIC LIGHTS HELP AVERT SUMMER EGG SLUMP

Late summer slumps in egg production can be averted or lessened by the use of artificial lights, good housing and ventilation, and maintaining feed consumption in the laying flock. August 15 is the date when many poultrymen begin turning on the electric lights in their laying houses.

Late summer eggs are among the year's higher-priced eggs, and large eggs command a greater spread in price over smaller eggs as the supply becomes less. Pellets or wet mash, and often both, are used to stimulate the appetite of the layers and increase the total daily feed intake. Ample feeder space also promotes greater feed consumption.

In using artificial lamps in the poultry houses, most poultrymen operate the lights so the equivalent of 12 hours of daylight is provided.

CAN PEACHES WITHOUT SUGAR

The amount of peaches you can this year need not depend on your sugar allowance, for peaches may be canned satisfactorily with little or no sugar. One bushel of peaches will yield 18 to 24 quarts.

Choose ripe, fresh, firm fruit and don't use any decayed spots. Wash and peel peaches, handling gently. To peel peaches easily, place a few at a time in a wire basket or cheesecloth, dip in boiling water for a minute, then dip quickly into cold water. The skin will slip off easily. Cut peaches in half or slice them, removing pits.

To can without sugar, cook fruit in its own juice until heated through but not soft. If fruit is not juicy, add just enough water to keep it from sticking to the pan. Pack the hot peaches in clean jars, leaving a half-inch headspace. Press down until peaches are covered with juice, then drive out air by running a silver knife around edge of jar.

Sugar is not needed to keep canned peaches from spoiling. When canning with sugar, slice peeled peaches directly into clean jars, leaving a half-inch headspace, and cover peaches with boiling sugar made from 1 cup of sugar to 2 cups of water. It usually takes 3-4 to 1 cup of liquid for each quart jar.

Corn syrup can be substituted for 1-3 of the sugar or honey for 1-2 of the sugar.

Work out air bubbles by running a silver knife down side of jar, wipe jar rim with a clean damp cloth, adjust lids, and seal according to the manufacturer's directions. Process pint jars 20 minutes and quart jars 25 minutes in the boiling water bath.

When processing time is up, take out jars, finish seal where necessary, and set jars to cool right side up and away from drafts. When cold store jars in a cool, dark dry place.

GOES TO WARSAW

STATE COLLEGE, Aug. 3.—(INS)—Clarence S. Anderson, professor of agricultural education at Pennsylvania State College, has been granted a leave to go to Warsaw, Poland, on an official mission for the United Nations relief and rehabilitation administration.

He will be one of nine delegates commissioned to establish a permanent UNRRA mission in Poland and to ascertain Polish service needs in the fields of health, displaced persons, welfare, and agricultural and industrial rehabilitation.

The Volga is the longest river in Europe.

ICE CREAM MAKING HERE LEADS NATION

HARRISBURG, Aug. 8.—(INS)—Pennsylvania in 1944 retained its position as the nation's leading state in the production of ice cream, turning out a total of 49,469,600 gallons. Miles Horst, state secretary of agriculture, announced today. The information was gathered by the Federal-State Crop Reporting Service in cooperation with Secretary William S. Livengood, Jr., department of internal affairs.

While the total for last year was nearly 4,800,000 gallons less than the state's all-time record of 54,266,000 attained in 1942, production was ahead of 1943 by more than one million gallons. New York ranked second in ice cream production in 1944, and California third, the same positions each state held in the preceding two years.

The Pennsylvania output was sufficient to supply every citizen of the state with close to five gallons each. Production of creamery butter in Pennsylvania during 1944 was 15,704,000 pounds compared with 12,444,000 in 1943.

Cheese production, excluding full cream Cheddar and cottage, pot and bakers' cheese, declined 1,600,000 pounds compared with 1943, but cottage, pot and bakers' cheese increased 2,100,000 pounds.

The quantities of condensed and evaporated whole milk and of condensed milk exceeded 1943 production by 11 per cent and 15 per cent, respectively. Dry whole milk declined roughly 1,200,000 pounds and dry skimmed milk for human consumption dropped almost 1,600,000 pounds compared with 1943 production.

Motor carrier hearings for Western Pennsylvania motor carriers for August 13 at Harrisburg on charges of violating regulations. (Charged for discontinuing operating without notifying the commission were:

Allegheny county—Charles Sampey of Lemont, Furnace, and Lloyd H. Sharp of Uniontown.

Lawrence county—David DeSalvo of New Castle, R. D. Accused of violating insurance requirements were:

Allegheny county—George W. Mock of Pittsburgh, Leroy McCree of Pilegrim, and John R. Neckerman of East McKeesport.

The cost of protecting and fighting forest fires—not counting the trees destroyed, property damaged and lives lost—range between \$25 million and \$300 million each year.

WE WAITED a long, long time to see a newspaper headline saying: "Aluminum released for civilian demands."

We waited for that day because we know how much women miss new aluminum cooking utensils, aluminum-wrapped food products, and new light-weight household appliances of aluminum. And, now that Alcoa Aluminum has been released for these things, and you may not yet be able to find your favorite line of aluminum products in the stores, we believe that you would like to know you will get them:

1. Just as soon as workers are released from war work so they can take jobs making civilian goods.
2. Just as soon as such work does not interfere in any way with existing or future war contracts.

3. Just as soon as other parts which manufacturers use with aluminum, such as small motors, handles, etc., are available in sufficient quantities.

4. Just as soon as shipping containers and shipping space are available.

It is gratifying to know that the good things of the aluminum age are within sight and that you will soon be enjoying more and more of the Alcoa Aluminum that has done so much to lighten the burdens of everyday life.

ALUMINUM COMPANY OF AMERICA

Army Speech Course Makes GI's 'Mellow'

FORT LOGAN, Colo.—(INS)—They're going to make mellow fellows out of the GI's at Fort Logan, so don't be surprised at the well-moderated and decent tones in the voices of soldiers conversing with combat buddies.

A thorough speech course has been started at the communication hospital to enable the men stationed there to participate in many successful in social situations which require speech ability.

The course, under the direction of the hospital's education branch, will endeavor to correct speech impediments and to give conversational knowledge of the principles of speech, and to stimulate interest and train men in various speech fields, according to Sgt. Francis A. Devlin, ex-radio announcer and actor who is instructing the class.

The class scope includes training in public speaking, speech correction, conversation, radio and dramatic speech.

Instruction in the art of making so with proper speech are also included.

The students use the post radio station and cut records of their voices at different stages of the course so they can tell how they are progressing.

Visits to radio station, guest speakers, and use of the theater facilities at the post round out the course program for making better speech speakers.

San Francisco, not the Northland, possesses the largest windmill in the world standing in a park. It is some 50 feet high.

DELAY BUS PROJECT YOUNGSTOWN, O. Aug. 8.—(INS)—Contributors of one additional bus each in Youngstown, originally planned for this month, will be postponed until November, officials of the Youngstown Municipal Railway, announced today. Eight new motorbuses are expected to be delivered late this month.

STOCK MARKET RALLIES TODAY

Market Rallies Fractionally Today,
Few Leaders Gain Nearly
Point

NEW YORK, Aug. 8.—(INS)—The stock market rallied fractionally in forenoon trading today and recovered partly from yesterday's sell-off. A few leaders gained nearly a point when traders hesitated at the opening, switched to the buying midway through the first hour.

Turnover continued fairly active, approximately nearly 200,000 shares in the initial hour.

Vanadium Corp. of America, leading uranium producer, staged another run-up, selling as high as 29 7/8 on more than 3 points.

Chrysler U. S. Steel and Bethlehem added nearly a point each. Ralls were quieter than the general market and ended near Tuesday's final. Aviation made headway, paced by Lockheed and Douglas. Chemical issues were strong. Copper, electricals, and rubber issues added small fractions.

The bond market was quiet and steady.

LEGAL NOTICES

Administratrix's Notice

Notice of Administration of the Estate of James T. Clark, late of the County of New Castle, Pennsylvania, deceased, is hereby given to all persons having claims against the estate of the said deceased, to present them to the undersigned, at the New Castle County Courthouse, New Castle, Pennsylvania, on or before the 15th day of September, 1945. The undersigned is the Administratrix of the said estate.

Legal Notice, Aug. 15, 22, 29, Sept. 5, 12, 1945.

NEWS AND VIEWS AT CAPITAL

HARRISBURG, Aug. 8.—(INS)—Five high-paying commonwealth posts including a \$10,000-a-year membership on the state liquor control board were vacant today, a survey reveals. In addition to the liquor control board membership, vacancies exist on the parole board, securities and milk control commissions and the unemployment compensation board of review.

Gov. Edward Martin has not indicated when the posts would be filled. He has explained the boards and commissions were operating smoothly with their present memberships.

The liquor board post and a \$9,000-a-year membership on the parole board have been vacant since January, 1943. A vacancy on the unemployment compensation board was created with the resignation March 31 of Col. Henry Lawrence, unsuccessful candidate for the Republican nomination for mayor of Scranton. The post pays \$8500 annually. The securities commission has been operating with only two members since the resignation October 1, 1943, of Walter C. Miller of Lancaster. The commission pays \$7000 a year. Milk Control Commission Chairman John M. McKee's term expired May 1 and Governor Martin did not reappoint him because of "bipartisan objections" by the senate. H. N. Cobb of Towanda was named chairman of the commission. The regulatory agency membership pays \$6000 a year.

The state health department has reported that the bureau of sanitary engineering supervises the public water supplies of 8,000,000 Pennsylvanians, approximately 80 per cent of the state's population. About 25 filtration plants serve six million citizens while another 2,000,000 persons are supplied chlorinated water by 500 chlorine installations.

For the first time in four years, the state health department has reported that the bureau of sanitary engineering supervises the public water supplies of 8,000,000 Pennsylvanians, approximately 80 per cent of the state's population. About 25 filtration plants serve six million citizens while another 2,000,000 persons are supplied chlorinated water by 500 chlorine installations.

Prisoners Of Japs Gradually Forget Prison Hardships

Mr. and Mrs. J. G. Thomas, Who
Were Confined In Santo Tomas,
Visit Relatives Here

Mr. and Mrs. J. G. Thomas and their daughter, Mrs. Thomas, who spent three years in the Santo Tomas prison camp maintained by the Japs at Manila, are in the city. Mrs. Thomas, who is the wife of Mr. Thomas, is the daughter of Mr. and Mrs. L. H. Patterson of Grand street, are gradually learning to forget the hardships they suffered during their enforced imprisonment at the hands of the Japs and are beginning to appreciate the goodness of life in this country.

Mr. Thomas, who was a guest of his brother-in-law, at the weekly luncheon of the Ladies Club Tuesday, stated that he still feels a little weak from his experience, and is unable to take any extended exercise without feeling very tired. He contracted beriberi because of the meager diet at the camp, particularly during the last four months of his stay at the camp, when the army took over the task of feeding them. A handful of soup rice or some condensed was all they subsisted on until they were freed by the Americans in their victorious landing on Luzon.

Those who observed the regulations set up at the camp, and bowed to their Jap captors, were not mistreated. Mr. and Mrs. Thomas saw several instances of this during their stay in the camp.

During his incarceration he dropped in weight from around 160 pounds to 125 pounds, but is now regaining his health and weight.

Man Had Brick In His Stomach For 10 Years

One man recently stated that for 10 years he felt like he had a brick in his stomach. This feeling was due to the lump of undigested food he always had inside of him. He was weak, worn out, headachy, swollen with gas and terribly constipated. Recently he started taking ERB-HELP and says the feeling like a brick in his stomach disappeared the second day. Bowels are regular now, gas and headaches are gone and he feels like a new man.

ERB-HELP contains 12 Great Herbs, they cleanse bowels, clear gas from stomach, act on sluggish liver and kidneys. Miserable people soon feel different all over. So don't go on suffering! Get ERB-HELP. Sold by All Drug Stores here in New Castle.

BUSINESS COLLEGE

Our office is open daily for those who wish to call and make their arrangements for the September 4 opening. This year our Day School as well as our Night School begins September 4, the day after Labor Day. It will greatly accommodate us if you can call at our office in the near future to make your plans. It will be good for you to have your plans made in the near future and it will cost you less than it would if you waited until the opening date. Our tuition rates until the school opening will be the same as last year.

IN U. S. ARMED SERVICE

(War Censorship Regulations Limit Information Allowed In This Column)

Pfc. Louis Zambelli and Pfc. Carmen Zambelli, brothers, of 510 East Division street, met in Freyung, Germany, on July 11. It was the first time they had seen each other for three years and at first neither recognized the other. Carmen stopped at Freyung for a visit of a few hours with his brother in the course of a 674-mile trip. He has been overseas two and one-half years with combat engineers. Louis with the 380th infantry, has been overseas for the past nine months.

Pvt. Victor C. Black, son of Mr. and Mrs. Cornelius Black, of 314 Pine street, is stationed at Camp Lee, Virginia, in the Quartermaster Division. Another son, Cpl. Calvin D. Black, has recently been transferred from Germany to France.

Mr. and Mrs. Henry Grossman of South Ray street have received word from their son, Ronald Fulkerson, of the Seabees, that he has arrived in the Hawaiian Islands.

Mr. and Mrs. Charles L. Brown of 119 North Lee avenue have been informed that their son, Sgt. Russell W. Brown, of the U. S. Marines, has arrived at a Pacific destination. This is Sgt. Brown's second trip to the Pacific area, as he served for 31 months with the First Marine Division. Another son, Walter E. Brown, is now attached to the Atlantic Fleet aboard one of the newly commissioned destroyers.

Mr. M. M. 2-c Joseph Yantol of the U. S. Navy has returned to New York after spending a five-day leave with his parents, Mr. and Mrs. Michael Yantol of 511 Electric street, John T. Pajak, of Adams, Mass., a buddy of Mr. M. M. Yantol, also visited at the Yantol home for a few days.

Pfc. William L. Harkins, veteran of 33 months in the ETO, where he served in the infantry, has returned to this country aboard an air transport command, trans-Atlantic plane, arriving at Lackland Field, N. Y. He plans to visit soon with his wife of Arlington avenue. Pfc. Harkins has been awarded the ETO ribbon with six stars, Presidential Unit Citation, Combat Infantry badge, Good Conduct and American Defense medals.

T-5 Richard C. Graham, 38 South Lee avenue, and T-5 Bennie P. Russo, 221 South Liberty street, are members of the first platoon of the 694th Quartermaster Truck company. This platoon helps to operate the "Red Ball Express" of vital supplies from warehouses in central England to Southampton for shipment to armies in the continent.

After helping care for the survivors of the Dachau and Allach concentration camps overseas, Pfc. Wallace Tritz of 12 East Ralph avenue is now being processed at the assembly area command in

Pfc. France for direct redeployment to the Pacific area. Pfc. Tritz is attached to an evacuation hospital unit.

S-Sgt. Joseph A. DeLillo, 505 Canyon street, was among those honorably released from service on August 5 at Fort Dix, N. J.

Cpl. John P. Tartier of R. D. 3 is now being processed at Camp New York, France, as the first step in his redeployment to this country for furlough before starting for the Pacific area. He is a member of the 489th Air Service group.

Sgt. Andrew V. Rich, son of Michael Rich, Box 3, Hillsville, has been assigned to Cases Air Base, Casablanca, with the ATC's North African Division. This group is assisting in the movement by air each month of 40,000 veterans of the European and Mediterranean theatres of war back to the United States for redeployment and discharge. Sergeant Rich has been overseas for 35 months.

Pvt. Donald E. Krueger, son of Mrs. Elizabeth Krueger of 238 Smithfield street, has returned to Fort Meade, Maryland, after ten days at home. A brother, Pfc. William Krueger, is stationed at Camp Gordon, Georgia.

Jesse C. Dufford, Mo. M. M. 1-C, stationed at Key West, Fla., has arrived to spend a 30-day leave with his parents, Mr. and Mrs. J. C. Dufford of 122 East Washington street.

Charles H. Mori, Petty Officer 2-C, has returned to Camp Perry, W. Va., after spending the week end at the home of his parents, Mr. and Mrs. David Mori, of the Wilmington road. His sister, First Lt. Hilda E. Mori, U. S. N. C. is believed en route to duty in the Pacific area after having served for the past year and a half in France.

Pfc. William L. Harkins, 2061 North Walnut street, and T-4 Darrell W. Gould, 421 Elizabeth avenue, both of New Castle, and Cpl. Charles H. Cole, 413 Smiley street, Ellwood City, are listed as having been honorably released from service Monday at Indiantown Gap.

S. I-C Richard M. Fortney has returned to the Navy Yards, Philadelphia, after visiting with his parents, Mr. and Mrs. J. R. Fortney, 15 Levine Way. S. Fortney, who was injured while stationed at Hollister Air Base, Calif., is now awaiting a medical discharge from the U. S. Navy.

Pennsylvania soldiers arriving Monday for redeployment at Indiantown Gap include the following: Pfc. David J. Todd, 905 Franklin avenue, Pfc. Merle H. Jay, 228 Smithfield street, Pfc. Gaylord L. Myers, R. D. 1, Pfc. Leon C. Williams, King avenue, Pfc. John Small, 522 Electric street, Sgt. George E. Myers, R. D. 6, and Pfc. John H. Morrow, 333 Neshaunack avenue all of New Castle; and T-5 Jack Shaffer, R. D. 2, Ellwood City.

Lawrence McNary, ship's service man (harbor) 3-C, USNR, husband of Mrs. Edna B. McNary, Mounted Route 7, Ellwood City, is a member of the crew aboard a U. S. submarine tender at an advanced Pacific base. This repair vessel is charged with refitting war-weary submarines returning from combat patrol in the Pacific area.

First Lt. George W. Randall, 331 Crescent avenue, this city, arrived Monday with a group of officers at Indiantown Gap for redeployment.

Atomic Expert Escapes Nazis To Reach U. S.

Location Of Scientist Kept Secret
From Gestapo; Flew In
Plane's Bomb-Bay

LONDON, Aug. 8.—(INS)—The hair-breadth escape from German authorities of a Danish atomic expert who worked on the history-making new bomb that has been hurled against Japan was revealed today.

Doctor Niels Henrik David Bohr, professor of theoretical physics at Copenhagen university and Nobel prize winner, was whisked by fishing-boat to Sweden, and thence flown to England, before making his way to the United States.

As recalled today, the physicist escaped being apprehended by the Germans in Denmark, and managed to get to Sweden in September 1943. When he disembarked from the fishing-craft, he was surrounded immediately by Swedish police upon the request of Danish authorities.

Guarded By Police

The Swedish police guarded him against possible harm by German Gestapo agents, and 12 days later Bohr was whisked to Britain in the bomb-bay of a swift-winged Mosquito bomber. The aircraft flew through the Nazi blockade carrying the scientist and much priceless data to the United Kingdom.

Whereabouts of Bohr was a closely-guarded secret while he worked on experiments in Britain, and later when he went to America with other scientists. He was believed to be in constant danger of being hunted down by enemy agents, and was known to have refused to help the German Professor Hahn, who years before had made great progress in the discovery of atomic power.

TASTY SWEET

Says Statesmen Behind Scientists

DENVER, Aug. 8.—(INS)—The atomic bomb should mean the end of big armies, it was stated today by Sen. Ed C. Johnson (D. Colo.).

The big trouble, said Johnson, is that the scientists have progressed faster than the statesmen.

Unless the statesmen catch up, the destruction of mankind itself may be in sight, said the senator, who added he knew about the atomic bomb experiments for three years.

The atomic bomb ought to blow up peace-time conscription, as well as bring the war with Japan to a speedy conclusion, he said.
